

Greetings from Centre for Statistics

Importance of Statistics in Research

It is a known fact that Statistics play a vital role in research. It functions as a tool in **designing research, analyzing its data and drawing conclusions** there from. As our world becomes increasingly **data-driven**, a working knowledge of statistics can be really useful. Thus Statistics become the base for all the analysis, and this makes statistics a necessary part of the learning curve.

Statistics and Research go hand-in-hand and today's decision making process is evidence based. Statistical methods play a major role in this kind of decision making process. Thus for decision-makers it is important to develop the ability to extract meaningful information from raw data to make better decisions. This is possible only through statistical data analysis.

Centre for Statistics

The Centre for Statistics is inviting you all to make use of this Centre. We have been conducting short courses on Statistics and related topics periodically in on-line or off-line modes. We are helping scholars in preparing articles for publication and in the completion of their Ph.D. thesis by incorporating proper statistical components. We have expertise to convert any research problem in any domain as a statistical problem, and find a solution for the problem.

The main aim of starting an exclusive Centre for Statistics is to enable faculty, research scholars and students of SRM IST to have proper understanding of Statistics as a research tool. It is the unique feature of our Institute. One cannot find such a Centre in any other education institutes in India.

Centre for Statistics is the hub of Statistical Training, Research and Consultancy within the SRM Institute of Science & Technology. The aim of this new Centre is to bring together multidisciplinary students, research scholars, and faculty with the expertise to bring fresh thinking to meet the new challenges within our institute. It promotes use of statistics in all areas applicable including industry, technology and community. This Centre is situated in the 13th Floor of the University Building of Kattankulathur campus.

Venue: 13th floor, Centre for Statistics

Room No: 1303
