### SRM INSTITUTE OF SCIENCE & TECHNOLOGY

Kattankulathur, Kancheepuram 603203, Tamil Nadu, India

# 25. B. Tech in Electronics and Communication Engineering (with specialization in Instrumentation Engineering)

#### 25. (a) Mission of the Department

IIVIISSION STMT - 1	Build an educational process that is well suited to local needs as well as satisfies the international accreditation requirements.
Mission Stmt - 2	Attract the right people and retain them by building an environment that foster work freedom and empowerment.
Muccion Stmt - 3	With the right talent pool, create knowledge and disseminate, get involved in collaborative research with reputed universities and produce competent graduates.

### 25. (b) Program Educational Objectives (PEO)

The Program Educational Objectives for the Electronics and Communication Engineering (with specialization in Instrumentation Engineering) program describe accomplishments that graduates are expected to attain within five years after graduation. Graduates within 5 years of graduation will / should demonstrate:

PEO – 1	<b>Expertise</b> using their mathematical and scientific knowledge to solve emerging real-world problems, design and <b>create</b> novel products and solutions related to Electronics and Instrumentation System Design, that are technically sound, economically feasible and socially acceptable.
PEO – 2	Broad knowledge to <b>establish</b> themselves as <b>creative</b> practicing professionals, locally and globally, in fields such as design, research, testing and manufacturing of Electronics and Instrumentation Systems.
PEO – 3	Communication skills (in both written and oral forms) and critical reasoning skills in bridging the divide between advanced
	technology and end users in the practice of Instrumentation Engineering.
PEO – 4	Sustained learning and adapting to a constantly changing field through graduate work, professional development, self-study and
PEO-4	collaborative activities.
PEO – 5	Leadership and initiative to ethically advance professional and organizational goals, facilitate the achievements of others, and
PEU - 3	obtain substantive results.
PEO - 6	Ability to work productively as individuals and in groups (teamwork) of diverse cultural and multidisciplinary backgrounds.

#### 25. (c) Mission of the Department to Program Educational Objectives (PEO) Mapping

	Mission Stmt 1	Mission Stmt 2	Mission Stmt 3
PEO - 1	L	M	Н
PEO - 2	Н	L	Н
PEO - 3	L	L	M
PEO - 4	M	L	M
PEO - 5	L	Н	Н
PEO - 3 PEO - 4 PEO - 5 PEO - 6	Н	Н	Н

H – High Correlation, M – Medium Correlation, L – Low Correlation

### 25. (d) Mapping Program Educational Objectives (PEO) to Program Learning Outcomes (PLO)

						Pro	gram Lear	ning Out	comes (P	LO)					
						iduate At	tributes (C	SA)					Prog Out	gram Spe comes (P	cific SO)
	Engineering Knowledge	Problem Analysis	Design & Development	Analysis, Design, Research	Modern Tool Usage	Society & Culture	Environment & Sustainability	Ethics	Individual & Team Work	Communication	Project Mgt. & Finance	Life Long Learning	PSO - 1	PSO - 2	PSO - 3
PEO - 1	Н		Н			Η	M	Н			Н		Н		Н
PEO - 2		Н	M	Н	М									Η	M
PEO - 3					L			M		Н			L	L	M
PEO - 4		·										Н	М		
PEO - 5						L			М						М
PEO - 6						М			Н						М

H – High Correlation, M – Medium Correlation, L – Low Correlation

#### **Program Specific Outcomes (PSO)**

Graduates of baccalaureate degree program in ECE with Specialization in Instrumentation Engineering must demonstrate the ability to

- PSO 1 Apply concepts of automatic control, including measurement, feedback and feedforward regulation for the operation of continuous and discrete systems.
- PSO 2 Understand and utilize programmable logic controllers (PLC), distributed control systems (DCS) and supervisory control systems for control of manufacturing and processing systems.
- PSO 3 Utilize modern and effective management skills for performing investigation, analysis, and synthesis in the implementation of automatic control systems.

## 25. (e) Program Structure for B.Tech in Electronics and Communication Engineering (with specialization in Instrumentation Engineering)

### **B. Tech in Electronics and Communication Engineering**

(with Specialization in Instrumentation Engineering)

2018 Regulations

**Engineering Science Courses (S)** 

Department of Electronics and Communication Engineering SRM Institute of Science and Technology SRM Nagar, Kattankulathur – 603203, Kancheepuram District, Tamilnadu

Course Code	18ECS201T	Course Name	С	ONTROL	SYSTEMS	Course Category	Professional Core	3	T 0	P 0	3
Pre-requis Courses		18MAB102T	Co-requisite Courses		18ECC104T	Progressive Courses	Nil				
Course Offe	ring Department	Ele	ctronics and Communication Engi	neering	Data Book / Codes/Standards		Nil				

	1																		
Course Learning Rationale (CLR): The purpose of learning this course is to:	Learning				Program Learning Outcomes (PLO)														
CLR-1: Learn about mathematical modeling techniques of mechanical and electrical systems	1	2	3		1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-2: Impart knowledge about the transient and steady state error and analysis											,							art	당
CLR-3: Identify and analyze stability of a system in time domain using root locus technique	=							된			pili d							eme	ear
CLR-4: Know about different frequency domain analytical techniques	(Bloom)	(%)	(%) t		ge		Ħ	sea			ina		Work		9		l_	Management	Reseal
CLR-5: Acquire the knowledge of a controller for specific applications	<u> </u>	Proficiency	Attainment		₩ W	"	Development	8	age	40	Sustainability				Finan	Б	onal		త
CLR-6: Impart knowledge on controller tuning methods	hinking	JĘ.	ain		ŝ	lysis	l le	ign	ΠS	Culture	∞		Team	e o	⊗ E	eaming	essi	roject	alyz
	擅				je j	Analysis		Design,	Tool	& Cu	nent		∞ర	icati	Mgt.		Profe	Pro les	Ang
Course Learning Outcomes (CLO): At the end of this course, learners will be able to:	Level of	Expected	Expected		Engineering Knowledge	Problem	Design &	Analysis,	Modern -	Society &	Environm	Ethics	Individual	Communication	Project N	Life Long	PSO-1: I	PSO – 2 Technio	PSO - 3:
CLO-1: Determine Transfer function of a system by mathematical modeling, block diagram reduction and signal flow graphs	1,2	80	80		Н	Н	-	-	-	-	-	-	-	-	-	-	Н	-	-
CLO-2: Identify the standard test inputs, time domain specifications and calculate steady state error	1,2	85	80		Н	Н	-	-	-	-	-	-	-	-	-	-	Н	-	-
CLO-3: Plot a root locus curve and analyze the system stability using Routh array	2,3	90	85	ĺ	Н	Н	-	-	-	-	-	-	-	-	-	-	Н	-	-
CLO-4: Analyze the frequency domain specifications from bode and polar plots			85		Н	Н	-	-	-	-	-	-	-	-	- 1	-	Н	-	-
O-5: Design a closed loop control system for specific application			80	ĺ	Н	Н	-	-	-	-	-	-	-	-	-	-	Н	-	-
-6: Identification of controller parameters and tuning			85	ĺ	Н	Н	-	-	-	-	-	-	-	-	- 1	-	Н	-	-

	ration nour)	9	9	9	9	9
	SLO-1	Open and closed loop control system	Standard test signals and their expression	Poles and zeros of a system	Frequency domain analysis	Controllers-Significance and Need
S-1	SLO-2	Feedback and Feed forward control systems	Type number and order of a system	Pole zero plot and concept of s plane	Frequency domain specifications	Stability of closed loop systems
S-2	SLO-1	Transfer function of a system and basis of Laplace transforms	Transfer function of First order system for Step and ramp signal	Proper, Strictly Proper and Improper systems	Frequency domain plots, minimum and non minimum phase systems	SISO and MIMO control systems
0-2	SLO-2	Need for mathematical modeling	Transfer function of First order system Impulse and parabolic signal	Characteristic equation	Correlation between time and frequency domain	Types of controllers-ON-OFF,P,I,D
S-3	SLO-1	Representation of mechanical translational systems using differential equation and	General transfer function of second order system	Concept of stability from pole zero location	Bode plot approach and stability analysis	Composite Controller-PI,PD and PID
	SLO-2	determination of transfer function	Identification of damping factor and classification based on it	Need for Stability analysis and available techniques  Rules for sketching bode plot		Controller parameters and tuning methods
S-4	SLO-1	Representation of mechanical rotational systems	Step response of critically damped second order system	Necessary and sufficient Condition for stability	Bode plot of typical systems	Design Specification, controller
0-4	SLO-2	and determination of transfer function	Step response of under damped second order system	Significance of Routh Hurwitz Technique	about plot of typical systems	configurations- ON-OFF controller
C E	SLO-1	Conversions of Mechanical system to Electrical system	Step response of over damped second order system	Computation of Routh array	Pada plat of tunical quatama	Design Specification, controller
S-5	SLO-2	f-V and f-I electrical analogies	Step response of undamped second order system	Routh array of stable systems		configurations-PID controller

S-6	SLO-1	Block diagram reduction rules and methodology	Time domain specifications and their significance	Routh array of Unstable systems	Polar plot and significance	Design of speed control system for DC motor
	SLO-2		Numerical solution Routh array of Unstable systems		Nyquist stability criterion	IIIOLOI
S-7	SLO-1	Evaluation of transfer function using block diagram	Transient and steady state error analysis	Root locus technique		Design of control system for Twin Rotor Multi input Multi output System(TRMS)
3-1	SLO-2	Iroduction		Rules for sketching root locus		with one degree of freedom
S-8	SLO-1	Signal flow graphs and evaluation of transfer	Static error constants and evaluation of	Root locus plot of typical systems	Polar plot of typical systems	Case study 1
3-0	SLO-2	function	steady state error	Root locus plot of typical systems	roiai piot di typicai systems	Case study 1
S-9	SLO-1	Dynamic error constants and evaluation of		Root locus plot of typical systems	Polar plot of typical systems	Case study 2
3-9	SLO-2	Block diagram to signal flow conversion	steady state error	Root locus plot of typical systems	Polar plot of typical systems	Case study 2

	3. Gopal.M, "Control System Principles and Design", 2nd Edition, TMH, 2002 4. Sivanandam and Deepa, "Control system Engineering using MATLAB", 2nd edition, Vikas publishers, 2007

Learning Ass	sessment					
	Bloom's		Continuous Learnir	ng Assessment (50% weightage)		Final Examination (50% weightage)
	Level of Thinking	CLA – 1 (10%)	CLA – 2 (15%)	CLA – 3 (15%)	CLA – 4 (10%)	
Level 1	Remember Understand	40%	30%	30%	30%	30%
Level 2	Apply Analyze	40%	40%	40%	40%	40%
Level 3	Evaluate Create	20%	30%	30%	30%	30%
	Total	100 %	100 %	100 %	100 %	100 %

<sup>#</sup> CLA – 4 can be from any combination of these: Assignments, Seminars, Tech Talks, Mini-Projects, Case-Studies, Self-Study, MOOCs, Certifications, Conf. Paper etc.,

Course Designers		
Experts from Industry	Experts from Higher Technical Institutions	Internal Experts
1. Mr. Anuj Kumar, Bombardier Transportation, Ahmedabad, kumaranuj.anii@gmail.com	1. Dr. Meenakshi, Professor of ECE, CEG, Anna University, meena68@annauniv.edu	Dr. T. Deepa, SRMIST
2. Mr. Hariharasudhan - Johnson Controls, Pune, hariharasudhan.v@jci.com	2. Dr. Venkatesan, Sr. Scientist, NIOT, Chennai, venkat@niot.res.in	Mrs. R. Bakhya Lakshmi, SRMIST

### **B. Tech in Electronics and Communication Engineering**

(with Specialization in Instrumentation Engineering)

2018 Regulations

Professional Core Courses (C)

Department of Electronics and Communication Engineering SRM Institute of Science and Technology SRM Nagar, Kattankulathur – 603203, Kancheepuram District, Tamilnadu

Course	19ECC1021 Cou	ırse	ELECTRONIC DEVICES	Course		Professional Core	L	Т	Р	С
Code	Nai	me	ELECTRONIC DEVICES	Category	C	Protessional Core	3	0	2	4

Pre-requisite Courses	18EES101J	Co-requisite Courses	Nil		Progressive Courses	18ECC201J, 18ECC202J, 18ECE203T, 18ECE303T, 18ECE321T, 18ECE322T
Course Offering	Department	Electronics and Communication Engine	ering	Data Book / Codes/Standards	Nil	

Course L	earning Rationale (CLR):	The purpose of learning this course is to:	L	earni	ng
CLR-1:	Provide a basis for understa	anding semiconductor material, how a pn junction is formed and its principle of operation	1	2	3
CLR-2:					
		ristics of several other types of diodes that are designed for specific applications

Course L	earning Rationale (CLR): The purpose of learning this course is to:	L	earnii	ng
CLR-1:	Introduce and Understand the need for modulation, various Amplitude modulators/demodulators, frequency modulators and demodulators	1	2	3
CLR-2:	Comprehend the radio transmitters and receivers using the modulators and demodulators and to analyze the noise performance	(-	(0	(
CLR-3:	To introduce basics of Digital modulation and detection techniques	(Bloom)	Proficiency (%)	(%):
CLR-4:	To analyze the pass band data transmission techniques in terms of probability of error	<u> </u>	5	Attainment
CLR-5:	To introduce basics of spread spectrum techniques and information theory concepts	l g	icie	≟
CLR-6:	Gain hands-on experience to put theoretical concepts learned in the course to practice.		of	ŧ
		_ È		
Course L	earning Outcomes (CLO): At the end of this course, learners will be able to:	Level of Thinking	Expected	Expected
CLO-1:	Understand the concepts of analog modulation and demodulation techniques	2	80	70
CLO-2:	Learn the function of radio transmitters and receivers and familiarize with noise performance of various receivers	2	85	75
CLO-3:	Understand various digital modulation schemes and matched filter receiver	2	75	70
CLO-4:	Understand and analyze various digital pass band data transmission schemes	2	85	80
CLO-5:	Inderstanding data transmission using spread spectrum and error coding techniques			75
CLO-6:	Analyze the operation of analog and digital communication systems and take measurement of various communication systems to compare experimental results in the laboratory with theoretical analysis	2	85	75

		15	15	15	15	15
	SLO-1	Introduction to HDL & Verilog HDL	General VLSI System Components: Multiplexers	Generic overview of the MOS device: MOS transistor symbols	CMOS Inverter Characteristics: Operation and properties of static CMOS inverter	Properties of basic materials used in microelectronics: Silicon, Silicon dioxide
S-1	SLO-2	Introduction to Verilog HDL, modules and ports	Decoders	MOS structure demonstrating (a) accumulation, (b) depletion, and (c) inversion; nMOS transistor demonstrating cutoff, linear, and saturation regions of operation	VTC of static CMOS inverter	Polysilicon and Silicon Nitride
S-2	SLO-1	Lexical Conventions: White Space and Comments, Operators	Comparators	MOS Transistor under Static Conditions: The threshold voltage	DC Inverter Calculations	Basic Processes in Integrated-Circuit Fabrication: Wafer Formation, Photolithography, Well and Channel Formation
	SLO-2	Numbers, Strings, Identifiers, System Names, and Keywords	priority encoder	Resistive operation	Symmetrical Inverter	Silicon Dioxide (SiO <sub>2</sub> ), Isolation, Gate Oxide
S-3	SLO-1	Verilog Data Types: Nets, Register Variables, Constants	shift and rotate operations	Saturation region	Inverter switching characteristics	Gate and Source/Drain Formations, Contacts and Metallization, Passivation, Metrology
J-J	SLO-2	Referencing Arrays of Nets or Regs	Adders: Standard adder cells	Current-voltage characteristics	Output capacitance	Some Recurring Process Steps: Diffusion and Ion Implantation, Deposition, Etching, Planarization
S-4, 5	SLO-1	Lab-0: Verilog Operators:		Lab-6: Realization of VLSI multipliers - I		

SLO-2 SLO-1 SLO-2	Verilog modelling: Gate-level modelling  Realization of Combinational and sequential circuits  Compilation and simulation of Verilog code  Test bench  Dataflow modelling  Realization of Combinational and	Ripple Carry Adder (RCA)  Carry Look-Ahead Adder (CLA)  Carry Select Adder (CSA)	Dynamic behavior: MOSFET Capacitances, viz., MOS structure capacitances Channel capacitance and Junction (or, depletion) capacitances Parasitic Resistances, viz., Drain and Source Resistance, Contact Resistance Non-ideal I-V effects: Mobility Degradation, Velocity Saturation Channel Length Modulation, Threshold	Inverter layout  Power-Delay Product: Static Power Consumption Dynamic Power Consumption, Total	Simplified CMOS Process flow  Layout design rules: Well rules, transistor rules Contact rules, metal rules, via rules and
SLO-1 SLO-2 SLO-1	sequential circuits Compilation and simulation of Verilog code Test bench Dataflow modelling	Carry Select Adder (CSL)  Carry Save Adder (CSA)	depletion) capacitances Parasitic Resistances, viz., Drain and Source Resistance, Contact Resistance Non-ideal I-V effects: Mobility Degradation, Velocity Saturation	Power-Delay Product: Static Power Consumption Dynamic Power Consumption, Total	transistor rules
SLO-1 SLO-2 SLO-1	code Test bench Dataflow modelling	Carry Save Adder (CSA)	Source Resistance, Contact Resistance  Non-ideal I-V effects: Mobility  Degradation, Velocity Saturation	Consumption Dynamic Power Consumption, Total	transistor rules
SLO-1	Dataflow modelling	Carry Save Adder (CSA)	Degradation, Velocity Saturation	Dynamic Power Consumption, Total	Contact rules metal rules via rules and
	Ü	Carry Skip Adder (CSK)	Channel Langth Modulation Throateld	Power Consumption, PDP	other rules
SLO-2	Realization of Combinational and	1	Voltage Effects	CMOS Circuit Design Styles: Static CMOS logic styles	Gate Layouts
	sequential circuits	Carry Bypass Adder (CBA)	Leakage, Temperature Dependence, Geometry Dependence, Subthreshold Current	CMOS circuits, pseudo-nMOS, tristate circuits, clocked CMOS circuits	Stick diagrams
	<b>Lab-1:</b> Realization of combinational and sequential circuits using gate-level and dataflow modeling	Lab-4: Realization of VLSI adders - I	Lab-7: Realization of VLSI multipliers - II	Lab-10: (a) Design and Analysis of complex CMOS gate using HSPICE (b) Design and Analysis of Pseudo-NMOS gates using HSPICE	Lab-13: Model Practical Examination
SLO-1	Behavioral modelling	Multipliers: Overview of multiplication (unsigned multiplication, shift/add multiplication algorithms, multiplication of signed numbers, types of multiplier architectures)	Short-channel MOSFETS: Hot carriers, Lightly-Doped Drain (LDD)	(DCVSL), Pass Transistor Logic (PTL)	CMOS Process Enhancements: Transistors (Multiple Threshold Voltages and Oxide Thicknesses, Silicon-on- Insulator, High-k Gate Dielectrics, Higher
SLO-2	Realization of Combinational and sequential circuits	Braun multiplier	MOSFET scaling	Dynamic CMOS logic styles: Basic dynamic logic	Mobility, Plastic Transistors,)
SLO-1	Switch-level modelling	Baugh-Wooley multiplier	Short-channel effects: Negative Bias Temperature Instability (NBTI), oxide breakdown	Signal integrity issues in dynamic design	Interconnects
SLO-2	Realization of MoS circuits		Drain-Induced Barrier Lowering (DIBL), Gate-Induced Drain Leakage (GIDL), Gate Tunnel Current	Signal integrity issues in dynamic design	Circuit elements
SLO-1	Design using FSM	Booth multiplier	Tutorials	Domino Logic Circuits: Differential Domino logic, multiple-output domino	Beyond conventional CMOS
SLO-2	Realization of sequential circuits	Booth multiplier	Tutorials	Compound domino, NORA, TSPC	Tutorials
SLO-1		Lab-5: Realization of VLSI adders - II	Lab-8: Realization of RAM & ROM		Lab-14: End-Semester Practical Examination

Course	Course	PROCESS DYNAMICS AND CONTROL	Course	Drefessional Flastive	L T	P C
Code	18ECE281J Name	PROCESS DYNAMICS AND CONTROL	Category <sup></sup>	Professional Elective	2 0	2 3

Pre-requisite Nil	Co-requisite Courses	Nil	Progressive Courses
Course Offering Department	Electronics and Communication Engineeri	ing Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR): The purpose of learning this course is to:	L	Learning			Program Learning Outcomes (PLO)													
CLR-1: Impart fundamental knowledge on the dynamics and mathematical modeling of various processes	1	2	3		1	2	3	4	5	6	7	8	9	10	11	12	13 14	15
2: Introduce the effect of various control actions and the tuning techniques of controllers.											γ.						ms for	ent
CLR-3: Impart knowledge on final control elements	(Bloom)	ncy (%)	t (%)		_			arch			piii						e a co	nanagement
R-4: Get exposed different types of advanced control schemes			Attainment		age		ent	Resea			ain		Work		92		e syst	anaç
R-5: Explore the computer as controller in digital control system.					S Ne	S	elopment	Š.	Usage	ø	Sustainability		E		Finance	g .	aric o iscret PLC	S E
CLR-6: Identify the different type of control schemes used in process industries and paraphrase their importance	Thinking	Proficie	∖tta		Ž	Analysis	Ne l	Design,	ns	Culture	∞ర		Team	ion	∞ర	earning	disa Per	ctive
		cted F			E I	Ä	& Deve	9	Tool	ರ %	nen		∞	ical	Mgt.		ARS ARS	f sv Effer
Course Learning Outcomes (CLO): At the end of this course, learners will be able to:	Level of	Expecte	Expected		Engineering Knowledge	Problem	Design 8	Analysis,	Modern	Society 8	Environment	Ethics	Individual	Communication	Project N	Life Long	continuo PSO-2: (	control o PSO-3: E skills
CLO-1: Analyze and mathematically model the process systems	3	80	75		Ч	Н	М	Н	Н	-	-	Н	Н	-	Н	Н	M L	L
CLO-2: Select and optimize the tuning of a controller	3	80	70		Ч	Н	Н	Н	Н	-	-	Н	Н	-	Н	Н	H L	L
CLO-3: Demonstrate the working and application of different type of actuators and control valves	3	75	70		Ч	Н	Н	Н	Н	-	-	Н	Н	-	Н	Н	H M	L
CLO-4: Understand and analyze the various advanced control schemes	3	80	75		Ч	Н	Н	Н	Н	-	-	Н	Н	-	Н	Н	H M	Н
-5: Design suitable digital controllers for the process			70		4	Н	Н	М	Н	-	-	Н	Н	-	Н	Н	Н Н	Н
CLO-6: Recommend the right choice of control schemes for the application	3	80	70		4	Н	М	Н	Н	-	-	Н	Н	-	Н	Н	M H	Н

	ration	Process Dynamics	Control Action and Tuning of controllers	Final Control Elements	Advanced Control Schemes	Digital Control System
(r	nour)	12	12	12	12	12
S-1	SLO-1	Need for process control	Basic control actions	I/P converter	Feedback and Feed-forward control	Introduction to state space ,Basic building blocks of computer control system
3-1	SLO-2	The process control loop	Characteristics of ON- OFF controllers	P/I converter	Application of feed forward control in various processing units	Data loggers
S-2	SLO-1	Need for process modeling	Characteristics of Single speed floating controllers	Pneumatic actuators	Split-range control	Data acquisition systems
3-2	SLO-2	Servo and Regulatory operation	P+I, P+D and P+I+D control modes	Electric actuators	Application of cascade control in various processing units	Supervisory control , SCADA, Direct digital control
S 3-4	SLO-1 SLO-2	Lab1: Identify the components of the process control loop.	Lab 4: Design the on-off, P,PI and PID controller for the Pressure Process	Lab 7: Determine the characteristics of I/P and P/I converter	Lab10: Tune the PID Controller for mathematically described process using ZN method	Lab13:Determine the state model for the mechanical system using MATLAB
S-5	SLO-1	Continuous and batch processes	Practical forms of PID controller	Control Valves	Inferential control	Review of z transforms
3-3	SLO-2	Self-regulation, Degrees of freedom	Auto/manual transfer, Reset windup	Characteristic of Control Valves:- Inherent characteristics	Ratio control	Digital PID , Position and velocity form
S-6	SLO-1	Mathematical model of level, flow processes	Evaluation criteria- Quarter Decay Ratio, IAE, ISE and ITAE	Installed characteristics	Cascade control.	Implementation of digital controllers
3-0	SLO-2	Interacting and non interacting systems	Selection of Time Integral performance Criteria	Modeling of control valves and types	Fuzzy controllers	Design of Deadbeat controller, Dahlin's controller
S 7-8	SLO-1 SLO-2	Lab 2 : Determine the characteristics of interacting system	Lab 5: Design the on-off control, P,Pl and PID controller for the flow Process	Lab 8: Determine the characteristics of Pneumatically Actuated Control Valve	Lab11: Tune the PID Controller for mathematically described process using ZN open loop method	Lab14:Design the Deadbeat algorithm for the given system using MATLAB

	SLO-1	Laws and assumptions governing gas process	Tuning – Process reaction curve method	Valve Positioner and its importance	Adantiva controllars	Multi-loop multivariable control , Introduction
S-9	SLU-Z	Mathematical models of pressure processes	Z-N open loop tuning techniques	Control valve sizing	Model predictive control	Interaction between control loops
S-10	SLO-1	Laws and assumptions governing thermal process	Continuous cycling method	Cavitation and flashing	Smith predictor control scheme	The Relative Gain Array (RGA)
3-10	SLO-2	Mathematical models of thermal processes	Damped oscillation method	Selection criteria	Internal model control (IMC) ,P& I diagram	Decoupling of control loops
S 11-12		Lab3: Determine the characteristics of non interacting system	controller for the level Process	Pneumatically Actuated Control Valve (with	and cascade control system lising	Case study : Design of computerized multi loop controller

Course Offering I	Department	Electronics and Communication Engineering	g Data Book / Codes/Standards	Nil

Course Learning Rationale (CLR): The purpose of learning this course is to:	L	earni	ng		Program Learning Outcomes (PLO)													
LR-1: Give basic knowledge in intelligent building and building automation systems				1	1	2	3	4	5	6	7	8	9	10	11	12	13 14	1 15
CLR-2: Gain Knowledge on different sensors and measurement systems in BMS system	<u>_</u>	(6	~								>-						for for	ent
CLR-3: Know the basic concepts of HVAC Air handling unit	(Bloom)	(%) /	t (%)					arch			pilit							agem
CLR-4: Understand the basic concepts of HVAC terminal unit	<u> </u>	ncy	en		dge		ent	Se			aj.		Work		9		control	inaç
CLR-5: Explore the BAS Architecture			Attainment		wle	S	Development	ı, Re	Usage	Φ	Sustainability		E		Finance	ng	ic or	Su e
CLR-6: Present an overview of different communication protocols		Proficie	∖tta		Ϋ́	Analysis	velc	Design,	ns	Culture	∞ర		Team	ion	∞ŏ	arning	matic discre	ctive
	f Thinking	D D	_		ring	Ans	& De	, De	T00	ತ ನ	nen		య	ical	Mgt.	Ψ.	Auto Lus& Utiliz	f sv
Course Learning Outcomes (CLO): At the end of this course, learners will be able to:	Level of	Expected	Expected		Engineering Knowledge	Problem	Design &	Analysis,	Modern	Society &	Environment	Ethics	Individual	Communication	Project N	Life Long	PSO 1: /	control o PSO-3: I skills
CLO-1: Understand the need of intelligent buildings and automation systems		80	75		Н		-		-	Н	Н	-	-	-	-	Н	H H	H H
CLO-2: Measure the parameters and design of sensors		80	70		Н		-		-	Н	Н		-	-	Н	Н	- N	1 H
CLO-3: Design different Air handling units	3	75	70		Н	Н	М	Н	М	Н	Μ	Н	-	-	Н	Н	H N	1 H
CLO-4: Understand and design terminal units	3	80	75		Н	Н	М	Н	М	-	М	Н	Н	-	-	Н	- N	1 H
CLO-5: Familiarize with the components of BAS architecture	3	80	70		Н	-	М	-	Н	-	М	Н	-	-	-	Н	- N	1 H
: Select the communication protocol for a particular application		80	70		Н	-	-	-	-	Н	-	Н	-	Н	М	Н	Н -	· H

	ration	Introduction to Building automation systems	Comfort parameters	HVAC Basic Concepts- Air handling unit	Terminal Unit	BAS Architecture
(f	nour)	9	9	9	9	9
S-1	SLO-1	Introduction to intelligent building	Temperature	Concedi of Air nangling unii	Concept of Variable Air Volume (VAV) system	BAS Hierarchy
	SLO-2	intelligent architecture	Enthalpy, Entropy	components in AHU	different types of VAV	Field level components
S-2	SLO-1	structure	Heat Transfer - Conduction, Convection, Radiation	different types of dampers	Design, working	Direct Digital Control (DDC)
3-2	SLO-2	Facility management vs. intelligent buildings	Working Principle, Characteristics of RTD	Working, configuration,	series fan powered	Supervisory Controller
S-3	SL0-1	Lifecycle of building	Thermistor, Thermocouple	different types of AHU	parallel fan powered	Server, Operator Workstation (OWS)
3-3	SLO-2	Evolution of intelligent buildings	Bimetallic strip	Design and working	pressure dependent	Different communication protocol
0.4	SL0-1	Introduction to BAS	Humidity, Specific Humidity,	Operation of different modes in AHU	supply-exhaust VAV	addressing concepts
S-4	SLO-2	Different systems of BAS	Relative Humidity, Due point, Saturation point	humidification	dual duct VAV	Open Protocols -BACnet, LON
S-5	SLO-1	HVAC	Working principle of relative humidity sensors	dehumidification	Design, working, use of radiation coil	Profibus, Modbus
3-3	SLO-2	HVAC Applications	mounting for humidity sensors in BAS	static pressure control	chilled beam	M-bus

	SLO-1	Security system	Psychrometric chart	volume matching	CRAC unit, VRV systems	Proprietary Protocols- N2, CBUS		
S-6	SLO-2	Field Devices	Pressure, Static Pressure, Velocity pressure, Absolute Pressure	cooling, heating,	unit heater, Fan coil unit and unit ventilator	Wireless filed devices		
S-7	SLO-1	Fire alarm system	Gauge Pressure, Vacuum Pressure, Differential Pressure, Sealed Pressure	economizer mode	Chilled water system	controllers		
3-1	SLO-2	Types of Detectors	Working Principle of Different types of Pressure Sensors		Concept of refrigeration cycle, components used in refrigeration cycle	routers		
S-8	SLO-1	Modules	Working of principle of different air flow sensors	plate heat exchanger	different types of chilled water system	coordinators		
3-0	SLO-2	Indicating Devices	Working of principle of different water flow sensors	Ι ηρατ τρουματι μίηρρι	Working and design of different types of boilers	Benefits of a Wireless BAS		
S-9	SLO-1	lighting systems	Measurement of CO2 level	AHU for different applications	Working and design of different types of	Wireless Field Bus		
3-9	SLO-2	lighting systems	Working principal of BTU meter	ино тог интегент аррисаціонs	heat exchanger	Basic Reference Model (BRM)

Course I	Learning Rationale (CLR): The purpose of learning this course is to:	L	earnii	na					Prog	ıram L	_earni	ina Oı	utcom	es (P	LO)				
	Provide a basis for understanding comisonductor material, how a poliunation is formed and its principle of	1	2	3	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
CLR-2:	Describe the basic structure, operation and characteristics of transistors BJTs and FETs, and discuss their use as a switch and an amplifier																ment	ţ	
CLR-3:	Learn the basics of op-amp: the principle, operation, characteristics and fundamentally important circuits							Ę			lity						evel	men	arch
CLR-4:	Describe and analyze the basic operation of sinusoidal oscillators and use a 555 Timer in an oscillator application.	(Bloom)	cy (%)	nt (%)	edge		nent	Research	o o		Sustainability		Work		Finance		al Achievem	Management	& Research
CLR-5:	Learn the fundamentals of analog and digital communication, networking, radio transmission and mobile telephones	Thinking (	Proficiency	Attainment (%)	Engineering Knowledge	Analysis	Development	esign,	Tool Usage	Culture	∞ర		Team	Sommunication	∞	ife Long Leaming	Professional	Project Mes	Analyze
CLR-6:	Encourage the learner to assemble and test real circuits in the laboratory				eri ng	۱An	∞ర		Po	ంగ	Environment		al &	nice	Project Mgt.	lg L		2: P	3: A
		el of	Expected	Expected	inee	Problem	Design	Analysis,	Modern	Society	iron	S	ndividual	mu	ect	Lor	<u> </u>	' .≅	- 1
Course I	Learning Outcomes (CLO): At the end of this course, learners will be able to:	- Fe	Ä	Ä	E)	Pro	Des	Ana	ĕ	Š	E	Ethics	Indi	S	Pro	Life	PSO.	PSO Tech	PSO
CLO-1:	Understand the operation, characteristics, parameters and specifications of semiconductor diodes and demonstrate its important applications	1	80	70	L	L	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-2:	Review the transistor (BJT & FET) construction, operation, characteristics and parameters, as well as its application in amplification and switching.	1	80	70	L	L	-	-	-	-		-		-		-	-	-	-
CLO-3:	Identify different configurations of op-amp analyze the parameters of op-amp and observe the frequency response of operational-amplifier.	1	80	70	L	L	-	-	-	-	,	-		-		-	-	-	-
CLO-4:	Understand & demonstrate different applications based on operational-amplifier and special linear ICs	1	80	70	L	L	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-5:	Understand the basic concepts and techniques of telecommunication systems and networks	1	80	70	L	L	-	-	-	-	-	-	-	-	-	-	-	-	-
CLO-6:	Understand how circuit behavior can be studied with a computer, using a circuit simulation software	2	90	80	-	-	Н	-	Н	-	-	-	-	L	-	M	L		-

Learning 2 3

	earning Rationale (CLR): The purpose of learning this course is to:  Analyze the basic laws and theorems of light associated with the optical fiber communication and the classification of											
CLR-1:	ptical fibers											
CLR-2:	Address concepts related to transmission characteristics such as attenuation and dispersion.											
CLR-3:	Explore the fundamentals of optoelectronics display devices, Sources and Detectors											
CLR-4:	Gain to information on Optical modulators and amplifiers											
CLR-5:	Illustrate the integration methods available for optoelectronic circuits and devices											
CLR-6:	Utilize the basic optical concepts applied in various engineering problems and identify appropriate solutions											

	optical libers					1

	ration nour)	Learning Unit / Module 1 Basic python programming	Learning Unit / Module 2 Programming interrupts –Motor control, switches and keyboard interface	Learning Unit / Module 3 Sensor interface and programming	Learning Unit / Module 4 Temperature sensor and display interface programming	Learning Unit / Module 5 Publishing sensor data on web service
		12	12	12	12	12
	SLO-1	Python Basics- Editing Python Programs with IDLE, Variables, displaying Output, Reading User Input, Arithmetic, Creating Strings	Programming with Interrupts	Detecting Movement-PIR sensor	Measuring Temperature Using a Digital Sensor	publish sensor data on web service- building a home security dash board
S-1	SLO-2	Concatenating (Joining) Strings, Converting Numbers to Strings, Converting Strings to Numbers ,Find the Length of a String, Find the Position of One String Inside Another, Extracting Part of a String, Replacing One String of Characters with Another Inside a String ,Converting a String to Upper- or Lowercase	Programming with Interrupts	Data sheet analysis of PIR sensor	Data sheet analysis Digital Temperature Sensor	publish sensor data on web service- building a home security dash board
	SLO-1	Running Commands Conditionally, Comparing Values, Logical Operators,	Controlling GPIO Outputs Using a Web Interface	Adding GPS to the Raspberry Pi	Measuring Distance-ultrasonic rangefinder	MQTT Protocol
S-2	SLO-2	Repeating Instructions an Exact Number of Times ,Repeating Instructions Until Some Condition Changes , Breaking Out of a Loop, Defining a Function in Python	Controlling GPIO Outputs Using a Web Interface	Data sheet analysis of GPS	Data sheet analysis ultrasonic rangefinder	MQTT Protocol- installation and setting account ,token creation ,reading sensor data and pushing to thingsboard

S-3-4	SLO-1	Lab 1: Arithmetic and string	Lab 7: Programming on interrupts	Lab 13: Programming on PIR sensor	Lab 19: Programming on Digital Temperature Sensor	Lab 25: Publish sensor data on web service
3-3-4	SLO-2	Lab 2: Loop	Lab 8: Programming on Web Interface	Lab 14: Programming on GPS	Lab 20: Programming on ultrasonic rangefinder	Lab 26: Publish sensor data on web service
S-5	SLO-1	Creating a List , Accessing Elements of a List, Find the Length of a List , Adding Elements to a List , Removing Elements from a List,	Controlling Servo Motors using PWM	Using Resistive Sensors	Logging to a USB Flash Drive	basic of java scripts –node.js
3-3	SLO-2	Creating a List by Parsing a String, Iterating over a List, Enumerating a List, Sorting a List, Cutting Up a List. Applying a Function to a List	Controlling the Speed of a DC Motor	Measuring Light	Logging to a USB Flash Drive	Modules-HTML module
S-6	SLO-1	Creating a Dictionary ,Accessing a Dictionary, Removing Things from a Dictionary,	Controlling the Direction of a DC Motor	Detecting Methane	Using a Four-Digit LED Display	Modules –file –event
	SLO-2	Iterating over Dictionaries	Using a Unipolar Stepper Motor	Data sheet analysis of gas sensor	Displaying Messages on an I2C LED matrix with data sheet discussion	Modules –file –event
S-7-8		Lab 3: Program on list	Lab 9: Programming on Stepper Motor	Lab 15: Programming on light sensor	Lab 21: Programming on Four-Digit LED Display	Lab 27: Programming on node js HTML module
3-1-0		Lab 4: Program on Dictionary	Lab 10: Programming on DC Motor	Lab 16: Programming on Gas sensor	Lab 22: Programming on I2C LED matrix	Lab 28: Programming on node js file and event module
S-9	SLO-1	Controlling Hardware-Connecting an LED- Controlling the Brightness of an LED		Measuring a Voltage using MCP3008 And data sheet of MCP3008	Displaying Messages on an Alphanumeric LCD	LED blinking using node.js
3-9	SLO-2	a Buzzing Sound	Building a Simple Robot Rover	Using Resistive Sensors with an ADC	Displaying Messages on an Alphanumeric LCD	LED blinking using node.js
S-10	SI ()-1	Switching a High-Power DC Device Using a Transistor	Digital Inputs-Connecting a Push Switch- Toggling with a Push Switch-Using a Two- Position Toggle or Slide Switch	Measuring Temperature with an ADC	Cloud service for IOT	building java script client using MQTT broker
	SLO-2	Switching a High-Power Device Using a Relay	Using a Rotary (Quadrature) Encoder and Using a Keypad	Measuring Acceleration and data sheet discussion of Acceleration sensor	Cloud service for IOT	building java script client using MQTT broker
S-11,	SLO-1	Lab 5: LED blinking and Brightness control	Lab 11: Programming on Switch	Lab 17: Programming on ADC	Lab 23: Programming on an Alphanumeric LCD	Lab 29: Programming on LED blinking using node.js
12		Lab 6: Switching a High-Power DC Device		Lab 18: Programming on Measuring Acceleration	Lab 24: Programming on an Alphanumeric LCD	Lab 30: Building java script client using MQTT broker

3-3	SLO-2	Importance of Sampling system in chemical Industries and Safety aspects	Working of Silica Analyzer	Thermal compartment, Detection system, Recording system	Single beam and double beam instruments	Mass Spectrometers, Basic working and Importance
S-4	SLO-1	PH Measurement, Principle of PH measurement & Importance of PH measurement in Industries	Moisture measurement Importance of Moisture measurement	Liquid chromatography-Principles, types and applications	IR spectrophotometers Instruments of IR	Components of Mass Spectrometers
3-4	SLO-2	Types of Electrodes, Reference Electrodes and types	Types of Moisture measurement	High pressure liquid chromatography	Types of IR Components required for three types of IR	Types of Mass spectrometers Magnetic Sector analyzer, Double focusing spectrometers
S-5	SLO-1	Secondary Electrodes and Types	Oxygen analyzer Methods of oxygen analyzers and importance	Instrumentation or basic component of HPLC	Instruments of dispersive instrument , IR Radiation Sources and types	Time of flight analyzers, Quadrupole Mass analyzers

	SLO-2	Indicator electrodes	Paramagnetic oxygen analyzer Electro analytical method	Solvent reservoir and its treatment system	Importance of Monochromators and types of Monochromators	Application of mass spectrophotometers
		pH meters direct reading type pH meter null detector type pH meter	CO monitor,Importance of measuring CO	Pumping system, Types of working systems and Importance	Samples And Sample Cells detectors	nuclear radiation detectors, importance of measurement
S-6	SLO-2	ion selective electrodes Types of ion selective electrodes Glass membrane electrodes Liquid membrane electrodes Solid membrane Electrodes	Types of CO monitor	Pulse dampers	FTIR spectrometers, Main components Advantages, disadvantages	GM counter
S-7	SLO-1	Biosensors Features of Biosensor Block diagram of bio sensor	NO2 analyzer, Importance of NO <sub>2</sub> measurement	Sample injection system and types	Types of sources Selection factors	Working setup, advantages of GM Counter
	SLO-2	Applications of Biosensors in industries	Types of NO <sub>2</sub> measurement	Liquid chromatographic column working , Types of Column thermostats	Types of detectors Selection factors	proportional counter, Basic Principle
S-8	SLO-1	conductivity meters ,Importance in Chemical Industries	H <sub>2</sub> S analyzer, Importance of H <sub>2</sub> S Measurement	Detection system types	atomic absorption spectrophotometer instruments for atomic absorption spectroscopy	Working setup, advantages of GM Counter
	SLO-2	Types of Conductivity meters	Types of H₂S measurement	Types of Recording system	radiation source chopper	solid state detectors, Basic Principle
	SLO-1	Air pollution Monitoring Instruments	Dust and smoke measurement- dust measurement and Importance Types of dust measurement	Application of HPLC, Advantages of HPLC over gas chromatography	production of atomic vapor by flame, Parts by flame photometer Emission system	Working setup, advantages of Solid state detectors
S-9	SLO-2	Estimation of Air pollution	Thermal analyzer , Importance of Thermal analyzers, Types of Thermal analyzer	Detectors types, Factors Influencing the Selection of Detectors	Monochromators And types, Types of Detectors and recording systems and their selection criteria	scintillation counter, Basic principle

3

Course Lea	rning Rationale (CLR):	The purpose of learning this course is to:					
CLR-1:	Gain knowledge on classification	, and characteristics of transducers					
CLR-2:	Acquire the knowledge of different types of inductive and capacitive sensors						
CLR-3:	Acquire the knowledge of different types of thermal and radiation sensors						
CLR-4:	Acquire the knowledge of differen	nt types of magnetic sensors					
CLR-5:	Acquire the knowledgeof differen	t types of sensors measuring non-Electrical quantity					
CLR-6:	Locate the Applications of senso	ors in industries and home appliances					

CLR-2:	Acquire the knowledge of differer	t types of inductive and capacitive sensors	_	_	_				
CLR-3:	Acquire the knowledge of differen	t types of thermal and radiation sensors	(Bloom)	(%)	(%)				
CLR-4:	Acquire the knowledge of differen	t types of magnetic sensors	) (B	ncy	ent				
CLR-5:	Acquire the knowledgeof differen	types of sensors measuring non-Electrical quantity	king	Proficiency	Attainment				
CLR-6:	Locate the Applications of senso	rs in industries and home appliances	of Thinking	Expected Pro	Expected Atta				
Course Lea	Course Learning Outcomes (CLO):  At the end of this course, learners will be able to:								
CLO-1:	To demonstrate the various types	2,3	80	80					
CLO-2:	Understand the inductive and cap parameters.	pacitive sensors which are used for measuring various	1,2	80	80				
CLO-3:	Understand the thermal and radia	ation sensors	1	80	80				
CLO-4:	Have an adequate knowledge on	the various magnetic sensors	3	80	80				
CLO-5:	To demonstrate the various types	3	80	80					
CLO-6:	Select the right transducer for the	elect the right transducer for the given application
