**For Registration**

# WORLD SPACE WEEK - 2024

OCTOBER 4 - 10

## About the Program:

World Space Week consists of space education and outreach events held by space agencies, aerospace companies, schools, planetariums, museums, and astronomy clubs worldwide in a common timeframe. It provides unique leverage in space outreach and education, Educates people worldwide about the benefits they receive from space, Encourages greater use of space for sustainable economic development, Demonstrates public support for space programs, and Excites young people about science, technology, engineering, and math. Every year, World Space Week is celebrated under a different theme to highlight an aspect of space with a broad appeal to humanity and inspire the next generation. This year's theme is "Space & Climate Change". In this regard, "SRM-World Space Week 2024" will be celebrated with thousands of participants in over 90 countries. Eminent professors and scientists from the space science field have been invited for the expert lectures. Additionally, many events and competitions will be conducted for the engineering and school students as follows.

## For Engineering students:

### Theme: Space and Climate Change / Any space-related topic

- Guest lectures
- CAD design competition - A model worksheet will be provided. (Any CAD Software)
- Space Quiz
- Essay writing competition (Online Submission).
- Painting Competition (Online Submission). (Hand/Digital painting)
- Water Rocket Workshop & Competition  
(Free Registration. All required Materials will be provided)
- RC Plane Workshop & Competition - (Spot Registration: Rs. 100 / Participant)  
(All required Materials will be provided )

The event schedule and link will be shared with the registered participants. The winners will receive trophies & certificates. All participants will receive participation certificates.
