Message from the Editor

Dear Comrades,

In our Skole, the leisure is spraying sweet tiny wisdom drops from SOC clouds. Oh! I forget! Skole in Greek means school and leisure means School of life.

But Gods are always taking pity on mankind; they most of the times step along with us before our footsteps to show the way and create a footpath, so that where to lay our footsteps over the grains of life will be made clear for us;

Harnessing the power of contemplation to free ourselves from the dissembling fog of social media, our own work culture and ethics in education make our heads held high this time too! We know getting information is easier than ever to come across now-a-days. It has been claimed that Generative AI will eventually remove most of the works that humans have to do to receive answers, as a part of human's intellectual life culture.

We, the proud department of NWC, collects, incorporates, innovates, buildings, shares, exports the data to the young minds in a collaborative way. We started like a breeze but be a storm in every industry, educational sector, organization and will definitely prove ourselves in terms of productization and definitely will make profound impact on every sector of society. All we do is only for the betterment of the human community through knowledge, service and innovation. PalM2, Chat GPT, Google-Bard, Open AI are working on large language models as we can also be a part in the process to develop data repositories, and contribute to LLMs, which can be a trained model to bring transformations in to everybody's life.

We inculcate morals along with knowledge to our students, absorbs the traits of them and we trust the achievements of our faculty under SOC, will definitely bring significant laurels to our organization.

**The data flow in Internet in 2023 is 120 Zettabytes –
Attention AI – A Platform for CRM**

Stay Tuned. Your feedback is the driving force behind our activities.

Dr.B.Amutha

About the Department

Department of Information Technology, SRM University, Kattankulathur, was started in the year 1998. The primary purpose of the department is to foster the students specializing in various areas of information technology. In 2021, Department of Information Technology re-structured into Department of Networking and Communications under School of Computing intend to meet the expectations of the aspiring students and add more value to the degrees offered. The department inculcates entrepreneurial skills in budding aspirants to pitch their innovative ideas through SRM Innovation and Incubation Center. Our International and Alumni connect helps in bridging the gap between the trio: Academics - Industry - Research.

Vision

To Nurture as globally recognizable department in imparting the students high quality education and providing high confidence, unique knowledge and research experience in the field of networking, cyber security, forensics, information technology, cognitive computing and internet of things.

Mission

- ❖ To provide world-class IT professionals with appropriate industry and research-based curriculum.
- ❖ To train the students, that leads to entrepreneurship and develop societal need-based industries.
- ❖ To nourish the students as socially responsible professionals by providing them training in personality development, ethics, and leadership program"

Message from HOD Desk

"Content makes poor men rich; discontent makes rich men poor"

- Benjamin Franklin

You feel content when you are satisfied and happy. The real richness in life is to be content.

Why do you need to be content?

Contentment is the sense of satisfaction with what you already have. It helps you to distinguish between the needs and wants. It allows you to cherish the happiness in the present with smaller things rather than running towards materialistic life. It results in a meaningful life of peace making you healthier and stronger to face any and everything.

How would one achieve content in life?

By being true to oneself, practicing gratitude and being optimistic with the attitude of living in the present and learning from the past instead of dwelling helps to achieve contentment.

Be content with what you have, never with what you are. Accept yourself and work on yourself to be a better being with each passing day. Define your own success and not by other's measures.

Dr. ANNAPURANI PANAIYAPPAN.K,

Professor & Head

*Department of Networking and Communications,
School of Computing*

SPECIALIZATION HIGHLIGHTS

CYBERSECURITY

- ❖ DSCI (Data Security Council of India) Award Winner in 2022 for Excellence in Cyber Security Education.
- ❖ Special Labs with K7 Computing for Malware Analysis and CDAC Thiruvananthapuram for Cyber Forensics.
- ❖ Special elective courses in support of Redhat Linux and Checkpoint.
- ❖ Students' chapters in ISACA (Information Systems Audit and Control Association) and OWASP (Open Web Application Security Project).
- ❖ In Collaboration with EC Council providing CEH (Certified Ethical Hacker) training and certification courses.
- ❖ Students are in the progress of Developing SOC (Security Operation Centre) to support the small business in Cyber Security.

INFORMATION TECHNOLOGY

- ❖ MOU signed by Frugal Lab Bangalore, for monitoring crop growth with respect to soil moisture, temperature, humidity, rainfall, and crop growth installed in SRM centre for Agriculture Sciences.
- ❖ New course is introduced as per industry standard (Essential in Cloud DevOps) to upskill the student.
- ❖ MOU signed with service now to upskill the faculties and students with the latest technologies in ITSM (IT Service Management).
- ❖ MOU signed with Wise Work Company for a unique Intensive MetaVerse with full-stack development and advanced data science.
- ❖ Inviting companies for the placement along with a career centre to place students in Marquee, super dream, and dream companies.
- ❖ MOU signed with EPAM to train our faculties and vice versa, Students in the field of front - end development, Selenium, Full stack development, JAVA, and Python.

COMPUTER NETWORKS

- ❖ CISCO Networking Academy are training students for certification in Networking specialization courses like CCNA since 2006.
- ❖ Networking and Communications lab in collaboration with CISCO.
- ❖ Netsim lab facility established to explore and experience modern technologies in networking.
- ❖ Initiative to establish Center of Excellence - Art of lab to be set in collaboration with CISCO.
- ❖ Supporting student placements in core companies through internship opportunities.

SPECIALIZATION HIGHLIGHTS

INTERNET OF THINGS

- ❖ Through Internships Opportunities Cell (IoC) a team of 5 students and 6 faculties member have successfully bagged Research opportunity at the New Castle University through the virtual SAP Programme.
- ❖ We feel glad to specify our new arrival AIoT SERBOT with LIDAR: AI and IoT Convergence training equipment based on the Indoor Service Robot Platform in our IoC IoT Laboratory.
- ❖ IoT Alliance Club nurtured by the SRM IoT CoE, Coordinated currently by Dr.Kayalvizhi Jayavel and Ms. M.Safa received Rs. 2,00,000.00/- Funding From AICTE SPICES Scheme.
- ❖ We conducted the 6 days FDP on "Emerging trends in IoT" sponsored by Ministry of Electronics and Information Technology (MIETY) in collaboration with NIT Warangal.
- ❖ Based on MoU, 10 Research collaboration Projects have been signed with Professors from LaTrobe Australia Prof Pham, Prof Doan and Prof.Jabeb initiated by IoT Centre of Excellence.
- ❖ Launched IoTAlliance - Electrical Division, now taken care of by EEE Department supported by IoTAlliance SCO division.
- ❖ Pranav Prashob from IoT Specialization of 2023 passing out batch had bagged an offer from CommVault (SDE Role) of 31 Lakhs per Annum.
- ❖ Our IoT Student Renu Jadhav got an international internship opportunity at Harvard Medical School, Boston through our University Collaboration for the project Bioprinting technologies for tissue fabrication and to develop computer-aided design.
- ❖ IET (The Institution of Engineering Technology): The IET Scholarship Award 2022 as first Runner Up in recognition of Outstanding achievement in engineering and technology bagged by our 3rd year IoT Student for higher studies.

CLOUD COMPUTING

- ❖ Industry connect courses with AWS solution architect (UG) and Advanced AWS services (PG) jointly with Virtusa.
- ❖ Industry collaboration - Virtusa-powered MTech Cloud computing for internships and training courses.
- ❖ All cloud computing students are trained with the AWS academy cloud foundation course.
- ❖ Our Student team CIRRUS has won third prize in SDG Internal Hackathon with a cash prize of Rs.20000.
- ❖ Award name: Harvard Project for Asian and International Relations - Impact Challenge Level: International Rank: 1.
- ❖ Won First prize World of augmented and Virtual Reality WAVE EXPO 2022 Held by ACM-W Chennai Chapter.
- ❖ 3rd Prize AI + Data in Healthcare category of AIHacks4Good 2022.
- ❖ SRM Institute of Science and Technology as Team Pen Pals has participated in the Prod-A-Vista: A Product Case Competition of Divergence 2.0 - 168 Hours of Horizon organized by the Indian Institute of Management (IIM), Raipur.

FACULTY ACHIEVEMENTS

**Dr.L.ANAND,**

Associate Professor,
Department of Networking and Communications, School of Computing
ISRO-IIRS Awardee 2022
Institute Co-ordinator/ AICTE INTERNSHIP
Nodal Officer : ISRO - IIRS

University Nodal Officer from Our Department has Conducted a Outreach courses in collaboration with IIRS-ISRO-Dehradun as follows

S.No	Course Name	Date	Duration	Type	Domain	Co-ordinators
1	Advances in Remote Sensing Techniques for Geological Applications	March 13 - 24, 2023	2 weeks	Course	Geosciences	Dr.R.S.Chatterje
2	Application of SAR Data for land deformation studies	March 30, 2023	1 Day	Workshop	Disaster Management	Dr.ArijitRoy
3	SAR Data Processing & its Application with Special Emphasis on RISAT-1A / EOS	April 10 - 14, 2023	1 week	Course	Advances In Remote Sensing	Dr.AnilKumar / Mr.AshishJoshi
4	Overview of Free and Open Source Software for Geospatial (FOSS4G)	April 24 - 28, 2023	1 week	Course	Advances in GIS	Dr.SameerSaran / Mr.PrasunGupta
5	Geospatial Technology for Archaeological studies	May 08 - 12, 2023	1 week	Course	Archeological studies	Mrs.ShefaliAgrawal / Dr.Poonam S.Tiwari
6	Application of Geomatics in Urban Disasters	May 24, 2023	1 Day	Workshop	Urban Studies	Dr.SandeepMaithani/ Dr. Kshama Gupta
7	Applications of Machine learning in urban studies	June 05 - 09, 2023	1 week	Course	Urban Studies	Dr.SandeepMaithan / Dr.SurendraKumar

FACULTY ACHIEVEMENTS**Dr.L.ANAND**

Associate Professor from Our Department has successfully completed his **Post Doc** from **South Ural State University, Russia** on the Project Titled "**Breast Cancer Classification and Location Detection**". He has worked in the **Big Data and Machine Learning lab** at South Ural State University, Chelyabinsk, Russia from 01 June 2022 to 31 May 2023 developed a model for "**Breast cancer classification and Detection**" for Russian.

Name : Dr.L.ANAND

Event : National Award

Date : 27.03.2023

Place : ISRO-IIRS - Dehradun.

Name : Dr.L.ANAND

Event : Conducted State level Placement

Date : 31.03.2023

Place : TamilNadu Skill Development Corporation.

Name : Dr.TYJ NAGA MALLESWARI

Event : SATU Joint Research Scheme

Title : Drought assessment using a hybrid deep learning model

Date : 10.05.2023

FACULTY ACHIEVEMENTS

Name : Dr.ARUN.A

Event : Career Preparatory Orientation On Cyber Security

Date : 19.04.2023

Place : Velammal Bodhi Campus School, Kolapakkam, Chennai.

Name : Dr.C.N.S.VINOTH KUMAR

Event : Attended faculty enrichment Programme

Date : 25.05.2023

Place : School of Computing Faculty attended Faculty Enrichment Program @ LTIMindtree, Neville Block.

Name : Dr.S.USHASUKHANYA

Event : Postdoctoral fellowship confirmation

Date : 10.05.2023

Place : Athabasca University, Alberta, Canada.

WELCOME TO OUR FAMILY

*Warmest welcome from the Department.
You're a great addition to this team and
we can't wait to reach new heights
together.*

Dr.Lakshmi Dhevi

FACULTY ACHIEVEMENTS

Congratulations, doctors, on your success

"Perseverance is one key that has landed you in such a remarkable position of attaining your PhD degree"

Dr.K.Meenakshi

Dr.G.Saranya

Dr.G.Geetha

Dr.G.Sujatha

**SAIRAJ BALAJI**

RA2211030010035 - II Year - 3rd Sem

CSE with Cyber Security specialization

Department of Networking and Communications

SAIRAJ BALAJI, an 18-year-old college student pursuing a degree in Computer Sciences Engineering from SRM Chennai, presently residing in Jammu.

He has recently introduced a groundbreaking social media application called Anonympin. This innovative platform has quickly gained traction and popularity among generation Z, as it allows users to drop anonymous notes at specific geographical locations and engage in anonymous conversations.

A finalist in the prestigious Google Code to Learn competition 2019 he also had the privilege of taking part in NASA's CIS program 2020. He was awarded the prestigious DELL and FUEL scholarships, recognizing his outstanding contributions and potential as a young technologist and entrepreneur.

g of Health Deptt

deliveries in such areas and stressed upon the BMOs to review the cases of maternal and infant deaths so that reasons of the deaths are known.

She also directed BMOs of Trehgam, Tangdhar, Zochaldara and Vilgam to intensify RBSEK screening on priority basis in their respective medical blocks so that all Anganwadi children are screened under RBSEK.

While reviewing NCD Coverage, NCJAS, LaQshya, Anaemia Mukth Bharat and DMI 5.0, DC directed CMO Kupwara to make a road map for these important programmes and submit a weekly report on the progress achieved under these aspirational indicators.

She stressed upon all BMOs to check attendance of the staff regularly. She also asked the Medical Officers to make extra efforts to strengthen the health institutions; they are heading and directed them to ensure smooth functioning of all men and machinery available at their disposal.

18-year-old college student Sairaj Balaji launches Anonympin Social Media application

■ TNN BUREAU

JAMMU: Sairaj Balaji, an alumnus of Army Public School is an 18-year-old college student pursuing a degree in Computer Sciences Engineering from SRM Chennai, presently residing in Jammu. He has recently introduced a groundbreaking social media application called Anonympin. This innovative platform has quickly gained traction and popularity among Generation Z, as it allows users to drop Anonymous notes at specific geographical locations and engage in anonymous conversations.

A finalist in the prestigious Google Code to Learn competition 2019 he also had the privilege of taking part in NASA's CIS program 2020. He was awarded the prestigious DELL and FUEL scholarships, recognizing his outstanding contributions and potential as a young technologist and entrepreneur. His name was shortlisted and published in the highly prestigious and esteemed Institute of Electrical and Electronics Engineers (IEEE) international journal in May 2021, a veritable acknowledgment of his expertise in the field of technology by the distinguished peer group. In addition to his individual accomplishments, Sairaj Balaji's entrepreneurial journey includes the founding of Avtaar AI Private Limited, an AI avatar startup that has gained recognition and support from Microsoft for Startups. Avtaar AI has recently been valued at 2.4 million USD by by Kartup highlighting the significant growth and potential of the company. Anonympin, Sairaj Balaji's latest creation, has captured the attention of Generation Z, and started a fresh buzz in providing a platform for anonymous note-sharing and conversations at a specific locations. By fostering a safe and judgment-free environment, Anonympin enables users to express themselves freely and engage in open dialogue and banter, revolutionizing the way individuals interact on social media platforms. For media inquiries, interviews, or further information, please contact: sai.balajit@avtaar.ai Note to editors: High-resolution images and additional details about Sairaj Balaji, Anonympin, and avtaar.ai are available upon request.

SEMESTER ABROAD PROGRAM**SEMESTER ABROAD PROGRAM EXPERIENCE AT EPITA FRANCE****VIKRAM R R**

RA2011030010047

IV Year B.Tech - CSE specialization in Cyber Security

Hi am Vikram, pursued my sixth semester abroad in Paris has been an unforgettable and transformative experience. From the moment I set foot in this enchanting city, I was captivated by its rich history, breathtaking architecture, and vibrant culture. Embracing the Parisian way of life, I wandered along the Seine, explored hidden alleys, and discovered charming cafes. Engaging with locals and fellow international students broadened my perspective, fostering valuable cross-cultural connections.

Academically, I thrived in an intellectually stimulating environment, immersing myself in French literature, art, and language. My university, EPITA provided unique opportunities to visit iconic landmarks, museums, and attend thought-provoking lectures. Beyond academics, I cherished weekends spent traveling to picturesque regions like Provence and Normandy.

This semester abroad in Paris has not only enriched my understanding of a new culture but also taught me valuable life skills like adaptability and independence. As I bid farewell to this incredible city, I carry cherished memories, newfound friendships, and a profound appreciation for the world's diversity. Paris will forever hold a special place in my heart, igniting a lifelong passion for exploration and intercultural experiences.

***Hearty Congratulations***

IV YEAR B.TECH CSE (IOT)

Unlocking the Power of Quantum Computing

Quantum computing, an emerging field of computer science, holds tremendous promise for revolutionizing the way we process information. Unlike classical computers that use bits to represent data, quantum computers leverage quantum bits, or qubits, which can exist in multiple states simultaneously. This unique property, known as superposition, enables quantum computers to perform complex calculations exponentially faster than their classical counterparts. In this article, we will explore the fundamental concepts of quantum computing and discuss its potential implications.

The Power of Quantum Bits:

At the heart of quantum computing are qubits, which are the building blocks of quantum information. Unlike classical bits, which can only represent either a 0 or a 1, qubits can represent 0, 1, or both simultaneously due to superposition. This superposition allows quantum computers to perform parallel computations, dramatically speeding up certain types of calculations. Furthermore, qubits can be entangled, meaning the state of one qubit is intrinsically connected to the state of another, regardless of the distance between them. This property enables quantum computers to perform highly complex operations and solve problems that are computationally infeasible for classical computers.

Potential Applications:

Quantum computing has the potential to revolutionize various fields and solve problems that are currently beyond the capabilities of classical computers. One of the most notable areas of impact is cryptography. Quantum computers can break many of the encryption algorithms used today, making traditional cryptographic systems vulnerable. However, quantum cryptography, which utilizes the principles of quantum mechanics for secure communication, offers a potential solution.

Challenges and Future Outlook:

While the potential of quantum computing is immense, there are several challenges that need to be overcome. Building stable and scalable qubits that are resistant to errors is a significant hurdle. Quantum systems are extremely sensitive to environmental disturbances, leading to errors known as decoherence. Researchers are actively working on developing error-correcting codes and improving qubit stability to mitigate these challenges. Looking ahead, the future of quantum computing is promising. Researchers are making remarkable progress in developing more stable qubits and refining quantum algorithms. As the field continues to advance, we can expect quantum computers to become more powerful and accessible, unlocking new opportunities in fields ranging from optimization and cryptography to drug discovery and artificial intelligence.

In conclusion, quantum computing represents a paradigm shift in computation, offering the potential for exponential speedups and breakthroughs in problem-solving. While there are still technical challenges to overcome, the future possibilities of quantum computing are truly exciting, and its impact on various industries could be transformative. As researchers continue to push the boundaries of this field, we eagerly await the dawn of the quantum era.

IV YEAR B.TECH CSE (IOT)

Zero Trust Architecture:

Zero Trust Architecture is a security framework that operates on the principle of "never trust, always verify." Unlike traditional security models that assume trust once a user or device is inside the network perimeter, Zero Trust treats every access request as potentially untrusted. It requires continuous authentication, authorization, and verification for all users, devices, and applications, regardless of their location or network.

Emphasizing Zero Trust Architecture: Reinforcing Cybersecurity Defences

In today's digital landscape, where cyber threats are becoming increasingly sophisticated and prevalent, traditional network security models are proving inadequate. The need for a more robust and proactive approach to cybersecurity has led to the rise of Zero Trust Architecture (ZTA). This article explores the concept of Zero Trust, its fundamental principles, and its growing importance in securing digital systems and data. Understanding boundaries. In essence, Zero Trust operates on the assumption that no user or device should be inherently trusted, and security measures should be implemented at every level.

Key Principles of Zero Trust Architecture:

Micro-segmentation: Zero Trust Architecture involves breaking down the network into smaller, segmented areas to minimize the impact of a potential breach. Each segment is secured, and access is restricted based on the principle of least privilege. By dividing the network into granular segments, organizations can contain and isolate potential threats, preventing lateral movement within the network.

Continuous Authentication: Zero Trust emphasizes continuous authentication and authorization of users and devices, ensuring that access is granted only to authenticated entities and that their privileges are always verified. This approach reduces the risk of unauthorized access, even after initial authentication, by constantly evaluating and monitoring user behavior, and context.

Least Privilege: Zero Trust follows the principle of least privilege, granting users and devices only the minimum access necessary to perform their tasks. Each access request is evaluated and authorized based on defined policies and the specific requirements of the user or device. By limiting access privileges, organizations can mitigate the potential impact of compromised credentials and unauthorized activities.

In an era of increasingly sophisticated cyber threats, Zero Trust Architecture provides a proactive and comprehensive security framework. By treating every access request as potentially untrusted, organizations can significantly strengthen their cybersecurity defenses. The principles of micro-segmentation, continuous authentication, and least privilege form the foundation of Zero Trust, enabling organizations to reduce the attack surface, improve compliance, and adapt to evolving security challenges.

ALUMNI MESSAGE**CHETAN PAREEK**

B.Tech - IT specialization (2019 - 2023)

Unveiling the Journey: A Tale of Dreams, Adaptation, and Triumph Introduction:

During my four years at SRM University, I had the opportunity to embark on a remarkable adventure. Despite spending only 11 months on campus due to internships and the impact of the pandemic, those months proved to be incredibly fruitful. It was during this time that my passion for a dynamic work environment at high-growth startups was ignited. The experiences I had at SRM University taught me the value of ambition, adaptability, and an insatiable hunger for technological exploration. Sharing my journey, filled with learning, growth, and the pursuit of new horizons. Within Gen-Y (a club I joined in 1st yr), I was fortunate to meet Atif Bhaliya, an extraordinary JavaScript wizard and my domain lead. Witnessing his expertise and passion, I was captivated by the world of backend engineering. The allure of understanding how scalable systems and diverse services collaborate behind the scenes ignited a spark within me.

The arrival of the COVID-19 pandemic in March 2020 turned our lives upside down. Amidst the chaos, I saw a unique chance to dive deep into backend engineering. Without the burden of assignments, classes and exams, I devoted myself to learning how to build fault-tolerant systems and explored the intricate jargon of computer science. This transformative period lasted for two years, during which I participated and won a few hackathons, including the famous and renowned Razorpay FTX 2021, where my team (Swarnabha, Ram, Atimabh and Raghav) emerged as champions.

As my knowledge expanded, I realized that MNCs are not a place where I want to be. I wanted to witness how technology empowers scaling businesses and revenues and make a real impact on people's lives. Joining a high-growth startup became my new aspiration, a place where I could upskill and contribute to building products that people love. I understood that these extraordinary opportunities lie beyond the confines of campus life. Equipped with an outstanding resume and valuable work experience from multiple startups during college, I stood out from the crowd. This advantage enabled me to bypass the initial screening stages, ultimately securing an internship at Betterhalf.ai. Through dedication and hard work over six months, I not only excelled but also earned a promotion to a full-time engineer. Now, I am firmly positioned in a dynamic, high-growth work environment, ready to make my mark.

Reflecting on my incredible journey, I am grateful for my time at SRM University, which proved to be a launching pad for my dreams. The COVID-19 pandemic, while challenging, became a catalyst for exploring backend engineering and redefining my career aspirations. Fueled by an unwavering desire to witness the transformative power of technology, I am now poised to leave a lasting impact in the world of startups. Armed with invaluable lessons, the support of mentors, and an unwavering determination, I step into the next chapter of my life, eager to forge a path of excellence and make a difference in the realm of technology.

ACTIVITY CORNER**DO YOU KNOW !!!**A white rectangular speed limit sign with a black border. The text "SPEED LIMIT" is in a bold, sans-serif font, and the number "40" is in a larger, bold, sans-serif font below it.**"Forty"**

is the only number that is spelt with letters arranged in alphabetical order

If you shuffle a deck of cards properly,

it is more than likely that the exact order of the cards you get has never been seen before in the whole history of the universe.

**Get back that tab you accidentally closed.**

If you want to get back a tab you closed, just press "Control" plus "Shift," plus "T," (Ctrl+shift+T), and voila! it will reappear.

ACTIVITY CORNER**DO YOU KNOW !!!****Easily repeat your last command in Excel.**

If you press the F4 button in Excel it repeats the last command.

**In Google Chrome,**

if you press "S" while you right click on an image it will do a reverse Google search.

(i.e you will be able to see where that photo is and where it originated from.)

Some YouTube Video tricks

- If you press "K," this will play (or pause) the video every time.
- Hitting the "J" key will cause you to go backward 10 seconds while hitting the "L" key will make you go forward 10 seconds.
- Press M to mute the video.
- Hit F for fullscreen.

**Clear your cache in seconds.**

If you press the F4 button in Excel it repeats the last command.

Lock your computer in seconds

On a Windows machine, hit "Windows," plus "L" to lock your computer.

Turn your browser window into a simple text editor.

If you want to bring up a basic text editor you can type in, just type **data:text/html**, into your browser and you're done. (It only works in chrome)

for microsoft edge add :

data:text/html,<html contenteditable>

ACTIVITY CORNER**PUZZLES****Across**

4. a job; work that needs doing
6. to point out or show
8. a call to compete or to special effort;
10. not physical; a concept like time or justice
12. a mechanical device or group of moving parts.
Also, a method for making something work
14. the conditions in which people or other species live-- everything around them
15. a promise that something will work (or else will be replaced at no extra charge)
17. the parts of something (also, the most basic parts substances can be broken into using chemistry.)
20. the quality of being clear or easy to understand
21. the product (or information) produced
23. the total of things added together
24. groups of related things
25. a period of ten years
26. to choose

Down

1. information provided to start a process (often the data put into a machine)
2. the surroundings that make a word or situation understandable
3. a meeting to discuss a problem or issue
5. a plan of action to reach a goal
6. connected actions and responses between two people or groups
7. a set of related connections
8. extremely important
9. an answer or reaction to someone else's words or actions
11. casual remarks or talk
13. undependable
16. depending on and trusting someone or something
18. a form of sound recording
19. the opposite of hidden; something easy to see or understand
22. help

ALUMINI TALK

Cracking the first Interview on 13.04.2023

Conveners and Co-Conveners:

Dr. A. Rathinam, Dr.K.Venkatesh, Dr.K.Nimala,
Dr.J.Godwin Ponsam

Speaker:

Mr.Avinash R.Maharaj
Software Engineer Customer,
Arista Networks-USA

The session started at 6 PM with the introduction of the speaker by Dr.J. Godwin. Mr. Avinash R Maharaj started his talk about with each job interview, you meet new people, you brand yourself and sell yourself. To survive through the process, you need to display your skills and stay upbeat and enthusiastic through it all, no matter how long it takes! This can be a challenge, especially when you are interviewing for a job you would love to get hired for. He answered the queries asked by the attendees. It was a very informative session to the junior students. The talk was ended with a vote of thanks by Dr. K. Venkatesh.

Tips and Tricks for Career Guidance on 20.04.2023

Conveners and Co-Conveners:

Dr.A.Rathinam, Dr.K.Venkatesh, Dr.K.Nimala, Dr.J.Godwin Ponsam

Speaker:

Mr.Gokul Ashok.N
Team Lead-Senior ABAP Developer, LTIMINDTREE, DLF CYBERCITY, Chennai.

The session started at 11 AM with the introduction of the speaker by Dr.K. Venkatesh, Mr. Gokul Ashok and Mr. Sri Vignesh started their talk about the career which is helpful to think of career advice like feedback. You can read some pieces of advice and confirm what you do well and what you should continue to develop. They answered the queries asked by the attendees. It was a very informative session to the junior students. The talk was ended with a vote of thanks by Dr. K. Nimala.
