SRM IET ON CAMPUS

ELUCIDATE PROGRAMMING LANGUAGES-EVENT REPORT

11th JULY 2018

As per the culture of SRM Institute of Science and Technology, every academic year the SRM IET On Campus organizes events for the welfare of society, especially the students who aspire for a brighter future and are the shining stars of our next generation.

The first event for the academic year 2018-2019 was held on 11th July, 2018 which was "*Elucidate Programming Languages*" among school children. This event was organized with the objective of introducing school children to the world of computer programming languages.

Members present:

1. Dr. E Poovammal *(Professor, Dept. of CSE, SRM IST, Kattankulathur)*
2. Mrs. Jackulin Mahariba (*Faculty Coordinator, SRM IET On Campus*)
3. Mayank Nagda
4. Santhosh Venkateswaran S
5. Aditi
6. Vinu Baburaj
7. PrajishPrakash

The team visited **POTHERI GOVERNMENT SCHOOL, Potheri, 603203, Kancheepuram Distt.** to meet the students and enlighten on programming skills by 10:00 am.

Dr. E Poovammal teaching basics of programming to students

The content to be taught was decided by the SRM IET On Campus Members along with the coordinators considering the interest and keeping the need of the school students into consideration, with little emphasis on the fun filled events behind the scene.

A basic booklet was provided to all the students from our side, which contained the reading material related to Basic Programming skills in Tamil, which was prepared by the SRM IET On Campus team.

Basic Computer Skills booklet provided to all the students

All the students were middle school students. The event started with the students introducing themselves and telling about what they knew about programming and decision making and about the new technologies in the market.

The event was divided in two sessions. In the first session the students were enlightened about basic programming languages and about the platforms for programming. They came across basic C and C++ programming through an interactive presentation by Santhosh. The students showed immense enthusiasm and were energetic to ask frequent questions and were awarded for their answers too.

Santhosh teaching the basics of computers and technology to the budding stars

After the end of this *fun 'n' frolic* first session the students were given refreshments and left for a short recess.

The second session started on a good note with everyone having fresh minds. The students were given a brief description about the computing world.

The students were involved throughout the teaching session and their consistency and concentration for the event was unparalleled. Since most of the students had very less knowledge about programming languages, we were happy to be the ice breakers for the school students.

The faculty coordinator Mrs. Jackulin Mahariba honoured the head mistress of the school with a token of gratitude.

Dr.E.Poovammal is distributing the kits to the school stiudents

The students were also awarded with fascinating prizes and a group photograph with the students and the principal was clicked as a memory and a vote of thanks was delivered by the school principal.

The event came to close after the distribution of SRM IET On Campus kits for the young students.

Delivered IET goodies and smiles to the students

SRM IET On Campus Team with the school children and their teachers

The SRM IET On Campus members returned with blissful memories and immense satisfaction after a successful event that portrayed our corporate social responsibility.
