

ACI

The American Concrete Institute, founded in the year 1904 and headquartered in Farmington Hills, Michigan, USA, with a regional office in Dubai, UAE, and a Resource Center in Southern California. The American Concrete Institute is a leading authority and resource worldwide for the development, dissemination, and adoption of its consensus-based standards, technical resources, educational & training programs, certification programs, and proven expertise for individuals and organizations involved in concrete design, construction, and materials, who share a commitment to pursuing the best use of concrete.

The objective of the new society, "to disseminate information and experience upon and to promote the best methods to be employed in the various uses of cement by means of conventions, the reading and discussion of papers upon materials of a cement nature and their uses, by social and friendly intercourse at such conventions, exhibitions, and study of materials, machinery, and methods, and to circulate among its members, by means of publications, the information thus obtained," ACI has more than 100 chapters, 243 student chapters, and 30,000 members spanning over 120 countries.

The American Concrete Institute Student Chapter at SRM Institute of Science and Technology (ACI SRM) was established in the year 2020. The objectives set down by the founders of ACI point the way to continued technical advancement and service to the engineering profession, the needs of a broad spectrum of membership, and the public interest. At present the chapter has 29 active members. The chapter plans out to cater to the current need and demand of a budding students by organising and involving the student in technical workshops, social activities, student talks, alumni talk and field trips. The chapter also provides a helping hand to the community by working with NGOs and by conducting various educative and interactive sessions with people from all walks of life for the betterment of society.
