Tissue Engineering and Cancer Research Laboratory

Book Chapters

- Abinaya Shanmugavadivu, Krishnaraj Lavanya and Selvamurugan N. (2023) Nanomaterials in bone tissue engineering. In: Handbook of Nanomaterials, Volume 2, Elsevier Publisher, DOI: https://doi.org/10.1016/B978-0-323-95513-3.00013-7
- Sidharthan D.S., Abhinandan R., Adithya S.P., Balagangadharan K., Selvamurugan N. (2021) Chitosan and Its Potential Use for the Delivery of Bioactive Molecules in Bone Tissue Engineering. In: Jayakumar R., Prabaharan M. (eds) Chitosan for Biomaterials IV. Advances in Polymer Science, vol 288. Springer, Cham. https://doi.org/10.1007/12_2021_99
- Balagangadharan, K., Harsha Rao, S., Pranav Kumar Shadamarshan, R., Harini, B., and Selvamurugan, N. (2019). Composites containing marine biomaterials for bone tissue repair, Biomimetics: Marine Structures for tissue engineering, Science Publishers/CRC Press, 357-382.
- Vijichandran, S., Sanjay, V., and Selvamurugan, N. (2019). Alginates: Versatile Polymers in Biomedical Applications and Therapeutics. Alginate-based scaffolds in bone tissue engineering applications, Apple Academic press, 255.
- Dhivya, S., and Selvamurugan, N. (2016). Handbook of Composites from Renewable Materials; Volume No. #5: Biodegradable Materials; Chapter # 16: Biocomposite Scaffolds Derived from Renewable Resources for Bone Tissue Repair. Publisher: Wiley-Scrivener.
- Saravanan, S., Mohita,T., Moorthi,A. and Selvamurugan, N. (2013). Biocomposites containing chitosan for bone tissue engineering. Marine Biomaterials, CRC press, 27,529-540.
- Selvamurugan, N. (2012). The molecular and biochemical basis of an organism. Biology for engineers, Tata McGrew-Hill press, 2, 53-87.
- Shimizu, E., Selvamurugan, N., Westendorf, J. J. and Partridge, N. C. (2007). Parathyroid hormone regulates histone deacetylases in osteoblasts. Annals of the New York Academy of Sciences, 1116, pp. 349-353. Impact factor: 4.375
- Boumah, C. E., Selvamurugan, N. and Partridge, N. C. (2005).Transcription in the osteoblast: Regulatory mechanisms utilized by parathyroid hormone and transforming growth factor-beta. Progress in Nucleic Acid Research and Molecular Biology , 80, pp. 287-321. Impact factor: 4.143
- D'Alonzo, R.C., Selvamurugan, N., Krane, S. M. and Partridge, N. C. (2002). Bone proteinases: principles of bone biology. Academic press, 1, 251-264.
