Workshop on Survey Methodology

Overview

This workshop provides information on designing a survey questionnaire and discusses the statistical methods related to validity, reliability, and diagnostic power in questionnaire design. The workshop also covers creating surveys, collecting, managing, and uploading data to storage facilities in real-time while addressing conventional challenges associated with remote data collection.

Following topics will be covered during the course.

- Questionnaire designing
- Validity
- Methods to assess the validity
- Reliability
- Methods to test the reliability
- Item Analysis
- Diagnostic power
- Data collection using Kobo Toolbox

Course Date

22nd April 2024 – 26th April 2024

Participant Fee

1500 INR/Person

Co-ordinator

Dr. M. Bagavandas (Head)

Course Instructors

Mr. Raghul Gandhi

Mr. K. R. Aravinth

Ms. A. S. Jothishmathi

No of Participants: 16
