Dear Readers,

It is indeed a great honor to be the SCO-Newsletter Head and an active Editor for the Smart Sprinklers, Department of Computing Technologies, School of Computing, SRMIST, and have immense pleasure to promote this first edition for 2021.

In this issue, we will recount the various information about the newborn department, its projects, patents, events, and activities in which our CTech faculty and student members were actively involved since from July to October until the 1st academic quarter of 2021.

Furthermore, CTech is well known for the hard work, dedication and brotherhood of its members and especially for its enthusiastic students. A right to remember kind of activities are booming in this period.

A huge thanks to all the people who contributed writing the wonderful and inspiring articles, without which there wouldn't have been this newsletter issue.

I would like to thank the authorities of SRMIST, and the faculty and student members, our tireless team for their wonderful effort and for their everlasting support throughout the creation of this Edition. Anticipating your suggestions. Expect the unexpected in the next Edition. Stay Tuned.
