

# SRM MEDICAL COLLEGE HOSPITAL & RESEARCH CENTRE

## DEPARTMENT OF MICROBIOLOGY

### Teaching Schedule for II-MBBS III– Semester 135 & 14 Students ( January -2017 )

| Date     | Day      | Time   |                         | Topic                                                                                                      | Faculty                                                        |
|----------|----------|--------|-------------------------|------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------|
|          |          | 8-9AM  | 2-4 PM                  |                                                                                                            |                                                                |
| 02.01.17 | Monday   | Theory |                         | Gas gangrene,<br>Botulism,Antibiotic associated colitis – <b>Problem based learning</b>                    | Dr.Triveda                                                     |
|          |          |        | Tutorial<br>(3- 4)      | Atypical mycobacteria – <b>large group teaching</b>                                                        | Dr.Sangamithra                                                 |
| 05.01.17 | Thursday | Theory |                         | Introduction to Enterobacteriaceae & E.coli<br><b>Case based learning</b>                                  | Dr.Mangayarkarasi<br>Dr.Shaweez                                |
|          |          |        | ( A- Batch)             | AFB demonstration<br>&Record work pg:38 – 40                                                               | Dr.UmaMaheswari<br>Dr.Manonmoney<br>Dr.Sandhiya<br>Dr. Stephen |
| 06.01.17 | Friday   | Theory |                         | Other Enterobacteriaceae<br>Klebsiella, Proteus, Providencia, Morganella etc<br><b>Flipped class model</b> | Mrs.Hemamalini<br>Mrs.Jebamalar<br>Dr.Shaweez                  |
|          |          |        | (B- Batch)<br>Practical | AFB staining I<br>Record work pg:38 - 40                                                                   | Dr.Subha Dr.Triveda<br>Dr.Archana Dr.Divija                    |
| 07.01.17 | Saturday |        |                         | Salmonella – <b>case based learning</b>                                                                    | Dr.Manonmoney<br>Dr.Stephen                                    |
| 09.01.17 | Monday   | Theory |                         | Shigella – <b>flipped class model</b>                                                                      | Dr.Mangayarkarasi<br>Dr.Sandhiya<br>Dr.Stephen                 |
| 12.01.17 | Thursday | Theory |                         | Yersinia, Pasteurella & Francisella - <b>problem based learning</b>                                        | Dr.Sneka                                                       |
|          |          |        | ( A- Batch)             | AFB staining exercise I<br>Record work                                                                     | Dr.Shabana Dr.Sneka<br>Mrs.Hemamalini<br>Dr.Anitha             |
| 13.01.17 | Friday   | Theory |                         | Vibrio – <b>case based learning</b>                                                                        | Dr.Uma Maheswari<br>Dr.Anitha                                  |
|          |          |        | (B- Batch)              | AFB staining exercise II<br>Record work                                                                    | Dr.Sangamithra<br>Mrs.Hemamalini<br>Dr.Stephen Dr.Anitha       |
| 19.01.17 | Thursday | Theory |                         | Pseudomonas & Burkholderia-<br><b>large group</b>                                                          | Dr.Shabana                                                     |
|          |          |        | ( A- Batch)             | AFB staining exercise II<br>Record work                                                                    | Dr.Sangamithra<br>Dr.Sandhiya                                  |

|          |          |        |                    |                                                                                                                            |                                                                                  |
|----------|----------|--------|--------------------|----------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
|          |          |        |                    |                                                                                                                            | Mrs.Jebamalar<br>Dr.Stephen<br>Mr. Amrish Prakash                                |
| 20.01.17 | Friday   | Theory |                    | Aeromonas, Plesiomonas,<br>Hemophilus & Gardnerella<br><b>Flipped class</b>                                                | Dr.Archana<br>Dr.Triveda<br>Dr. Anitha                                           |
|          |          |        | (B- Batch)         | Extended spotters-<br>Staphylococcus &<br>Streptococcus pyogenes                                                           | Dr.UmaMaheswari<br>Dr.Archana<br>Dr.Shabana Dr.Triveda                           |
| 21.01.17 | Saturday |        |                    | <b>I A Test – Microbiology</b>                                                                                             | All faculties                                                                    |
| 23.01.17 | Monday   | Theory |                    | Bordetella- <b>problem based learning</b>                                                                                  | Dr. Subha                                                                        |
| 27.01.17 | Friday   | Theory |                    | Brucella - <b>problem based learning</b>                                                                                   | Mrs.Hemamalini                                                                   |
|          |          |        | (B- Batch)         | Revision – Gram Staining                                                                                                   | Dr.Sneka<br>Dr.Manonmoney<br>Mrs.Jebamalar<br>Mr. Amrish Prakash                 |
| 28.01.17 | Saturday |        |                    | <b>I A Test - Pathology</b>                                                                                                |                                                                                  |
| 30.01.17 | Monday   | Theory |                    | Legionella, Campylobacter,<br>Helicobacter – <b>flipped class model</b>                                                    | Dr.Sangamithra<br>Dr.Manonmoney<br>Dr.Shaweez                                    |
|          |          |        | Tutorial<br>(3- 4) | Students seminar on<br>Salmonella infections ( <b>135 batch</b> )<br><br><b>IA test -2 General bacteriology (14 batch)</b> | Dr.Sandhiya & all<br>faculties<br><br>Dr.Divija, Dr.Anitha<br>Mr. Amrish Prakash |

1. InternalAssessment Test (21.01.17): GPC,GPB and MYCOBACTERIUM (135 &14 students)
2. InternalAssessment Test (30.01.17): General bacteriology (14 students)

**Professor & Head**

**Department of Microbiology**
