1. Vision Statement	
Stmt - 1	To attain a globally recognized position in the field of legal education, practice and research
Stmt - 2	To create a unique learning experience in legal education that are of international standards
Stmt - 3	To.....

2. Mission Statement	
Stmt - 1	To create, construct, disseminate knowledge and help learners to acquire professional skills and practices in the legal profession
Stmt - 2	To cultivate a research mindset and conduct research on facts, concepts, principles, theories and laws in legal education and legal practice
Stmt - 3	To produce law professionals who possess intellectual genius, moral consciousness, honor values, maintain integrity, honesty and social responsibility to ensure Rule of Law in the Constitution of India
Stmt - 4	To maintain the highest Quality standards in professional knowledge dissemination, research and in behavior
Stmt - 5	To....

3. Program Education Objectives (PEO)	
PEO - 1	To equip students with a strong foundation in the field of Corporate Law, including its principles and practices, to excel in their professional careers.
PEO - 2	To develop the ability to critically analyze complex legal issues related to corporate governance, mergers and acquisitions, and financial regulations
PEO - 3	To instill a passion for continuous learning and adaptability in the ever-evolving field of Corporate Law
PEO - 4	To prepare students to gain recognition and excel as legal professionals in law firms, corporate legal departments, or as legal advisors to contribute to corporate growth and compliance.
PEO - 5	To inspire students to engage in legal practices that promote ethical conduct, corporate social responsibility, and the rule of law.

4. Consistency of PEO's with Mission of the Department					
	Mission Stmt. - 1	Mission Stmt. - 2	Mission Stmt. - 3	Mission Stmt. - 4	Mission Stmt. - 5
PEO - 1	H	H	H	M	M
PEO - 2	H	H	H	M	M
PEO - 3	H	H	H	M	M
PEO - 4	M	M	M	H	H
PEO - 5	M	M	M	H	H

H – High Correlation, M – Medium Correlation, L – Low Correlation

5. Consistency of PEO's with Program Learning Outcomes (PLO)

Title & Content	INTRODUCTION	GLOBALIZATION AND FREE MARKET	CONCEPT OF JUSTICE IN GLOBALISING WORLD	GLOBALIZATION AND CULTURAL IMPACT	GLOBALIZATION AND CONFLICT RESOLUTION
Duration (hour)	18	18	18	18	18
SLO-1	Examine what globalization means and forces behind globalization Explore about the scope and significance of globalization	Examine the concept of globalization and free market, Elucidate the historical context of globalization and its relationship with free market principles	Analyze the difficulties and intricacies of attaining justice in a worldwide world, the influence of universal values on creating ideas of justice, and how justice is changing in response to globalization.	Comprehend the concept of globalization and its influence on culture.	Identify the foundational concepts of globalization and its impact on conflicts worldwide
SLO-2	Examine how globalization has affected culture Case studies illustrating globalization's effects on society	Extrapolate the fundamental principles and characteristics of free market economics Analyze the impact of globalization on the expansion of free market ideologies	Examine the tension between cultural relativism and universalism in the context of justice.	Examine the tensions between cultural homogenization and cultural diversity in a globalizing world.	Analyze the causes and characteristics of international conflicts in a globalized world
SLO-3	Examine International governance frameworks, the mechanics of power in a worldwide society. Subnational government versus national sovereignty Case studies of globalization's political effects.	Analyze possible approaches for preserving or modifying the welfare state in response to globalization.	Analyze the concepts of fairness, equality, and solidarity within the framework of global justice, and the difficulties associated with implementing principles of justice across international boundaries.	Gain a comprehensive understanding of the impact of globalization on cultural heritage places, traditions, and behaviors.	Explore the role of diplomatic negotiations, mediation, and arbitration in resolving disputes
SLO-4	Tutorial: Comparative analysis of trade and globalization, focusing on foreign direct investment (FDI) and multinational corporations (MNCs).	Tutorial: Discuss comprehensive understanding of different methods to balance welfare state, free market and global economy	Tutorial: Engage in an in-depth discussion on principles of justice and equity and its evolution in the modern times	Tutorial: Analyze the international laws and principles in preserving culture	Tutorial: Examine the legal frameworks governing, exploring key treaties, agreements, and legal principles.
SLO-5	Practice: Analyze case studies in different countries post globalization	Practice: Examine methods to address legal issues in free market	Practice: Examine the methods of handling crisis in global justice	Practice: Evaluate the cases in which globalization deteriorated culture and revitalization measures	Practice: Analyze strategies for addressing grievances, promoting reconciliation, and building inclusive societies

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

Title & Content	INTRODUCTION	GLOBALIZATION AND FREE MARKET	CONCEPT OF JUSTICE IN GLOBALISING WORLD	GLOBALIZATION AND CULTURAL IMPACT	GLOBALIZATION AND CONFLICT RESOLUTION
SLO-6	Practice: Engage in discussion on landmark cases illustrating the interpretation and application of laws in globalized world order	Practice: Explore special provisions related to international trade laws and other legislations to secure a global welfare state	Practice: Explore the various methods to in which universal principles influenced laws in nations	Practice: case studies on cultural appropriation and its impact on cultural heritage preservation	Practice: Examine and compare different strategies for promoting media literacy and constructive dialogue to support conflict resolution efforts
SLO-7	Elucidate the meaning and application of international law. Transnational legal framework examples Opportunities and challenges associated with global law	Examine the utilization and administration of natural resources in a worldwide economy.	Gain an understanding of the ethical responsibilities of individuals and societies within a cosmopolitan perspective, as well as the conflicts that arise between cosmopolitan principles and national interests.	Examine the influence of Western hegemony in the global media on cultural diversity.	Examine the legal frameworks governing international taxation, focusing on bilateral and multilateral agreements that shape cross-border taxation policies.
SLO-8	Discuss the idea of state sovereignty, Globalization and sovereignty: issues for national security in a globalized world	Examine the socioeconomic consequences of relocation resulting from development projects., the ethical factors associated with the displacement of people for the purpose of development and alternate strategies for development that give priority to social justice and human rights.	Examine impact of globalization on the judicial process and legal systems and challenges of regulating transnational activities and enforcing global justice	Examine the impact of migration and transnationalism on cultural identities and behaviors.	Explore the role of media in exacerbating and mitigate conflicts through framing, propaganda, and peace journalism
SLO-9	Analyze the notions of Federalism and Globalization Decentralization and globalization Globalization's effects on democratic processes	Evaluate potential policy interventions to reduce economic inequality and promote social cohesion	Gain an understanding on diverse perspectives and arguments on issues such as economic inequality, human rights abuses, and environmental degradation	Analyze how globalization affects indigenous peoples' rights, languages, and cultural practices	Analyze the contributions of organizations such as the United Nations, NATO, and regional bodies to global peacekeeping efforts
SLO-10	Tutorial: Conduct in-depth discussions on fundamental principles of transnational laws and their applications.	Tutorial: Discuss the social welfare laws intended to prevent social and economic disparity caused by globalization	Tutorial: Discuss the international judicial process	Tutorial – Discuss the power dynamics involved in cultural resistance and negotiation in a globalized world	Tutorial –Discuss the role of peacekeeping missions and interventions in resolving international conflicts
SLO-11	Practice: Conduct a workshop on essential concepts and provisions related to transnational laws and its binding effects	Practice: explore the ways in which globalization and free market policies contribute to economic inequality.	Practice: Explore the ways in which one nations act can impact another nation and the recourse available	Practice: Analyze case studies to assess the impact of globalization in indigenous community	Practice: Analyze double taxation scenarios, applying the principles of Double Taxation Avoidance Agreements (DTAA) to resolve issues and ensure fair tax treatment.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-12	Practice: Explain and discuss essential laws that serves as foundation for globalization	Practice: Analyze case studies involving loss of livelihood due to development and alternate measures taken.	Practice: Explore case studies on cross- border legal disputes and their implications for the administration of justice	Practice: Engage in developing various legal approaches to preserve indigenous culture and traditional knowledge and practices.	Practice: Analyze case studies illustrating successful and unsuccessful peacekeeping efforts
SLO-13	Explain international trade law frameworks Discuss dispute resolution mechanisms in trade law Analyze the impact of globalization on trade liberalization	Examine the rise of consumer culture in a globalized society and analyze the influence of consumerism on individual conduct and societal principles.	Acquire knowledge related to the role of international human rights law and institutions in promoting global justice	Comprehend the strategies for promoting gender equality and cultural diversity in a globalized society	Analyze the importance of multilateralism in addressing global conflicts
SLO-14	Analyze the impact of legislative changes on individuals and businesses.	Examine the influence of free market principles on cultural trends and practices, emphasize the significance of safeguarding cultural diversity in an interconnected society, and explore methods for fostering cultural plurality and facilitating intercultural interaction.	Gain an understanding of the concept of environmental justice within the framework of globalization.	Comprehend the challenges of cultural governance in balancing economic, social, and cultural priorities	Analyze how climate change exacerbates existing conflicts and contributes to new security challenges
SLO-15	comprehend the main ideas that have been discussed thus far. Talk about recent occurrences pertaining to globalization. Examine how globalization has affected current concerns.	Comprehend role of civil society and grassroots movements in advocating for global regulation Elucidate the tensions between national sovereignty and global governance in a freemarket economy.	Comprehend the obstacles encountered by women and individuals who identify as gender minorities in obtaining legal recourse on a global scale.	examine the concept of soft power and its influence on global cultural dynamics	Examine the impact of technology on conflict dynamics, including cyber warfare, surveillance, and information warfare
SLO-16	Tutorial: Provide an overview of international legislation in the era of globalization	Tutorial: Explain case scenarios and simulate issues related to tensions between sovereigns and diplomatic ideals	Tutorial: Analyze case scenarios involving global justice.	Tutorial: Gain an understanding of the practical insights into the ethical considerations and challenges of cultural diplomacy in a globalized world	Tutorial: Analyze contemporary challenges in international regulations through real-world case studies, exploring solutions and best practices.
SLO-17	Practice: Evaluate participants' ability to navigate complexities in determining cases involving multiple sovereigns	Practice: Evaluate case studies to identify legal solutions for conflicts between sovereigns	Practice: Engage in debates and critical discussions on controversial global justice topics	Practice: Discuss emerging trends and debates in the field of cultural globalization	Practice: Identify the importance of sustained engagement and advocacy for promoting global peace and security
SLO-18	Practice: Enhance participants' critical thinking and problem-solving skills in addressing complex transnational issues	Practice: Assign and analyze case studies involving problems that require multinational intervention	Practice: Examine penalties and offenses of states that impacts another	Practice: Analyze case studies presenting real-world best practices and innovative approaches to cultural-legal policy and management	Practice: Engage in discussion on scenario analysis, and presentations on future trends in global conflicts

Course Offering Department	School of Law	Pre-requisite Courses	Company Law	Co-requisite Courses	SEBI Regulation	Progressive Courses	Nil	Data Book / Codes/Standards	
----------------------------	---------------	-----------------------	-------------	----------------------	-----------------	---------------------	-----	-----------------------------	--

Title & Content	INTRODUCTION TO COMPANY LAW	KINDS OF BUSINESS ENTITIES	FORMATION OF COMPANIES	ADMINISTRATION OF COMPANY	CORPORATE GOVERNANCE AND SOCIAL RESPONSIBILITY
Duration (hour)	18	18	18	18	18
SLO-1	Develop a foundational understanding of nature and meaning of a company.	Attain a comprehensive understanding of the meaning, definition, and various types of the key characteristics of a partnership.	Critically analyze and examine the importance of promoters in the formation of a company	Critically analyze the meaning and role of directors.	Identify key milestones and regulatory developments shaping corporate governance in the country.
SLO-2	Examine the difference between companies, partnerships, and corporations.	Develop expertise in the concept of limited liability in an LLP.	Analyze the legal position of promoters	Explain the concept of key managerial personnel, and promoters in a company.	Compare and contrast corporate governance frameworks in different countries.
SLO-3	Learners will explore legal considerations in the implementation of instruction pipelining, focusing on regulatory compliance and potential legal challenges.	Assess integrity constraints and normalization techniques, identifying dependencies and eliminating redundancy in database schemas.	Examine application layer protocols including DNS, SMTP, POP, FTP, and HTTP, and their respective roles in network communication and data exchange.	Explore communication and web technologies, unraveling their evolution, functionalities, and impact on cyberspace architecture.	Explore the concept of digital devices, security, covering endpoint devices, mobile phones, and associated security measures.
SLO-4	Tutorial: Conducting a legal analysis of a hypothetical cyber security scenario involving ALU, data-path, and control unit components.	Tutorial – Design an ER model for a given dataset, identifying entities, relationships, and attributes.	Tutorial –Conduct an analyses t explore TCP/IP fundamentals, including TCP, UDP, and sockets, through interactive demonstrations and hands-on exercises.	Tutorial – Explore case studies of successful social media marketing campaigns, focusing on their effectiveness in enhancing customer engagement.	Tutorial – Identify through discussion that elements of e-commerce security and common threats and discuss best practices for securing e-commerce platforms.
SLO-5	Practice: Reviewing and discussing landmark cases and analyzing legal cases related to technology and intellectual property	Practice: Engage in a workshop to design ER models for various real-world scenarios, emphasizing entity identification, relationship definition, and normalization.	Practice: Implement TCP and UDP socket communication in a simulated network environment.	Practice: Collaborate in groups to create diagrams and presentations illustrating the structure and functionality of cyberspace.	Practice: Respond to simulated security incidents, applying best practices to mitigate risks and protect sensitive information.
SLO-6	Practice: Conduct a detailed comparison of company and partnership structures	Practice: Assign students different jurisdictions to conduct a comparative analysis of a public or private company.	Practice: Establish a research clinic for LL.M. scholars to investigate and analyze the evolving jurisprudence the legal obligations that promoters have during the incorporation phase	Practice: Examine the components of director remuneration. Discuss the factors that should be considered in determining fair and reasonable compensation.	Practice: Assign learners different countries and ask them to conduct a detailed analysis of the corporate governance frameworks in those countries. Compare and contrast their findings.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-7	Comprehend the legal aspects of legal and structural differences between companies and corporations.	Conduct legal analyses of issues related to the concept of limited and unlimited liability in companies.	Navigate the certificate of incorporation and its significance.	Examine the qualifications required for someone to become a director.	Explain corporate fraud and recognize different forms of fraudulent activities.
SLO-8	Evaluate the legal Importance of the corporate veil in corporate law.	Analyze the concept of members liability in guarantee companies.	Attain advanced proficiency in conceptualizing the process and requirements for obtaining a certificate of incorporation.	Analyze the fiduciary duties and legal liabilities of directors.	Analyze insider trading and its legal implications.
SLO-9	Examine when and why the corporate veil might be lifted.	Analyze what an OPC is and its characteristics.	Demonstrate sophisticated skills in the legal implications and enforceability of pre-incorporation contracts and contracts made after incorporation.	Explore the importance of shareholder meetings.	Explore Corporate Social Responsibility (CSR) and its significance.
SLO-10	Tutorial: Engage in discussions providing examples and cases studies illustrating the need to lift the corporate veil.	Tutorial: Engage in debates on the specific legal requirements and benefits associated with each type of Company	Tutorial: Analyse contracts made by promoters before and after the incorporation of a company	Tutorial – Examine Legal considerations, regulatory frameworks, and best practices in setting director compensation	Tutorial – Conduct a comparative analysis of corporate governance practices across different countries.
SLO-11	Practice: Analyze statutory provisions related to lifting the corporate veil.	Practice: Establish a research forum where students delve into the complexities of the criteria for a company to be classified as a small company.	Practice: Discuss the reasons and procedures for converting private companies to public companies and vice versa.	Practice: Create a mock agenda for an Annual General Meeting (AGM) and ask learners to identify the necessary procedural steps, including notice, quorum, and voting.	Practice: Present case studies of companies that have faced corporate fraud issues. Ask learners to analyse the governance lapses contributing to fraud and propose preventive measures.
SLO-12	Practice: Examine how courts interpret and apply the concept of piercing the corporate veil.	Practice: Conduct a jurisprudence review session where students explore landmark cases shaping the concept of limited liability in an LLP.	Practice: Conduct workshop to explain the memorandum of association and articles of association.	Practice: Engage to analyze the functions of the Nomination and Remuneration Committee. Provide examples of how this committee contributes to effective governance.	Practice: Create a quiz with questions related to insider trading regulations in India. Assess learners' knowledge of legal provisions and penalties.
SLO-13	Explore the lessons learned from prominent legal cases.	Develop an understanding of the legal framework for benefits for producer companies	Attain an expert-level understanding of the interactions Explain the doctrine of ultra vires.	Undertake an in-depth study to differentiate between shareholder meetings and board of directors' meetings	Examine the role and composition of the board of directors in ensuring effective corporate governance.
SLO-14	Analyze the legal aspects and pros and cons of the corporate form of enterprise.	Analyse Section 8, their objectives and process of obtaining a Section 8 company status.	Exhibit advanced legal research competence, delving deeply to understand the significance and implications of acts beyond the company's legal authority.	Understand the roles and responsibilities of committees such as audit committees and nomination committees.	Explore the role of auditors in upholding corporate governance standards.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-15	Gain a comprehensive understanding of the major topics covered in previous sessions.	Develop awareness of the concept of a company as a legal person.	Showcase an advanced appreciation of the multifaceted define the doctrine of indoor management.	Explain the importance of notice, quorum, and proxies in the context of meetings.	Analyze the unique challenges and opportunities in corporate governance for family-owned businesses.
SLO-16	Tutorial: In-depth discussion to explore the pros and cons associated with the corporate structure	Tutorial: Arrange debates for exploration of the legal provisions and regulatory framework governing the formation, operation, and dissolution of different business structures	Tutorial: Facilitate a seminar to understand how various documents shape the governance and operations of a company	Tutorial: Examination of statutory committees like the Audit Committee, Nomination and Remuneration Committee, and Stakeholders Relationship Committee.	Tutorial: Delve into the dynamics of corporate fraud, exploring different types, root causes, and preventive measures.
SLO-17	Practice: Participate actively in group discussions on contemporary issues related to corporate law	Practice: Facilitate a roundtable discussion focused on understanding how the nationality and residence of a company are determined.	Practice: Analyze how the doctrine protects third parties dealing with the company in good faith.	Practice: Conduct a simulated meeting scenario (e.g., AGM or board meeting) and ask learners to navigate through the procedural aspects, including agenda, resolution, and minutes.	Practice: Simulate a stakeholder engagement scenario where learners need to strategize how a company can effectively engage with various stakeholders to fulfill its CSER commitments.
SLO-18	Practice: Engage in legal research and discussions on contemporary issues related to corporate law.	Practice: Assign students to analyze legal rights and responsibilities associated with a company's citizenship.	Practice: Advanced study to Understand the significance and implications of acts beyond the company's legal authority.	Practice: Provide case studies involving corporate governance issues. Ask learners to analyze the situation, identify relevant legal principles, and propose solutions.	Practice: Assign recent articles or cases related to corporate governance, fraud, or social responsibility for learners to read. Conduct a discussion or debate on the implications and potential solutions.

Title & Content	INTRODUCTION	EQUITY FINANCING	DEBT FINANCING	REGULATION OF INTER-CORPORATE LOANS AND BORROWINGS	LAW OF FOREIGN DIRECT INVESTMENT
Duration (hour)	18	18	18	18	18
SLO-1	Comprehend the principles and theories behind financial decision-making in corporations.	Examine the fundamental concepts of equity financing, including the definition of equity, different types of equity securities (common stock, preferred stock), and the role of equity in a company's capital structure.	Identify and examine various debt instruments, such as bonds, loans, and debentures.	Comprehend the legal framework governing inter-corporate loans within the context of company law.	Examine the key regulations governing Foreign Direct Investment in a given jurisdiction, including the legal frameworks and policies that shape FDI inflows and outflows
SLO-2	Explore the key legal concepts and principles that underpin corporate finance transactions, such as securities regulation, corporate governance, and fiduciary duties.	Analyze and examine the advantages and disadvantages of using equity financing for a business.	Examine the fundamental concepts of debt financing, including the definition of debt, key terms such as principal and interest, and the basic mechanics of borrowing money.	Gain a profound understanding about relevant statutes, regulations, and case laws that govern and influence the lending and borrowing activities between companies.	Develop the ability to analyze and interpret Bilateral Investment Treaties, identifying the rights and obligations of both host and home countries, and recognizing the impact of these treaties on FDI.
SLO-3	Develop the ability to navigate and comply with securities laws and regulations.	Examine the steps involved in the equity issuance process, from preparing the business for fundraising to negotiating with potential investors.	Gain insights into the legal structures commonly used in debt financing, such as loan agreements, bonds, and debentures.	Develop the ability to identify and analyze the regulatory requirements that companies must adhere to when engaging in inter-corporate loans.	Assess various mechanisms for resolving investment disputes, such as Investor-State Dispute Settlement (ISDS), and learn the legal implications of such mechanisms on foreign investors and host countries.
SLO-4	Tutorial: Explore the legal requirements for the issuance, trading, and disclosure of securities	Tutorial: Comprehend the legal and regulatory framework governing the public offer of securities.	Tutorial: Assess the regulatory landscape surrounding debt financing.	Tutorial: Evaluate the significance of compliance with statutory provisions and the consequences of non-compliance.	Tutorial: Assess risks associated with foreign direct investment, including political, economic, and legal risks so as to formulate effective strategies to mitigate these risks.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-5	Practice: Analyze the ethical considerations in corporate finance, including conflicts of interest and the duty to act in the best interest of the corporation and its stakeholders.	Practice: Examine the difference between various types of securities, such as stocks, bonds, and derivatives.	Practice: Classify debt instruments into different categories, such as bonds, loans, and debentures, and comprehend the distinctive features of each category.	Practice: Assess the importance of due diligence in evaluating the creditworthiness of borrowing companies and the role of covenants and security in risk management.	Practice: Acquire knowledge about the legal requirements and compliance standards related to foreign direct investment, ensuring they can guide businesses and investors in adhering to applicable laws and regulations.
SLO-6	Practice: Gain insights into how profit and wealth maximization influence strategic decision-making within an organization.	Practice: Analyse the process of issuing securities to the public, including the steps involved in preparing and filing a prospectus, regulatory approvals, and the role of underwriters in facilitating the issuance.	Practice: Learn drafting and reviewing key offering documents, such as prospectuses or offering memoranda, ensuring compliance with legal requirements and clarity for potential investors	Practice: Comprehend the legal provisions and frameworks related to borrowing in company law.	Practice: Comprehend the concept of the "Automatic Route" for FDI.
SLO-7	Evaluate the trade-offs and considerations involved in different business decisions that impact profits and wealth.	Identify and articulate the primary purpose of a prospectus in the context of financial markets.	Analyze the risk and return associated with various debt instruments. This includes understanding the relationship between interest rates, credit risk, and the potential returns of different debt instruments.	Gain an understanding of the different types of borrowing that companies engage in, such as loans, debentures, and other financial instruments.	Evaluate the advantages and limitations of the Automatic Route and differentiate between the Automatic Route and Approval Route for FDI.
SLO-8	Examine the potential legal consequences for companies and their officers in case of non-compliance with capitalization rules.	Examine how to interpret financial statements and other quantitative data to evaluate the investment potential of a company.	Acquire knowledge of how debt offerings comply with securities laws and regulations, including disclosure requirements and anti-fraud provisions	Recognize the role of corporate governance in overseeing and approving borrowing decisions within a company.	Examine the sectors eligible for FDI through the Automatic Route.
SLO-9	Comprehend the role of regulatory bodies and the legal remedies available to stakeholders in case of disputes related to capitalization.	Gain insights into the legal and regulatory framework governing the issuance of prospectuses in relevant jurisdictions.	Apply the learned principles to real-world scenarios, such as personal property financing, secured transactions in business, and consumer transactions.	Examine the compliance requirements related to borrowing, including disclosure obligations and the consequences of non-compliance.	Identify potential challenges and uncertainties, developing skills to create effective risk management strategies.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-10	<i>Tutorial: Identify and examine various money market instruments such as Treasury bills, commercial paper, certificates of deposit, and repurchase agreements.</i>	<i>Tutorial: Explore the differences between different types of public offerings, such as Initial Public Offerings (IPOs) and Follow-on Public Offerings (FPOs).</i>	<i>Tutorial: Develop critical skills to assess the fairness and equity of security interest arrangements in various legal and business settings.</i>	<i>Tutorial: Develop financial models to analyze the impact of intercorporate loans on the financial statements of both the lending and borrowing companies.</i>	<i>Tutorial: Engage in discussions pertaining to the evolution of DIPP, emphasizing its role as the primary government body responsible for formulating and implementing industrial policies.</i>
SLO-11	<i>Practice: Explore how government agencies and financial institutions ensure the integrity and stability of the money market</i>	<i>Practice: Assess the impact of going public on a company's financial structure, governance, and overall business strategy.</i>	<i>Practice: Comprehend the concept of a charge in the context of company law.</i>	<i>Practice: Identify and discuss the key legal considerations and compliance requirements for both lending and borrowing entities.</i>	<i>Practice: Examine how the FDI policy has attracted investments, fostered technological advancements, and created employment opportunities.</i>
SLO-12	<i>Practice: Acquire practical skills in negotiating and drafting financial agreements.</i>	<i>Practice: Comprehend the concept of securities offerings and the significance of intermediaries in facilitating these transactions.</i>	<i>Practice: Examine the legal implications and significance of creating a charge on company assets.</i>	<i>Practice: Articulate the key provisions and limitations outlined in Section 186 of the Companies Act.</i>	<i>Practice: Acquire knowledge about documentation requirements, timelines, and key compliance considerations, fostering an ability to navigate the intricate procedural landscape associated with securing government approval for FDI.</i>
SLO-13	<i>Assess the different types of risks associated with money market instruments, such as interest rate risk, credit risk, and liquidity risk.</i>	<i>Identify the key players involved in public offers, such as investment banks, underwriters, and brokers.</i>	<i>Examine the differences between different types of charges, such as fixed charges and floating charges.</i>	<i>Develop problem-solving skills by evaluating different case studies or examples related to financial transactions and loans.</i>	<i>Examine regulatory framework governing FDI, including the legal and procedural requirements that businesses must navigate to secure government approval.</i>
SLO-14	<i>Identify potential legal risks associated with different forms of financing and develop strategies for risk management and mitigation.</i>	<i>Explore the due diligence process conducted by intermediaries to assess the financial health and compliance of the issuing company.</i>	<i>Acquire knowledge of the procedural requirements and documentation involved in creating a charge.</i>	<i>Recognize the importance of ensuring that financial transactions and corporate activities adhere to the legal framework.</i>	<i>Comprehend reporting obligations, and identify the specific regulatory bodies overseeing FDI in different jurisdictions.</i>
SLO-15	<i>Examine the difference between short-term, medium-term, and long-term legal considerations.</i>	<i>Examine the differences between material and immaterial information, recognizing the importance of disclosing information that could impact investors' decisions.</i>	<i>Identify the steps a company needs to take to properly create and register a charge.</i>	<i>Examine the specific rules and requirements outlined in the Companies Rules, 2014, to real-world scenarios.</i>	<i>Gain a profound understanding about knowledge of currency markets, including how they operate and the key factors influencing exchange rates.</i>
SLO-16	<i>Tutorial: Explore the complexities of long-term legal planning and the importance of foreseeing future implications.</i>	<i>Tutorial: Comprehend the various steps involved in the pre-issue process, including the preparation, planning, and due diligence required before a company decides to go public or issue securities</i>	<i>Tutorial: Examine and explore the concept of debentures in the context of company law.</i>	<i>Tutorial: Develop skills in legal research to navigate and interpret the Companies Rules, 2014, and related legal documents.</i>	<i>Tutorial: Analyse the guidelines set by the Reserve Bank of India (RBI) concerning Foreign Direct Investment.</i>

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-17	Practice: Examine the principles of corporate governance and learn the implications of agency theory, including the conflicts of interest that may arise between shareholders and managers, and how corporate governance mechanisms can mitigate these conflicts.	Practice: Explore the differences between ADRs, IDRs, and GDRs, highlighting the specific markets and regions they represent.	Practice: Compare the legal frameworks governing hybrid financial instruments in different jurisdictions.	Practice: Develop analytical skills to assess situations where penalties might be applicable and propose appropriate courses of action.	Practice: Through practical examples and case studies, acquire knowledge of developed skills in analyzing and preparing FDI reporting documentation.
SLO-18	Practice: Engage in discussion on the implications of corporate structure in different industries.	Practice: Explore the impact of ADRs, IDRs, and GDRs on global capital markets and the broader process of globalization. This includes examining how these instruments contribute to the integration of financial markets and the implications for international investment strategies.	Practice: Analyze the methods used for the valuation of convertible instruments.	Practice: Analyze actual loan agreements, acquire knowledge of the implications of specific covenants on both borrowers and lenders, and considering how economic and industry factors can influence covenant design.	Practice: Examine how foreign investments can enhance infrastructure, technology, and managerial practices, ultimately creating a more conducive environment for businesses.

Title & Content	NATURE OF JUDICIAL PROCESS	DIMENSIONS OF JUDICIAL PROCESS	JUDICIAL PROCESS IN INDIA	JUDICIAL PROCESS IN CONSTITUTIONAL AMENDMENT	JUDICIAL ADMINISTRATION
Duration (hour)	18	18	18	18	18
SLO-1	Comprehend the stages and key components of judicial process, including initiation of legal action, pleadings, discovery, final verdict, judgment, appeals, enforcement of judgements.	Explain and comprehend different methods of interpretation to interpret law to ensure consistency and fairness in decision making.	Examine the structure of the judicial system in India including the hierarchy of courts, its jurisdiction and function at each level of judiciary.	Comprehend and analyze the rationale behind the doctrine of Prospective overruling and its implications for legal certainty, stability, and the rule of law.	Comprehend the process of selection and appointment of Judges in district court, high court and supreme court of India.
SLO-2	Examine the concepts of law, justice, ethics and morality including their interrelationships and distinctions	Examine the approaches and methodology employed in constitutional interpretation of the civil law and common law countries	Comprehend the system of alternative adjudication in India such as mediation, arbitration, and conciliation, as alternatives to traditional litigation	Examine and analyze the doctrine of colourable legislation	Examine the policies and procedures governing the transfer of judges within the judiciary, including the reasons for transfers and the mechanisms for ensuring transparency and fairness in the transfer process.
SLO-3	Analyze the intersection of legal decisions with ethical and moral considerations and how justice is sought through legal mechanisms	Comprehend the approaches and methodology employed in the statutory interpretation of civil law and common law countries.	Gain comprehensive understanding of the structure, jurisdiction, and effectiveness of Nyaya Panchayats in providing access to justice and resolving disputes at the grassroots level.	Gain a comprehensive understanding of the doctrine of harmonious interpretation and its role in reconciling conflicting provisions within statutes or constitutional provisions.	Analyze the importance of manpower planning in ensuring the effective functioning of the judiciary, including the allocation of human and financial resources.
SLO-4	Tutorial: Conduct an in-depth discussion on law, justice, ethics and morality.	Tutorial: Conduct an in-depth discussion on the comprehensive understanding of methods of interpretation	Tutorial: Conduct an in-depth discussion of advantages and limitations of alternative adjudication and its role in reducing the burden on the formal judicial system	Tutorial: Conduct an in-depth discussion on the doctrines of constitutional interpretation	Tutorial: Conduct an in-depth discussion on recent appointment and transfer of judges in high courts and supreme court of India
SLO-5	Practice: Evaluate and analyze hypothetical legal scenarios by applying the ethical considerations and reasoning techniques.	Practice: Evaluate different legal scenarios by employing different types of interpretation.	Practice: Engage in case studies involving landmark cases of alternative adjudication in India.	Practice: Engage in case studies involving landmark cases of prospective overruling.	Practice: Discuss the impact of transfer policies on judicial independence, efficiency, and accountability.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-6	Practice: Engage in making well-reasoned arguments and making sound legal judgements based on relevant laws, precedents and ethical norms.	Practice: Explore and differentiate between different methods of interpretation in civil and common law countries.	Practice: Classroom application of alternative dispute resolution methods for hypothetical cases.	Practice: Engage in case studies involving landmark cases of colourable legislation, harmonious construction.	Practice: Discuss the challenges and considerations involved in manpower planning, such as budget constraints, staffing levels, and workload distribution.
SLO-7	Comprehend the various components of legal reasoning and examine application of these reasoning to analyze legal issues and construct persuasive arguments.	Analyze the concept of judicial review and its importance in analyzing the constitutionality of laws.	Gain an understanding of the evolution of public interest litigation/ social interest litigation in India.	Comprehend and analyze other doctrines including pith and substance.	Examine the legal framework governing judicial impact assessment as a tool for evaluating the potential impact of judicial decisions, legislation, or policy changes on the judiciary and the legal system.
SLO-8	Discuss and understand deductive reasoning, inductive reasoning and dialectical reasoning.	Examine the concept of judicial activism, proactive role of judges in shaping individual rights and progressive social change.	Examine the procedural aspects of public interest litigation/ social interest litigation, including standing, locus standi, and the role of public interest petitioners and interveners.	Examine and analyze the origins, development, and significance of the Doctrine of Basic Structure theory in constitutional jurisprudence.	Analyze the methodology and process of conducting Judicial Impact Assessment and its role in promoting transparency, accountability, and evidence-based decision-making.
SLO-9	Comprehend the concept of analogy, reasoning by comparison to similar cases.	Comprehend the concept of judicial restraint	Gain an understanding of landmark public interest litigation/ social interest litigation cases and their impact on social justice, human rights, environmental protection, and governance in India.	Analyze the recent judicial decisions and developments related to the Doctrine of Basic Structure Theory, including its application to specific constitutional provisions and issues.	Examine the factors contributing to mounting arrears in the judicial system, such as backlog of cases, delays in court proceedings, and inefficiencies in case management.
SLO-10	Tutorial: Conduct in depth discussion on methods of legal reasoning.	Tutorial: Conduct an in-depth discussion on the proactive role of the judges through judicial activism as against the conventional separation of powers.	Tutorial: Conduct an in-depth discussion on public interest litigation in Indian jurisprudence	Tutorial -. Conduct an in-depth discussion on the basic structure doctrine and amendment of constitution.	Tutorial – Conduct an in-depth discussion on the judicial impact assessment.
SLO-11	Practice: Engage in giving illustration of cases to apply general principles to specific cases and specific principles to general cases.	Practice: Discuss in case studies involving judicial review.	Practice: Engage in case studies involving landmark cases of public interest litigation.	Practice: Engage in case discussion of Kesavananda Bharathi v State of Kerala	Practice: Discuss the potential effects of judicial decisions on various stakeholders and the broader legal system.
SLO-12	Practice: Engage in giving illustration of cases by comparison to similar cases to understand the concept of analogy	Practice: Discuss in case studies involving judicial activism and judicial restraint	Practice: Engage in the classroom drafting of public interest litigation petitions.	Practice: Engage in case discussion of other cases relating to basic structure doctrine.	Practice: Examine the practical consequences of mounting arrears on access to justice, judicial efficiency, and public confidence in the legal system.
SLO-13	Explore the tools and techniques employed by judges to creatively interpret laws to balance the competing interests	Explain the principles of judicial accountability, transparency and independence of judiciary as an essential component of fair and impartial judiciary.	Comprehend the concept of judicial policy-making and its role in shaping legal doctrines, principles, and public policy.	Comprehend and analyze the process of constitutional amendment in India	Examine the patterns of court management, such as case-flow management, docket management, and alternative dispute resolution mechanisms.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-14	Comprehend the ethical and practical implications in judicial creativity in promoting fairness and justice within the legal system.	Comprehend the mechanisms for promoting judicial accountability and transparency, such as judicial codes of conduct, judicial performance evaluations, and public access to court proceedings and records.	Gain an understanding of the evolution of doctrines and principles in India	Comprehend the process of constitutional amendment in America, the historical context of constitutional amendments and their impact on civil rights, governance, and federalism.	Explore the recommendations made by the Law Commission or similar bodies relating to court management, reforming the judiciary and improving the administration of justice.
SLO-15	Explore the importance of precedents in the common law system and how it operates as a source of legal authority in providing guidance to courts in similar cases.	Gain an understanding of the Bangalore Principles of judicial conduct aimed at promoting judicial integrity	Gain an understanding of the landmark judgments and legal developments that have contributed to the evolution of Indian legal principles and doctrines over time.	Examine, compare and distinguish the constitutional amendment process in different legal systems such as India and America.	Examine and analyze the national case management system in India including the E court system in India.
SLO-16	Tutorial: Conduct in depth discussion on the tools and techniques of judicial creativity and its role in shaping legal principles and doctrines	Tutorial: Conduct an in-depth discussion on judicial integrity.	Tutorial: Conduct an in-depth analysis and discussion on, judicial policy-making, and the evolution of legal doctrines and principles.	Tutorial: Discuss the step-by-step walkthrough of the amendment process in India and USA, and the potential exemptions.	Tutorial: Discuss in detail the Lord Woolf's Report on "Case Management" (UK)- Australian Law Reform Commission on "Judicial and case Management"
SLO-17	Practice: Discuss on landmark cases illustrating the interpretation and application of these principles.	Practice: Discuss the role of judges in safeguarding the rule of law and judicial integrity.	Practice: Engage in discussion on landmark cases related to legal doctrine in India	Practice: Discuss landmark cases pertaining to constitutional amendment in the USA.	Practice: Discuss the practical feasibility and effectiveness of these recommendations in addressing systemic challenges and promoting judicial efficiency and accountability.
SLO-18	Practice: Discuss the case studies to understand the doctrine of precedent	Practice: Discuss the key principles outlined in the Bangalore Principles and their relevance to ensuring judicial independence, impartiality, integrity, and competence.	Practice: Discuss the ethical considerations and professional responsibilities involved in judicial decision-making, policy formulation, and legal advocacy.	Practice: Discuss case studies pertaining to constitutional amendment in India.	Practice: Discuss the concept of master of roaster in India

Title & Content	INTRODUCTION	CORPORATE SECURITIES	CORPORATE GOVERNANCE AND BOARD MANAGEMENT	TRANSPARENCY, DISCLOSURES AND CORPORATE SOCIAL RESPONSIBILITY	NATIONAL AND INTERNATIONAL LEGAL FRAMEWORK OF CORPORATE GOVERNANCE
Duration (hour)	18	18	18	18	18
SLO-1	Identify the core principles that form the foundation of effective corporate governance.	Identify the key functions and responsibilities that shareholders undertake within the corporate structure.	Critically analyze the role and authority of the board of directors in corporate governance.	Gain an understanding of the importance of disclosure and transparency concepts for stakeholder trust and accountability.	Gain an understanding of the historical development and evolution of corporate governance in the UK.
SLO-2	Analyze various theories that underpin corporate governance practices.	Explore the rights granted to shareholders in a company.	Analyze the different types of directors and their specific roles	Explore the role of financial institutions in promoting disclosure and transparency	Examine the fundamental structures and principles of the U.S. Corporate Governance System.
SLO-3	Examine the interests, rights, and responsibilities of shareholders, employees, and other stakeholders.	Discuss the impact of responsible shareholder behavior on corporate governance.	Examine the principles and mechanisms behind managerial remuneration.	Analyze how significance the Memorandum and Articles of Association provide the framework for corporate operations and governance.	Demonstrate and compare key features with the UK Corporate Governance Code.
SLO-4	Tutorial: Engage in discussion on fundamental principles, including transparency, accountability, and fairness.	Tutorial: Explain practical tips on addressing shareholder concerns and building positive relationships.	Tutorial: Encourage critical thinking and discussions on the evolving landscape of corporate governance.	Tutorial: Analyze the role of financial institutions in promoting transparency.	Tutorial: Explore the key principles and components of the UK Corporate Governance Code and the U.S. Corporate Governance System.
SLO-5	Practice: Analyze historical cases pertaining to the evolution of corporate governance.	Practice: Engage in discussion pertaining to proposals, and cast mock votes	Practice: Organize a symposium for students to conduct a board where learners take on different roles within the board structure.	Practice: Engage learners in a workshop to identify and explore various tools for effective disclosure.	Practice: Conduct a detailed comparative analysis, highlighting similarities, differences, and the rationale behind distinct approaches.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-6	Practice: Evaluate the interests and influence of different stakeholders on corporate governance.	Practice: Assign students to analyze the impact of market conditions on debenture valuation.	Practice: Establish a research clinic for scholars to discuss the implications of ethical lapses on corporate governance.	Practice: Provide learners with sample Memorandum and Articles of Association and analyse the content.	Practice: Assign learners to simulate a U.S. corporate governance scenario, requiring learners to make decisions in line with U.S. governance principles.
SLO-7	Examine the concept of shareholder activism and its impact on corporate decision-making.	Evaluate the role of regulatory bodies and corporate governance frameworks in safeguarding shareholder interests.	Navigate and critically assess the fiduciary duties and rights of directors.	Examine the importance of providing timely and accurate information in disclosure.	Explore global regulatory frameworks governing international trade and investment.
SLO-8	Evaluate the ethical considerations and challenges associated with technology in the context of governance.	Examine the rights granted to debenture holders.	Examine the role of the board in safeguarding shareholder interests.	Discuss the extent and scope of disclosure required in different contexts.	Analyze domestic investment law and its role in regulating national investment activities.
SLO-9	Explore the effects of globalization on corporate governance structures.	Analyze the impact of responsible debenture holder behavior on financial stability.	Investigate legal remedies for oppression, mismanagement, and class actions.	Explain Corporate Social Responsibility (CSR) and its components and the evolving role of CSR in modern business practices.	Explore the legal considerations and challenges in cross-border investments.
SLO-10	Tutorial: Engage in discussion on the evolving roles of institutional investors and their influence on corporate governance.	Tutorial: Analyse yield-to-maturity calculations, credit risk assessment, and bond diversification.	Tutorial: Analyze the nuanced aspects of fiduciary duties of directors in different jurisdictions.	Tutorial – Examine Legal implications of the Memorandum and Articles of Association in defining a company's constitution.	Tutorial – Examine the regulatory frameworks governing international trade and investment relations.
SLO-11	Practice: Examine strategies to address shareholder concerns while maintaining corporate integrity.	Practice: Examine case studies on shareholder activism.	Practice: Facilitate a workshop on the role of the board in shareholder protection through disclosure and transparency.	Practice: Create a mock to engage in group discussions to determine best practices in disclosure.	Practice: Assign learners specific international trade agreements to analyse.
SLO-12	Practice: Explain potential privacy concerns and propose solutions to maintain a balance.	Practice: Simulate a scenario where learners manage a portfolio of debentures.	Practice: Simulate scenarios depicting conflicts between majority and minority shareholders.	Practice: Assign roles to learners representing different stakeholders in a CSR context.	Practice: Create a role-play cross-border investment negotiations, with learners representing different stakeholders.
SLO-13	Investigate the correlation between corporate governance practices and corporate social responsibility.	Evaluate the role of regulatory bodies and financial governance frameworks in safeguarding debenture holder interests.	Analyze the obligations and responsibilities of the board in managing liabilities during liquidation.	Examine the international dimensions of CSR and global best practices.	Discuss the concept of host state obligations in protecting foreign investments.
SLO-14	Analyze and examine the importance of legal compliance in ensuring effective governance structures.	Explain the diverse roles, rights, and responsibilities of various stakeholders in the corporate ecosystem.	Examine the importance of accounting and auditing in governance.	Evaluate how disclosure practices and CSR efforts can be integrated for comprehensive corporate governance.	Explore the role of corporations in upholding human rights standards.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-15	Gain a comprehensive understanding of the potential challenges and propose strategies to adapt to the evolving landscape of corporate governance.	Evaluate the impact of their interactions on corporate decision-making and financial stability.	Evaluate the impact of effective investor protection on capital markets and corporate behavior.	Explore national and international regulatory frameworks governing disclosure and CSR	Analyze the integration of corporate governance principles with sustainable and socially responsible practices.
SLO-16	Tutorial: In-depth exploration of the role of technology in enhancing transparency, communication, and data security in corporate governance.	Tutorial: Exploration of successful stakeholder engagement leading to sustainable corporate practices.	Tutorial: Facilitate a seminar to cover advanced topics in auditing, focusing on emerging trends and technological innovations.	Tutorial: Examine the statutory concept of Corporate Social Responsibility (CSR) and its evolving role in corporate governance.	Tutorial: Discuss the intersection of corporate responsibility with human rights and environmental issues in the context of international trade and investment.
SLO-17	Practice: Develop risk management strategies that align with global governance challenges.	Practice: Facilitate a workshop on effective stakeholder engagement strategies.	Practice: Evaluate the committee's role in ensuring financial transparency and compliance.	Practice: Conduct case studies highlighting international challenges in implementing CSR initiatives.	Practice: Discuss case studies illustrating scenarios where host states have obligations to protect foreign investments.
SLO-18	Practice: Engage in case study analysis focusing on compliance with corporate governance codes.	Practice: Provide case studies comparing the roles and interests of shareholders and debenture holders.	Practice: Engage in discussions on the role of institutional investors in mitigating risks and protecting shareholder interests.	Practice: Conduct case studies to develop analytical skills in assessing CSR programs and their outcomes.	Practice: Engage learners in discussions on corporate responsibility, human rights, and environmental considerations.

									3	1	2	5
Course Offering Department	School of Law	Pre-requisite Courses	Co-requisite Courses	Progressive Courses	Data Book / Codes/Standards							
Title & Content	BASICS OF CORPORATE RE-STRUCTURING, MERGERS AND ACQUISITIONS	NEGOTIATION, DEAL STRUCTURING AND METHODS OF PAYMENT IN MERGERS AND ACQUISITIONS	LEGAL AND PROCEDURAL ROADMAP FOR MERGERS	VALUATION OF TARGET COMPANIES	LAW AND PROCEDURE OF TAKEOVER AND ACQUISITION							
Duration (hour)	18	18	18	18	18							
SLO-1	Develop a foundational understanding of Corporate Restructuring: Meaning, Need and Scope	Attain a comprehensive understanding of the Structuring of transactions	Critically analyze and evaluate the Legal and Procedural Aspects of Mergers	Achieve a nuanced comprehension of Concept of Value of a Company	Demonstrate an advanced understanding of Corporate Demergers							
SLO-2	Gain comprehensive knowledge of Modes of Corporate Restructuring	Develop expertise in managing legal aspects of regulatory approval	Demonstrate advanced expertise in dissecting intricate Accounting and Human Aspects of Mergers	Conduct advanced research on the Firm Valuation Models on Merger	Conduct a critical analysis of Reverse Mergers							
SLO-3	Analyze the concept of Joint Ventures	Acquire proficiency in addressing and identity deal making in India	Conduct in-depth examinations of Taxation Aspects of Mergers	Develop expertise in scrutinizing Firm Valuation Models on Acquisition	Demonstrate a Comparative analysis of Procedural Aspects and Tax Implications							
SLO-4	Tutorial: Analyze a recent case, discussing regulatory aspects and legal frameworks of Corporate structuring	Tutorial: Analyze cases, compare regulations for Negotiations and deal making in India	Tutorial: Engage students in an advanced workshop focusing on legal roadmap for Merger	Tutorial :Explore International Valuation of Companies and process	Tutorial : Explore legal frameworks and implications in a takeover situation							
SLO-5	Practice: Students conduct an in-depth analysis of key features of different modes of Corporate restructuring	Practice: Organize a symposium where students present their research findings on payment modes in Mergers and Acquisitions	Practice: Organize a symposium for LLM students to present and discuss advanced legal research on various aspects of merger	Practice: Role-play different scenarios of comparison between domestic and international valuation model	Practice: Engage students in a detailed analysis of legal frameworks and implications, encouraging critical thinking and advanced understanding.							
SLO-6	Practice: Participants conduct an in-depth analysis of various theories associated with Joint ventures in Indian legal scenario	Practice: Assign students different cases to study on Mergers and Acquisitions in India and abroad	Practice: Establish a research clinic for LL.M. scholars to investigate and analyze the evolving jurisprudence behind Applicability and Parties choice of merger and consequences	Practice: Conduct a mock where participants analyze valuation model for both M&A	Practice: Conduct a hands-on simulation where students formulate legal strategies for procedural aspects in mergers							
SLO-7	Comprehend the legal aspects of Disinvestment and Slump Sale	Conduct legal analyses of issues related to methods of payment in M&A	Acquire proficiency in addressing and identify the Stamp Duty on Merger Transactions	Undertake comprehensive research on the DCF Model	Gain Insight of the Takeover and Acquisition							
SLO-8	Assess the jurisprudential review of Financial Restructuring	Master the legal dimensions of stock transactions	Attain advanced proficiency in Rule of Post Merger Aspects	Conduct a critical assessment of the Comparable Company	Analyze the Takeover and Acquisition and Meaning, Concept and Types							
SLO-9	Delve into the Uses of Concepts Buy Back, Reduction and Reorganization of Capital	Gain insights into the legal complexities in cash transactions	Demonstrate sophisticated skills in analyzing Rules of Reorganization and De-listing	Conduct advanced academic research on the Book Value	Explore the Legal and Procedural Aspects of Takeover							

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-10	Tutorial: Simulate a hypothetical scenario to explore legal considerations for theories of financial restructuring	Tutorial: Assign scenarios to students to understand and discuss the cases where payments modes are challenged during M&A	Tutorial: Conduct a tutorial exploring sophisticated strategies for Merger process and its essential elements for validity	Tutorial – Dive into the legal intricacies of Law applicable to the Adjusted Book Value	Tutorial: An in-depth discussion on legal and procedural aspects of Merger
SLO-11	Practice: Groups delve into the cases of buy back and capital recognition in India	Practice: Establish a research forum where students delve into legal dimensions of difference in cash and stock transactions	Practice: Simulate International Mergers and challenging LLMs students to navigate complex legal issues related to post merger	Practice: Organize a research symposium where students present findings on Enterprise Value	Practice: conduct an interactive workshop focusing on regulations on Acquisition process
SLO-12	Practice: Learners explore jurisdictional nuances through the critiques of Indian regulations for Financial Restructure	Practice: Conduct a review session where students explore the process of merger and Acquisitions	Practice: Thematic Legal Writing Workshop: Crafting Advanced Writings on Amalgamation as per AS-14	Practice: Engage in a hands-on workshop exploring practical applications of valuation of targeted companies	Practice: Organize a debate-style activity where students discuss and analyze concepts of takeover and merger in India and abroad
SLO-13	Explore the legal implications of Funding Options for Corporate Restructuring	Develop legal competence in Types of exchange of shares	Attain an expert-level understanding of the International Financial Reporting Standards (IFRS)	Undertake an in-depth exploration of the Valuation system	Examine the legal frameworks governing the Disclosures
SLO-14	Analyze the legal aspects of Venture Capital	Attain proficiency in legal frameworks for Basic Principles of Drafting of Merger Scheme	Exhibit advanced legal research competence, delving deeply into SEBI regulations on Takeovers in India (Takeover Code)	Perform an analytical study of the Concept of Three Stage growth model	Apply the Regulation of Open Offer and Exemptions
SLO-15	Comprehensive understanding of the Angel Investment and Private Equity	Develop awareness of elements in Drafting of Shareholders Agreement	Showcase an advanced appreciation of Role of Merchant Bankers in Mergers & Acquisition	Develop expertise in the Swap Ratio	Showcase advanced legal study of Due Diligence in Valuation
SLO-16	Tutorial: Facilitate a discussion of Capital funding system in India	Tutorial: Simulate an insight to exchange of shares during M&A	Tutorial: Facilitate a seminar guiding students through complex Amalgamation rules	Tutorial: Examine legal aspects of Valuation Practices in India	Tutorial: conduct a seminar focusing on Interest of Small Investors and Minorities in Corporate Restructuring
SLO-17	Practice: Students perform legal research to identify relevant legal precedents and case law in Venture capital and other funding options	Practice: Facilitate a roundtable discussion focused on elements in drafting Shareholders Agreement	Practice: International Dispute Resolution Symposium on International standards adopted by India	Practice: Simulate domain dispute resolution scenarios applying principles from the LBO, MBO and Indian Practice for valuation	Practice: Conduct a workshop exploring the legal implications of Corporate Insolvency
SLO-18	Practice: Participants engage in legal research to comprehend and compare the Funding options for corporate	Practice: Assign students to analyze Merger Process in India	Practice: Advanced Roundtable on SEBI regulations and Merchant Bankers	Practice: Participate in a legislative drafting challenge where students comprehend the companies valuation system across the globe	Practice: Engage students in an exercise highlighting legal considerations corporate restructure process

Title & Content	INTRODUCTION TO SECURITIES AND SECURITIES MARKET	INVESTMENT CAPITAL, INVESTOR BEHAVIOR AND SECONDARY MARKET REGULATION	REGULATIONS RELATING TO MARKET INTERMEDIARIES	LAW RELATING TO TRANSFER OF SECURITIES	CIVIL AND CRIMINAL LIABILITY RELATING TO SECURITIES TRANSACTIONS
Duration (hour)	18	18	18	18	18
SLO-1	Explore securities and the capital market, including the key roles they play in the global financial system.	Grasp the fundamental concepts of investor protection, exploring the regulatory frameworks and mechanisms in place to safeguard investors' rights and interests within the financial markets.	Analyze the regulatory framework established by the Ministry of Corporate Affairs (MCA) governing corporate entities.	Comprehend the various regulatory bodies and frameworks governing securities purchases, such as the SEBI in the India or equivalent entities in other jurisdictions.	Gain an understanding of the legal frameworks and regulations governing UTPs in their jurisdiction.
SLO-2	Gain a profound knowledge about various types of securities, such as stocks, bonds, and derivatives, and their characteristics.	Explore the intricacies of investment risk, providing with tools and strategies to identify, assess, and manage various types of risks associated with different investment instruments.	Analyze and interpret key provisions of the Companies Act, 2013, and subsequent amendments, ensuring a thorough grasp of corporate compliance requirements.	Gain the ability to recognize and understand insider trading practices, including the legal definitions, consequences, and measures taken to prevent such activities.	Examine the consumer rights and the importance of protecting consumers from deceptive business practices.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-3	Explore the diverse landscape of the capital market, identifying the different market structures and the roles played by various participants, including investors, issuers, and intermediaries.	Gain insights into the legal frameworks governing investor protection, including the examination of securities laws, regulations, and the role of regulatory bodies in maintaining market integrity.	Equip participants with the knowledge to navigate the intricate processes of company registration, incorporation, and compliance with MCA guidelines.	Analyze different types of trading restrictions, such as blackout periods, trading windows, and other regulatory limitations imposed on individuals with access to non-public information.	Explore how UTPs can harm consumers and erode trust in the marketplace
SLO-4	Tutorial: Engage in discussions on regulatory bodies governing securities and capital markets, and rules and compliance requirements.	Tutorial: Comprehend and navigate market risks, encompassing systematic and unsystematic risks, market volatility, and the impact of economic factors on investment portfolios.	Tutorial: Develop a nuanced understanding of corporate governance principles mandated by the MCA, promoting ethical business practices and transparency.	Tutorial: Develop a comprehensive understanding of market manipulation techniques and the regulations in place to prevent and penalize such activities.	Tutorial: Analyze real-world examples and case studies of companies engaging in Unfair Trade Practices.
SLO-5	Practice: Analyze and assess the risk and return associated with different securities, enabling them to make informed investment decisions.	Comprehend disclosure requirements for financial instruments, exploring how transparency and timely dissemination of information contribute to informed decision-making and investor confidence.	Explore the evolving regulatory landscape, staying updated on recent changes and amendments introduced by the MCA to adapt to dynamic business environments.	Explore the connection between securities purchases and anti-money laundering efforts.	Explore strategies for ethical decision-making and responsible business conduct to avoid engaging in Unfair Trade Practices
SLO-6	Practice: Explore the distinction between primary and secondary markets providing insights into how securities are issued and traded in these markets.	Practice: Elucidate the critical role of corporate governance in protecting investor interests, examining how effective governance structures enhance transparency, accountability, and ethical business practices.	Practice: Filing various statutory documents with the MCA, enhancing participants' practical skills in compliance management.	Practice: Comprehend the concept of share warrants are, including their purpose and how they differ from other financial instruments like stocks or options.	Practice: Identify the role and functions of SFIO in investigating serious financial frauds
SLO-7	Practice: Through exercises, equip participants with knowledge about equities, market indices, and the factors influencing stock prices.	Practice: Develop an understanding of common investment scams and frauds, learning how to recognize warning signs and protect themselves and their clients from potentially fraudulent activities.	Practice: Acquire knowledge about the MCA's role in overseeing the functioning of regulatory bodies such as the National Company Law Tribunal (NCLT) and Appellate Tribunal (NCLAT).	Practice: Identify and analyze the key features of share warrants, such as the expiration date, exercise price, and the rights associated with holding warrants.	Practice: Comprehend the regulatory framework governing the issuance of securities and the role of prospectuses in various jurisdictions.
SLO-8	Examine the bond market, various types of bonds, their valuation, and the impact of interest rates on bond prices.	Acquire ethical considerations in investment practices, emphasizing the importance of maintaining integrity, honesty, and ethical behavior in dealings with clients and stakeholders.	Comprehend the significance of MCA initiatives like the Corporate Social Responsibility (CSR) framework, promoting responsible business practices.	Assess the risks and rewards associated with investing in share warrants.	Explore and examine instances of misrepresentation in prospectus content, including material omissions, false statements, or misleading information

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-9	Explore the concept of derivatives, including futures and options, and their role in managing risk and speculation.	Comprehend the significance of investor education in empowering individuals to make informed investment decisions, promoting financial literacy, and reducing vulnerability to financial exploitation.	Examine the essence of MCA's efforts to digitize processes, enabling to leverage online platforms for seamless compliance and reporting.	Explore how share warrants can be used in financial strategies, including hedging, speculation, and income generation.	Critically analyze financial information, legal disclosures, and other relevant sections to identify potential red flags.
SLO-10	Tutorial: Explore the complexities of the foreign exchange market, including exchange rates, currency pairs, and the factors influencing currency values.	Tutorial: Explore the concept of the risk-return tradeoff, understanding how different investment strategies balance risk and potential returns to align with investors' risk tolerance and financial goals.	Tutorial: Equip participants with the skills to interpret MCA notifications and circulars, enabling them to stay abreast of regulatory changes that impact corporate operations.	Tutorial: Examine the regulatory framework governing share warrants and the legal aspects related to their issuance and trading.	Tutorial: Explore the importance of ethical decision-making in financial institutions and the role of compliance measures in preventing fraudulent activities
SLO-11	Practice: Gain hands-on experience in examining various bond types, valuing bonds amidst interest rate changes	Practice: Examine the responsibilities and ethical obligations of financial advisors in protecting the interests of their clients, emphasizing the importance of clear communication and fiduciary duty.	Practice: Explore the implications of MCA's initiatives in promoting ease of doing business, fostering a business-friendly environment in the country.	Practice: Deduce the concept of forfeiture of shares, demonstrating a clear understanding of the circumstances under which shares may be forfeited.	Practice: Deduce the importance of complying with legal standards and ethical considerations to avoid contractual disputes and tortious liabilities.
SLO-12	Practice: Explore current trends and innovations in capital markets, such as financial technology (fintech) and blockchain technology.	Practice: Gain insights into global perspectives on investor protection, understanding the variations in regulatory frameworks and best practices across different financial markets and jurisdictions.	Practice: Grasp the MCA's role in facilitating corporate restructuring, mergers, and acquisitions, enhancing their strategic decision-making capabilities.	Practice: Identify and analyze the various reasons for the forfeiture of shares, such as non-payment of calls, breach of terms, or other stipulated conditions, and recognize the legal implications of these actions.	Practice: Identify key stakeholders involved in insider trading, such as insiders, tippees, and market participants.
SLO-13	Comprehend the concept of market efficiency will be explored, along with discussions on market anomalies and their implications for investors.	Explore the impact of technological advancements on investor security, addressing cybersecurity concerns and discussing measures to protect sensitive financial information in the digital age.	Examine the MCA's role in the resolution of corporate disputes and the functioning of the Insolvency and Bankruptcy Code.	Gain the ability to apply accounting principles related to the forfeiture of shares, including the treatment of forfeited shares in the company's books, understanding the impact on share capital, and recognizing how to reflect these changes in financial statements	Explore the regulatory framework governing insider trading in relevant jurisdictions.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-14	Analyse behavioral finance principles thereby recognizing psychological factors influencing market behavior.	Comprehend effective risk diversification strategies, including the importance of asset allocation, portfolio diversification, and risk mitigation techniques to optimize investment outcomes.	Comprehend the role and functions of SEBI in regulating the securities market in India, gain an understanding of SEBI's authority and powers in overseeing various market participants.	Comprehend the legal procedures involved in the forfeiture of shares, including the rights and obligations of both the company and the shareholders, and the steps that need to be taken to affect the forfeiture in compliance with relevant laws and regulations.	Analyze the elements necessary for establishing criminal liability in insider trading cases, considering factors like intent, materiality of information, and the connection between the insider and the traded securities.
SLO-15	Gain insights into cultural finance and capital markets, understanding the principles and practices adhered to in cultural financial systems.	Analyze instances of investor protection successes and failures, applying theoretical knowledge to practical situations and honing their decision-making skills.	Gain a profound understanding of the role and responsibilities of a stock broker.	Analyze the perspectives of both shareholders and the company in the context of share forfeiture, understanding how the process can protect the interests of the company while considering the implications for shareholders and their investment in the company.	Comprehend the range of penalties and consequences associated with insider trading convictions, such as fines, imprisonment, disgorgement of profits, and potential civil liabilities.
SLO-16	Tutorial: Equip participants with a thorough understanding of socially responsible investing, emphasizing the strategic integration of environmental, social, and governance (ESG) factors in investment decisions for fostering adjective-aligned and sustainable financial choices.	Tutorial: Examine the significance of regulatory compliance in building and maintaining investor trust, exploring how adherence to laws and regulations fosters a secure and reliable investment environment.	Tutorial: Examine the role and significance of NSDL in the financial markets and how NSDL facilitates the electronic holding and transfer of securities.	Tutorial: Examine the fundamental concept of Securities Transaction Tax, including its purpose, scope, and applicability in financial market.	Tutorial: Recognize and identify various forms of insider trading activities, such as trading based on non-public information, tipping, and other related offenses.
SLO-17	Practice: Deduce how to use derivatives for hedging against risks and for speculative purposes, enhancing their risk management skills.	Practice: Analyse behavioral finance, understanding how psychological factors influence investor decision-making and exploring strategies to mitigate the impact of cognitive biases on investment choices.	Practice: Engage in activities focusing on exploring the role of credit rating agencies in the financial markets..	Practice: Gain a comprehensive understanding of the legal framework governing Securities Transaction Tax, including relevant laws, regulations, and amendments. should be able to identify the compliance requirements for market to ensure adherence to STT regulations.	Practice: Examine the role of corporate governance in preventing insider trading within organizations.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-18	Practice: Comprehend about various portfolio management strategies, enabling to construct and optimize investment portfolios based on their financial goals and risk tolerance.	Practice: Comprehend dynamic nature of financial markets and the need for continuous learning and adaptation to evolving regulatory landscapes, market trends, and emerging risks in order to stay informed and make effective investment decisions.	Practice: Identify the key functions and responsibilities of credit rating agencies	Practice: Through case studies examine the ability to analyze and contrast the tax implications of slump sale with other modes of transferring assets, like asset sales or share transfers.	Practice: Examine the importance of compliance programs, codes of conduct, and disclosure requirements for companies to adhere to SEBI regulations.

Course Offering Department	School of Law	Prerequisite Courses	Co-requisite Courses	Progressive Courses	Data Book / Codes/Standards
----------------------------	---------------	----------------------	----------------------	---------------------	-----------------------------

Title & Content	LEGAL EDUCATION	TEACHING AND EXAMINATION	RESEARCH	RESEARCH PROCESSES	ANALYSIS AND REPORT WRITING
Duration (hour)	18	18	18	18	18
SLO-1	Comprehend the historical evolution of legal education from ancient times to the present day, including key milestones.	Comprehend various methods of teaching used in legal education, including their objectives, principles, and application in different contexts.	Comprehend the meaning and purpose of research in the field of law.	Comprehend the importance of conducting a comprehensive review of existing literature.	Comprehend the principles of statistical analysis and its application to legal research.
SLO-2	Examine the primary objectives of legal education, including preparing students for the legal profession, promoting critical thinking and analytical skills, fostering ethical values and professionalism, and advancing justice and the rule of law.	Examine the concept of problem method of teaching as an active learning approach, that involves presenting students with real-life legal problems to solve.	Examine and articulate the objectives of legal research.	Examine the formulation of research design such as experimental, correlation, descriptive, and qualitative designs that aligns with their research objectives, questions, and methodology.	Explore the interpretation of collected data.
SLO-3	Analyze the key provisions and standards outlined in the Part IV of the Bar Council of India Regulations 2008, pertaining to legal education and training requirements for aspiring lawyers.	Comprehend the concept of seminar method of teaching, which involves students conducting research, presenting findings, and engaging in scholarly discourse on specific legal topics.	Analyze the different types of research methodologies employed in legal and research, including qualitative, quantitative, mixed-methods, doctrinal, empirical, and comparative research.	Examine various methods of data collection used in legal research, including surveys, interviews, observations, document analysis, and archival research.	Explore and interpret the results of statistical analysis and evaluate their implications for legal theory, practice, and policymaking.
SLO-4	Tutorial: Conduct an in-depth analysis and discussion on the evolution and objectives of legal education.	Tutorial: Conduct an in-depth analysis and discussion on the strengths, limitations, and suitability of each teaching method for enhancing student learning and engagement.	Tutorial: Conduct an in-depth discussion on different types of research methodologies employed in legal research.	Tutorial: Conduct an in-depth discussion on review of literature and research design.	Tutorial: Conduct an in-depth discussion on statistical analysis.
SLO-5	Practice: Discuss the factors shaping the evolution of legal education, such as societal needs, technological advancements, globalization, and legal reforms.	Practice: Discuss how the problem method promotes critical thinking, problem-solving skills, and practical application of legal principles.	Practice: Discuss the role of research in generating new knowledge, addressing questions, and solving problems in the legal field and society at large.	Practice: Engage in hands-on exercise by reviewing the existing literature and identifying the research gap.	Practice: Discuss statistical analysis including data collection, organization, summarization, and interpretation.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-6	Practice: Examine the effectiveness of legal education in developing practical legal skills and gaining real-world experience.	Practice: Discuss how the seminar method promotes independent research, oral presentation skills, and critical analysis of legal literature.	Practice: Discuss the characteristics, strengths, and limitations of each research type and their suitability for different research objectives and contexts.	Practice: Engage in hands-on exercise by formulating research designs for identified legal issues.	Practice: Discuss the various methods of interpretation of data collection.
SLO-7	Comprehend the role of the University Grants Commission (UGC) in regulating and overseeing higher education, including legal education, in India.	Comprehend the concept of discussion method which involves interactive exchanges among students and between students and instructors to explore legal concepts, cases, and issues.	Comprehend the social science research methods and their application to legal studies, including approaches such as surveys, interviews, case studies, content analysis, and ethnography.	Examine the quantitative methods of data collection.	Comprehend the concept of hypothesis testing and its role in scientific inquiry and empirical research.
SLO-8	Examine the role of the state government, judiciary, legal profession, and other institutions in shaping legal education policies, standards, and practices.	Analyze the concept of Socratic method which is characterized by a dialogue between instructor and students those challenges assumptions, promotes critical thinking, and encourages students to articulate and defend their viewpoints.	Examine distinct characteristics of legal research, including its focus on legal norms, principles, doctrines, and institutions.	Examine the qualitative methods of data collection.	Examine how to write research reports that effectively communicate the findings of their research projects.
SLO-9	Analyze the impact of UGC, state government and other institutions on legal education.	Comprehend the concept of Case law method of teaching, which involves studying legal cases in-depth to understand legal principles, doctrines, and precedents.	Gain an understanding of socio legal research which integrates legal analysis with insights from social sciences to examine the impact of law on society and vice versa.	Analyze sampling techniques used in legal research, including probability and non-probability sampling methods.	Explore the principles of clarity, coherence, and accuracy in report writing.
SLO-10	Tutorial: Conduct in-depth discussions on the role of UGC and other institutions in promoting legal education.	Tutorial: Conduct in-depth discussions on different methods of teaching.	Tutorial: Conduct in-depth discussions on socio legal research.	Tutorial – Conduct in-depth discussions on the strengths, limitations, and ethical considerations associated with each data collection method and select the most suitable approach based on their research objectives and constraints.	Tutorial – Conduct in-depth discussions on each hypothesis testing and select the most appropriate test based on their research design and objectives.
SLO-11	Practice: Discuss the contributions and responsibilities of these entities in promoting quality legal education, access to justice, and professional development.	Practice: Discuss how the discussion method fosters collaboration, communication skills, and deeper understanding of legal principles through peer learning.	Practice: Discuss how social science research methods can be used to investigate legal phenomena, understand human behavior, and inform legal policymaking.	Practice: Engage in hands-on exercise by collecting data for identified legal issues by employing qualitative data collection.	Practice: Engage in hands-on exercise by testing the formulated hypotheses.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-12	<i>Practice: Discuss the gaps and challenges in promoting quality legal education including outdated curriculum, ethical and professionalism deficits.</i>	<i>Practice: Discuss the effectiveness of the Socratic method in fostering intellectual curiosity, analytical skills, and confidence in legal reasoning.</i>	<i>Practice: Discuss how socio-legal research methods can be used to explore complex legal issues, understand legal processes, and evaluate the effectiveness of legal reforms.</i>	<i>Practice: Engage in hands-on exercise by collecting data for identified legal issues by employing qualitative data collection</i>	<i>Practice: Engage in hands-on exercise by writing research reports.</i>
SLO-13	<i>Comprehend the recommendations on legal education made by the National Knowledge Commission (NKC), a high-level advisory body to the Government of India.</i>	<i>Comprehend various methods of examination and evaluation used in legal education, including written exams, essays, presentations, and practical assessments.</i>	<i>Comprehend the process of identifying research gaps, formulating research problems based on theoretical and practical considerations.</i>	<i>Comprehend the various sources of legal material including statutes, subordinate legislation, notifications, policy statements, decisional material, foreign judgments, legal databases.</i>	<i>Comprehend and analyze the common statistical and experimental tests used in legal research, including the chi square test, T test, Anova tests</i>
SLO-14	<i>Analyze the findings and recommendations of the 184th Report of the Law Commission of India (LCI) on legal education reforms.</i>	<i>Explore extension activities such as clinical programs, legal aid clinics, legal literacy initiatives, and participation in law reforms.</i>	<i>Comprehend the concept of hypothesis in research, including its role in formulating testable propositions and guiding empirical investigations.</i>	<i>Analyze the importance of the reports of various commissions and committees in legal research.</i>	<i>Examine the ethical principles and standards governing research conduct, including honesty, integrity, objectivity, and respect for human subjects.</i>
SLO-15	<i>Analyze and examine the recommendations of various committees and commissions tasked with reviewing and reforming legal education in India.</i>	<i>Comprehend various law reforms related to legal education.</i>	<i>Comprehend the formulation of clear, specific, research questions, that align with the objectives and scope of the research project.</i>	<i>Identify and analyze the challenges involved in the research process.</i>	<i>Identify the ethical considerations in legal research, such as informed consent, confidentiality, conflicts of interest, and data integrity.</i>
SLO-16	<i>Tutorial: Conduct an in-depth discussion on the Law Commission of India's recommendations and their potential impact on legal education policy, curriculum development, and institutional governance.</i>	<i>Tutorial: Conduct an in-depth discussion on the various assessment and evaluation methods suited for the legal field.</i>	<i>Tutorial: Conduct an in-depth discussion on identifying research gaps, formulating hypothesis and framing research questions</i>	<i>Tutorial: Conduct an in-depth discussion on primary legal sources to understand legal principles, doctrines, and precedents relevant to their research topic.</i>	<i>Tutorial: Conduct in-depth discussions on the structure and components of research reports, including the introduction, literature review, methodology, results, discussion, and conclusion sections.</i>
SLO-17	<i>Practice: Discuss the implementation challenges of the recommendations of the Law Commission of India and their implications for legal education stakeholders.</i>	<i>Practice: Discuss the principles of fair assessment, feedback mechanisms, and strategies for promoting academic integrity and rigor.</i>	<i>Practice: Engage in hands-on exercise by framing the hypothesis for any legal issues</i>	<i>Practice: Discuss various stages of research including the review of literature, research design.</i>	<i>Practice: Discuss various ethical principles associated with legal research.</i>

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-18	Practice: Discuss the implementation challenges of National Knowledge Commission recommendations.	Practice: Discuss the role of extension activities in bridging the gap between theory and practice, promoting access to justice, and fostering social responsibility among law students.	Practice: Engage in hands-on exercise by framing the research question for any legal issues	Practice: Discuss the various stages of research including data collection methods, sampling techniques, and sources of legal and decisional material.	Practice: Engage in hands-on exercise by conducting the research related to the identified legal area.

Course Offering Department	School of Law	Pre-requisite Courses	Co-requisite Courses	Progressive Courses	Data Book / Codes/Standards
----------------------------	---------------	-----------------------	----------------------	---------------------	-----------------------------

Title & Content	INTRODUCTION TO DERIVATIVES	PRICING OF FUTURES AND OPTIONS	TRADING CLEARING AND SETTLEMENT OF OPTIONS AND FUTURES	HEDGING AND STOCK INDEX FUTURES	FINANCIAL DERIVATIVES MARKET IN INDIA
Duration (hour)	18	18	18	18	18
SLO-1	Develop a foundational understanding of Derivatives	Attain a comprehensive understanding of the Pricing of the future Options and Swaps	Critically analyze and evaluate the concept of settlement of Options and Futures	Achieve a nuanced comprehension of diverse regulatory frameworks Hedging and Stock Index Futures	Demonstrate an advanced understanding of Financial Derivatives Market in India
SLO-2	Gain comprehensive knowledge of Features of a Financial Derivative exploring its scope	Develop expertise in managing legal aspects of Concept of Options and Types of Options	Demonstrate advanced expertise in dissecting intricate Financial Futures Contracts	Conduct advanced research on the international legal regime on different concepts and Perfect Hedging Model	Conduct a critical analysis of Need for Derivatives
SLO-3	Analyze the Types of Financial Derivatives	Acquire proficiency in addressing and identity Option Valuation process	Conduct in-depth examinations of Types of Financial Futures Contract	Develop expertise in scrutinizing domestic legal regimes on Basic Long and Short Hedges	Demonstrate advanced proficiency in implementing Major Recommendations of Dr. L.C. Gupta Committee
SLO-4	Tutorial: Analyze a recent case, discussing regulatory aspects and legal frameworks in Types of Financial Derivatives	Tutorial: Analyze cases, compare regulations for Option Positions Naked and Covered Option	Tutorial: Engage students in an advanced workshop focusing on Future Financial Contracts	Tutorial : Explore international and domestic legal regimes Cross Hedging	Tutorial : Explore legal frameworks and implications in an advanced tutorial on Evolution of Derivatives in India
SLO-5	Practice: Students conduct an in-depth analysis of key features of derivatives and its scope,	Practice: Organize a symposium where students present their research findings on options and valuation process	Practice: Organize a symposium for LLM students to present and discuss advanced legal research on options and future financial contracts	Practice: Role-play different scenarios to apply the Indian framework on Hedging and its classifications	Practice: Engage students in a detailed analysis of legal frameworks and implications, encouraging critical thinking and advanced understanding.
SLO-6	Practice: Participants conduct an in-depth analysis of types of financial derivatives and its nature	Practice: Assign students different topics of options and swaps for a discussion	Practice: Establish a research clinic for LL.M. scholars to investigate and analyze the evolving jurisprudence behind Futures and its categories	Practice: Conduct a mock where participants analyze real-world cases Hedging in India and other nations	Practice: Conduct a hands-on simulation where students formulate legal strategies for Financial Derivatives in India and its advancement in India

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-7	Comprehend the legal aspects of Basic Financial derivatives	Conduct legal analyses of issues related to Underlying Assets in Exchange	Acquire proficiency in addressing and identify the Evolution of Futures Market in India	Undertake comprehensive research on the Basis Risk and Hedging	Navigate the legal aspects of Strengthening of Cash Market
SLO-8	Assess the History of Derivatives Markets	Master the legal dimensions of Traded Options	Attain advanced proficiency in Traders in Futures Market in India	Conduct a critical assessment of the Basis Risk Vs Price Risk	Analyze the legal implications of Benefits of Derivatives in India
LO-9	Delve into the Uses of Derivatives	Gain insights into the legal complexities Determinants of Option Prices	Demonstrate sophisticated skills in analyzing Traders in Futures Market in India	Conduct advanced academic research on the legal control mechanisms Hedging Effectiveness	Explore the legal considerations surrounding Categories of Derivatives Traded in India
SLO-10	Tutorial: Simulate a hypothetical scenario to explore legal considerations, contract and break down the critiques of Derivatives	Tutorial: Assign scenarios to students to understand and discuss the Binomial Option Pricing Model	Tutorial: Conduct a tutorial exploring sophisticated strategies for protecting future markets	Tutorial – Dive into the legal intricacies of hedging and its mechanism	Tutorial – Conduct a workshop guiding students in Derivatives Trading at NSE/BSE
SLO-11	Practice: Groups delve into the historical background of derivatives in different markets	Practice: Establish a research forum where students delve into legal dimensions of traded options and determinants of option pricing	Practice: Simulate cross-border IPR negotiations, challenging LLM students to navigate complex legal issues, negotiate agreements, and analyze the implications of international law.	Practice: Organize a research symposium where students present findings on Risks and Hedging, encouraging academic discussion and collaboration.	Practice: conduct an interactive workshop focusing on legal leadership in Derivatives Trading at NSE/BSE, Stock and Cash Market in India
SLO-12	Practice: Learners explore jurisdictional nuances through the critiques of derivatives	Practice: Conduct a review session where students explore binomial option pricing model	Practice: Thematic Legal Writing Workshop: Crafting Advanced Writings on the Intricate Relationship Traders and Future Markets of India	Practice: Engage in a hands-on workshop exploring practical applications of devising a Hedging Strategy	Practice: Organize a debate-style activity where students discuss and analyze legal perspectives on Eligibility of Stocks
SLO-13	Explore the legal implications of Forward Market: Pricing	Develop legal competence in Black-Scholes Option Pricing	Attain an expert-level understanding of the Futures Market Trading Mechanism and its growth	Undertake an in-depth exploration of the Hedging Objectives and its management	Examine the legal frameworks governing the Emerging Structure of Derivatives Markets in India
SLO-14	Analyze the legal aspects of Forward Market: Pricing and Trading Mechanism	Attain proficiency in legal frameworks for Basic Principles of Option Trading,	Exhibit advanced legal research competence, delving deeply into Specification of the Future Contract and Clearing Houses	Perform an analytical study of the Concept of Stock Index and Stock Index Futures	Apply the Regulation of Financial Derivatives in India
SLO-15	Comprehensive understanding of the Forward Contract concept	Develop awareness of jurisdictional issues in SWAP: Concept, Evaluation and Features of Swap	Showcase an advanced appreciation of the multifaceted roles played by Operation of Margins and Settlements	Develop expertise in the Stock Index Futures as a Portfolio management Tool	Showcase advanced legal leadership in Structure of the Market and Trading system

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-16	Tutorial: Facilitate a discussion on Features of Forward Contract and Classification of Forward Contracts	Tutorial: Simulate an insight to Types of Financial Swaps, Interest Rate Swaps and Currency Swap with Debt- Equity Swap	Tutorial: Facilitate a seminar guiding students through complex Theories of Future prices and Aversion	Tutorial: Examine legal aspects of domain disputes, analyzing the Speculation and Stock Index Futures	Tutorial: conduct a seminar focusing on Badla system in Indian Stock Market
SLO-17	Practice: Students perform legal research to identify relevant legal precedents and case law Forward Trading Mechanism and Forward Prices Vs Future Prices	Practice: Facilitate a roundtable discussion focused on various types of concepts of option pricing	Practice: International Dispute Resolution Symposium on Forward Contract Vs. Futures Contracts	Practice: Simulate domain dispute resolution scenarios applying principles from the Stock Index Futures Trading in Indian Stock Market	Practice: Conduct a workshop exploring the legal implications of Regulatory Instruments in trading system in India
SLO-18	Practice: Participants engage in legal research to benchmark forward contracts and trading mechanisms	Practice: Assign students to analyze SWAP and its types in detail	Practice: Advanced Roundtable on Future Contracts and Future Prices in India	Practice: Participate in a legislative drafting challenge where students draft sections aligning with international and domestic legal regimes on Hedging and Sock Index	Practice: Engage students in an exercise highlighting legal considerations in derivative structure and stock market

Code	PLCL24303T	Title	INSOLVENCY AND BANKRUPTCY LAW				Category	Professional Core	L	T	P	C
									3	1	2	5

Course Offering Department	School of Law	Pre-requisite Courses		Co-requisite Courses		Progressive Courses		Data Book / Codes/Standards	
----------------------------	---------------	-----------------------	--	----------------------	--	---------------------	--	-----------------------------	--

Title & Content	INTRODUCTION	RESOLUTION STRATEGIES AND BANKRUPTCY BOARD OF INDIA	LIQUIDATION PROCESS AND ADJUDICATING	PPIRP, DEBT RECOVERY AND SECURITISATION	STATUTORY OFFENCES UNDER INDIAN PENAL CODE AND OTHER STATUTES
Duration (hour)	18	18	18	18	18
SLO-1	Explore the historical background and rationale behind the Bankruptcy Law Reforms Committee's report and the subsequent need for the Insolvency and Bankruptcy Code, 2016.	Attain a comprehensive understanding of the concept of restructuring equity and debt, including the various methods such as debt restructuring, equity infusion, and debt-to-equity swaps.	Examine the legal framework and procedures involved in the initiation of liquidation for corporate debtors, including the roles and responsibilities of the liquidator.	Examine the governing framework of the insolvency and resolution process in the context of non-performing assets (NPAs).	Analyse the applicability of the Insolvency and Bankruptcy Code (IBC) to foreign companies operating in India, including the criteria and procedures involved.
SLO-2	Describe the overall scheme and key concepts outlined in the Insolvency and Bankruptcy Code, including its objectives and scope.	Analyze the implications of restructuring on stakeholders such as shareholders, creditors, and management.	Analyze the powers and duties conferred upon liquidators during the liquidation process, including asset management and distribution.	Identify the eligibility criteria for participation in the Pre-Packaged Insolvency Resolution Process (PPIRP).	Analyse the Cross-border Insolvency Framework and its relevance to foreign companies, exploring how it impacts their assets, liabilities, and operations across different jurisdictions.
SLO-3	Analyze the definitions of important terms and concepts within the Insolvency and Bankruptcy Code, such as "resolution plan," "committee of creditors," and "insolvency resolution process."	Acquire proficiency in addressing identity management issues in the context of e-commerce, ensuring legal compliance and data security.	Conduct in-depth examinations into the concept of a liquidation estate and the intricacies involved in the distribution of assets among creditors.	Analyzing the approval process for PPIRP framework.	Assess the structures and scenarios that are likely to trigger cross-border insolvency provisions, enabling participants to identify potential risks and challenges faced by multinational corporations.
SLO-4	Tutorial: To arrange for discussion on the findings and recommendations of the Bankruptcy Law Reforms Committee.	Tutorial : Analyze cases, compare regulations, and develop compliance strategies for ARC's, culminating in group presentations.	Tutorial: Engage PG students in an advanced workshop focusing on legal research methodologies for understanding the concept of liquidation and its significance in corporate insolvency resolution.	Tutorial: Conduct detailed examination of the eligibility criteria for initiating PPIRP and the procedural requirements for filing an application.	Tutorial : Explore Practical Challenges in Cross-Border Insolvency: Identifying and addressing practical challenges faced by stakeholders in cross-border insolvency cases, including coordination among multiple jurisdictions and recognition of foreign proceedings.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-5	Practice: Conduct Students discussion to analyze and interpret legal provisions governing the contents of resolution plans under the Insolvency and Bankruptcy Code, identifying key elements and requirements.	Practice: Organize a symposium where students present their research findings on recent developments and legal challenges in IBC regulations, fostering discussions on emerging trends.	Practice: Organize discussions examining the procedures and mechanisms for adjudicating insolvency resolution and liquidation cases for corporate entities.	Practice: Examine the approval process for resolution plans under PPIRP, including the role of creditors and regulatory authorities.	Practice: Case Studies and Practical Examples: Reviewing case studies and practical examples of cross-border insolvency cases to illustrate key concepts, challenges, and solutions.
SLO-6	Practice: Participants conduct group discussion on the submission process for resolution plans, including understanding the documentation required and the procedural steps involved.	Practice: Students will engage in role-playing exercises to simulate negotiation and mediation processes among creditors, debtors, and other parties involved in corporate restructuring, enhancing their conflict resolution skills.	Practice: Examining the procedures and mechanisms for adjudicating insolvency resolution and liquidation cases for corporate entities.	Practice: Discussion on the options available to banks and financial institutions for resolving disputes related to NPAs, including application to the Tribunal or Appellate Tribunal.	Practice: Conduct a hands-on simulation on Emerging Trends and Developments: Analyzing emerging trends and developments in cross-border insolvency, including the impact of globalization, technology, and regulatory reforms.
SLO-7	Identify the institutions established under the Insolvency and Bankruptcy Code, 2016, and explain their roles and responsibilities in the insolvency resolution process.	Conduct legal analyses of compromise and arrangement in the context of corporate restructuring, including its legal framework and applicability under company law.	Comprehend the process of dissolution of a corporate debtor following successful liquidation proceedings.	Explore the mechanisms and regulations governing Asset Reconstruction Companies (ARCs).	Trace the evolution of cross-border insolvency regimes globally, examining historical developments and key milestones that have shaped international insolvency laws.
SLO-8	Comprehend the legal provisions governing the contents, submission, and approval of resolution plans under the Insolvency and Bankruptcy Code.	Evaluate the advantages and disadvantages of utilizing compromise and arrangement as a restructuring mechanism.	Acquire knowledge of the procedures governing voluntary liquidation and the steps involved in initiating such proceedings.	Examine the Security Interest (Enforcement) Rules of 2002 and their implications for banks.	Explore global developments in cross-border insolvency, including trends, challenges, and best practices adopted by various countries and international organizations.
SLO-9	Analyze the procedure for submitting and approving resolution plans, including the role of the Committee of Creditors and the steps involved in the approval process.	Gain insights into the legal complexities of acquisition, takeover, and change of management, elucidating their significance in corporate restructuring and control transitions.	Explore the effects of liquidation on the corporate debtor and its stakeholders, including creditors, shareholders, and employees.	Evaluate the options available to banks for dealing with NPAs, including SARFAESI Act and Debt Recovery Tribunals (DRT).	Studying the foreign applicability of IBC regulations, understanding their principles and implications for cross-border insolvency proceedings.
SLO-10	Tutorial: Analyze hypothetical scenarios related to the submission and approval of resolution plans under the Insolvency and Bankruptcy Code, applying legal provisions and considering the interests of stakeholders.	Tutorial: Assign scenarios, for Students to develop skills in drafting and reviewing legal documents, including compromise agreements, acquisition proposals, and asset sale contracts, necessary for implementing restructuring plans.	Tutorial: Conduct a tutorial exploring the functions of appellate authority and the process for filing appeals against decisions of the NCLT.	Tutorial – Explore asset reconstruction companies (ARCs) and their role in acquiring and resolving distressed assets.	Tutorial – Conduct a workshop guiding students in formulating legal strategies for examination of foreign assets, liabilities, and operations, and structures likely to trigger cross-border insolvency provisions.
SLO-11	Practice: Groups to Practice evaluating and assessing resolution plans for approval within the framework of the Insolvency and Bankruptcy Code, considering the interests of various stakeholders and compliance with legal requirements.	Practice: Establish a research forum where students delve into the complexities of e-commerce taxation laws, presenting their findings on global and regional tax implications for online businesses.	Practice: Conduct discussion for understanding the procedures and criteria for initiating insolvency resolution for individual and partnership debtors.	Practice: Draft resolution plans and restructuring proposals in compliance with regulatory requirements and stakeholder interests.	Practice: Discussion on the applicability and relevance of international standards and best practices in shaping domestic insolvency laws and regulations.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-12	Practice: Learners to develop a comprehensive checklist or template for documenting resolution plans, critically evaluate the effectiveness of incorporating all necessary elements and considerations specified in the Insolvency and Bankruptcy Code and related regulations.	Practice: Students to present case studies and participate in discussions to critically evaluate the effectiveness of fast-track processes in facilitating timely and efficient corporate restructuring outcomes, considering legal, financial, and ethical considerations.	Practice: Students to present analysis of the powers and duties of the resolution professional appointed for individual and partnership insolvency cases.	Practice: Engage in a hands-on workshop simulating negotiation and mediation sessions to facilitate consensus among creditors, debtors, and resolution applicants in the resolution process.	Practice: Organize case studies and scenario analysis to understand the practical implications of cross-border insolvency provisions on multinational corporations and foreign entities operating in India.
SLO-13	Compile the necessary documentation required for the submission and approval of a resolution plan under the Insolvency and Bankruptcy Code.	Examine the legal and regulatory requirements governing acquisitions and takeovers, including disclosures and approval processes.	Analyse the role of the National Company Law Tribunal (NCLT) as the adjudicating authority for insolvency resolution and liquidation of corporate persons, including its jurisdictional scope.	Explore the application process to the Tribunal/Appellate Tribunal for resolution of NPAs.	Examine the World Bank Principles for Effective Insolvency and Creditor Rights and the Asian Development Bank (ADB) principles of Corporate Rescue and Rehabilitation, gaining insights into international standards and guidelines for insolvency regimes.
SLO-14	Demonstrate knowledge of the appearance and participation requirements for stakeholders involved in the insolvency resolution process, including creditors, debtors, and resolution professionals.	Attain proficiency in legal frameworks for consumer protection in e-commerce, ensuring fair practices and addressing disputes.	Examine the criteria and process for the appointment of liquidators, along with the determination of their remuneration.	Assess the implications and considerations for closure of PPIRP proceedings.	Analyze the perspectives and approaches of different countries towards cross-border insolvency, including case studies from the UK, Canada, UAE, Singapore, and other relevant jurisdictions.
SLO-15	Evaluate the significance of obtaining approval for a resolution plan within the framework of the Insolvency and Bankruptcy Code, considering its implications for creditors, debtors, and the overall economy.	Develop awareness of jurisdictional issues in e-commerce and acquire skills in international trade dispute resolution, considering legal frameworks and mechanisms.	Analyse the grounds for lodging appeals against orders of liquidation, the process for appealing to higher authorities such as the Supreme Court on questions of law, and the penalties for fraudulent conduct during the liquidation process.	Analyze the intricacies of approval processes for resolution plans within the PPIRP framework, enabling participants to evaluate and devise strategies for successful resolution of distressed assets.	Comprehend the United States Bankruptcy Code and its significance in the context of cross-border insolvency, comparing and contrasting its provisions with international standards and practices.
SLO-16	Tutorial: to conduct legal research to develop a framework for documenting resolution plans, ensuring compliance with regulatory standards and addressing specific requirements outlined in the Code.	Tutorial: Simulate a scenario to analyze case studies and real-life examples to understand the practical challenges and successful outcomes associated with fast-track corporate restructuring processes.	Tutorial: Facilitate a seminar guiding students through complex cross-border IPR dispute resolution scenarios, applying advanced legal principles and examining international frameworks.	Tutorial: Examining financial statements, due diligence reports, and asset valuation exercises to assess the viability and feasibility of resolution plans.	Tutorial: Evaluate practical challenges and strategies for managing cross-border insolvency cases, including coordination among multiple jurisdictions, recognition of foreign proceedings, and enforcement of judgments.
SLO-17	Practice: Participate in mock appearances before relevant authorities or stakeholders involved in the insolvency resolution process, honing communication and negotiation skills while presenting or defending resolution plans.	Practice: Facilitate a roundtable discussion focused on legal research in understanding the challenges of key stakeholders involved in the proceedings.	Practice: Draft and review liquidation documents, including notices, resolutions, and reports, required for initiating and completing the liquidation process.	Practice: Analyze case studies and real-world examples to understand the practical application of the discussed frameworks and processes.	Practice: Discuss emerging trends and developments in cross-border insolvency, such as the impact of globalization, technological advancements, and regulatory reforms on multinational insolvency proceedings.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-18	Practice: Apply the procedural steps outlined in the Insolvency and Bankruptcy Code for the submission of resolution plans to a hypothetical insolvency scenario, ensuring compliance with documentation requirements and timelines.	Practice: Assign students to analyze legal precedents related to the functions performed by the IBB, including formulating regulations, promoting transparency, and enhancing confidence in the corporate insolvency resolution process.	Practice: Conduct due diligence and asset valuation exercises to facilitate the distribution of assets among creditors during liquidation.	Practice: Formulate strategies for effective management and resolution of NPAs within the legal and regulatory framework provided.	Practice: Formulate strategies and recommendations for stakeholders involved in cross-border insolvency cases, including legal practitioners, insolvency professionals, creditors, and multinational corporations, to effectively navigate complex international insolvency issues.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

Code	PLCL24304T	Title	CORPORATE TAXATION	Category	Professional Core (Elective)	L	T	P	C
						3	1	2	5

Course Offering Department	School of Law	Pre-requisite Courses	Co-requisite Courses	Nil	Progressive Courses	Nil	Data Book / Codes/Standards	
Title & Content	FUNDAMENTALS OF CORPORATE TAXATION	INCOME TAX	WEALTH TAX AND SALES TAX, EXCISE, CUSTOMS AND SERVICE TAX		GOODS AND SERVICE TAX	INTERNATIONAL TAXATION		
Duration (hour)	18	18	18		18	18		
SLO-1	Identify the constitutional principles influencing the development of income tax regulations.	Identify the distinctions between Indian companies, domestic companies, and foreign companies, gaining insights into legal classifications and implications for taxation.	Analyse the principles of chargeability under wealth tax and the significance of valuation dates in wealth computation.		Comprehend the rationale behind the implementation of Goods and Services Tax (GST), recognizing the need for a unified and simplified taxation system.	Identify the foundational concepts of international taxation, understanding its significance and the evolving landscape in the era of globalization.		
SLO-2	Explain and comprehend the scope and implications of extra-territorial applications in income tax laws.	Explain the unique features of public sector companies and those in which the public is substantially interested (Section 2(18)), analyzing their tax implications.	Examine the distinction between various categories of assets and their respective rates, developing a comprehensive knowledge of the GST assets, enhancing their ability to identify taxable wealth components.		Examine the different types of GST and their respective rates, developing a comprehensive knowledge of the GST taxation structure.	Explore the historical development of international taxation principles, recognizing key milestones that have shaped its current framework.		
SLO-3	Analyse fundamental principles that underlie tax laws	Comprehend special provisions for Infrastructure Capital Companies, undertakings in SEZs, and 100% Export Oriented Units (Sections 10A, 10AA, 10B, 10BA), and applying them to real-world scenarios.	Analyse assets exempt from wealth tax, demonstrating knowledge of criteria for exclusion from taxable wealth.		Gain a comprehensive understanding of the broader scope of supply under GST, distinguishing between goods and services and understanding the nuances presented by a connected global economy.	Analyze the influence of globalization on international taxation, identifying trends, challenges, and opportunities presented by a connected global economy.		
SLO-4	Tutorial: Explore the historical development of tax laws within the constitutional framework.	Tutorial: Discuss comprehensive understanding of different types of companies and their tax implications.	Tutorial: Engage in hands-on experience in computing wealth tax and applying valuation techniques.		Tutorial: Analyze the classification of goods and services for GST, understanding the nuances of different types and their corresponding rates. Topics:	Tutorial: Examine the legal frameworks governing international taxation, exploring key treaties, agreements, and legal principles.		
SLO-5	Practice: Analyze case studies to understand the constitutional foundation of tax laws in a specific jurisdiction.	Practice: Examine different types of companies, including Indian, domestic, foreign, public sector, and those in which the public is substantially interested.	Practice: Examine computing wealth tax and applying valuation techniques for diverse assets.		Practice: Evaluate the calculation of GST for various types of supplies, distinguishing between goods and services and applying the relevant GST rates.	Practice: Analyze historical international tax cases, identifying key legal principles, and understanding the evolution of international taxation concepts.		
SLO-6	Practice: Engage in discussion on landmark cases illustrating the interpretation and application of these principles.	Practice: Explore special provisions related to Infrastructure Capital Company, newly established undertakings in SEZs, and export-oriented units (Sections 10A, 10AA, 10B, 10BA).	Practice: Engage in hands-on exercises to understand the step-by-step process of filing wealth tax returns and complying with regulations.		Practice: Simulate the GST registration process, completing the necessary documentation, and understanding the exemptions and exceptions.	Practice: Examine and compare different transfer pricing methods to real-world scenarios, ensuring accuracy in determining arm's length prices. Activities: Case simulations, hands-on exercises, and group		

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

				discussions on transfer pricing challenges.
SLO-7	Comprehend the legal understanding of how tax laws apply to different corporate structures.	Analyze case studies and practical scenarios to calculate taxes on profit and gains of business or profession, developing proficiency in computing business income taxes.	Gain an understanding of the treatment of debts owed in wealth computation, and gain proficiency in asset valuation methods for accurate wealth assessment.	Examine the difference between taxable supplies of goods and services, gaining insights into the criteria that determine the taxability of a supply.
SLO-8	Discuss essential components of taxation, including deductions, exemptions, and allowances.	Analyze the principles of capital gains taxation, distinguishing between short-term and long-term gains, and apply this knowledge to practical examples.	Determine the imposition of wealth tax, the importance of registration, and security requirements, ensuring awareness of legal obligations.	Examine the concept of 'aggregate annual turnover,' a crucial parameter for GST compliance, and its implications on the GST registration threshold.
SLO-9	Comprehend scenarios representing various business structures and income sources.	Evaluate the loss scenarios, applying set-off provisions, and strategically planning for the carry-forward of losses.	Gain an understanding on how to prepare returns, undergoing assessments, and calculating tax liabilities with interest, ensuring compliance with wealth tax regulations.	Analyze the impact of GST on the import and export of goods and services, gaining insights into the complexities and interpretation that influence cross-border tax relations.
SLO-10	Tutorial: Conduct in-depth discussions on fundamental tax principles and their applications.	Tutorial: Explain the taxation of business income, capital gains, and the intricacies of loss set-off and carry-forward.	Tutorial: Discuss the process of filing wealth tax returns and compliance procedures.	Tutorial – Discuss step-by-step walkthrough of the GST registration process, understanding the required documentation and potential exemptions.
SLO-11	Practice: Conduct a workshop on essential concepts and provisions related to companies under the Income Tax Act.	Practice: Engage in practical exercises analyzing financial statements and scenarios to compute taxable income and capital gains.	Practice: Explore the ways in which objections can be raised, file appeals, and resolve disputes related to wealth tax assessments.	Practice: Analyse double taxation scenarios, applying the principles of Double Taxation Avoidance Agreements (DTAA) to resolve issues and ensure fair tax treatment.
SLO-12	Practice: Explain and discuss essential components of taxation, such as deductions, exemptions, and allowances.	Practice: Analyze case studies involving loss situations, determine the eligibility for set-off, and compute the impact on future tax liabilities.	Practice: Examine scenarios involving charge of customs duty, preparation of bills of entry, and adherence to import/export regulations.	Practice: Engage in hands-on exercises to file GST returns online, understanding the different types of returns and the submission process.
SLO-13	Explore the lessons for effective tax planning strategies for individuals.	Explain incentives and deductions available under Section 80, evaluating their impact on tax liabilities.	Acquire knowledge and skills related to raising objections, filing appeals, and resolving disputes in the context of wealth tax assessments.	Comprehend the GST return filing process, understanding the various types of returns and the online procedures involved in compliance.
SLO-14	Analyze the impact of legislative changes on individuals and businesses.	Understand the consequences of penalties and prosecutions related to non-compliance, analyzing case studies to identify potential legal implications.	Gain an understanding of the implications of penalties and offences, ensuring awareness of consequences and preventive measures in wealth tax matters.	Comprehend the concept of E-way bills, exploring their significance in the movement of goods and services, and understanding the implementation process.
				Examine the legal frameworks governing international taxation, focusing on bilateral and multilateral agreements that shape cross-border taxation policies.
				Explore the role and importance of Double Taxation Avoidance Agreements, exploring their provisions and impact on cross-border taxation.
				Analyze tax treaties and their interpretation, focusing on the principles of interpretation that influence cross-border tax relations.
				Tutorial – Analyze the practical application of transfer pricing methods, ensuring accurate determination of arm's length prices.
				Practice: Analyse double taxation scenarios, applying the principles of Double Taxation Avoidance Agreements (DTAA) to resolve issues and ensure fair tax treatment.
				Practice: Engage in developing tax planning strategies involving tax havens, exploring legal structures and implications for international tax planning. Activities: Case simulations, scenario analysis, and group discussions on tax planning with tax havens.
				Examine the role of tax havens in international tax planning, understanding their features, legal structures, and implications on global taxation.
				Explore various tax avoidance strategies employed globally, gaining insights into countermeasures and anti-avoidance provisions implemented by tax authorities.

FACULTY OF LAW
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

SLO-15	Explore the ethical dimensions of taxation for individuals and corporations.	Comprehend the tax implications related to income received from Venture Capital Companies and Venture Capital Funds, applying Section 115U to practical situations.	Comprehend the processes of levy, collection, and procedural aspects of wealth tax, including search, seizure, and confiscation procedures.	Identify common challenges in GST compliance and explore best practices to ensure accurate and timely adherence to GST regulations.	Examine the challenges posed by Base Erosion and Profit Shifting, exploring the OECD's BEPS Action Plan and its impact on international tax principles.
SLO-16	Tutorial: Provide an overview of tax planning strategies for companies under the Income Tax Act.	Tutorial: Explain the incentives, deductions, and special provisions available to companies under Section 80 and other relevant sections.	Tutorial: Analyze case scenarios, simulate objection filing and appeal processes, and engage in discussions on dispute resolution strategies.	Tutorial: Gain an understanding of the practical insights into the implementation of E-way bills for the seamless movement of goods, understanding the key details and compliance considerations.	Tutorial: Analyze contemporary challenges in international taxation through real-world case studies, exploring solutions and best practices.
SLO-17	Practice: Evaluate participants' ability to navigate complexities in determining tax on business income.	Practice: Evaluate case studies to identify ineligible incentives and deductions, calculating the resulting tax benefits.	Practice: Discussion related to service tax, understanding exemptions, and handling service tax implications on government departments and public authorities.	Practice: Analyze generating E-way bills for the movement of goods, understanding the necessary details and compliance requirements.	Practice: Identify and address BEPS challenges, applying OECD's BEPS Action Plan to real-world scenarios.
SLO-18	Practice: Enhance participants' critical thinking and problem-solving skills in addressing complex tax issues for companies.	Practice: Assign and analyze case studies involving dividend distribution and venture capital income, calculating tax liabilities.	Practice: Examine penalties and offences in wealth tax, customs duty, and service tax scenarios.	Practice: Analyze case studies presenting real-world GST compliance challenges, identifying issues, and proposing solutions.	Practice: Engage in discussion on scenario analysis, and presentations on future trends in global taxation.

Title & Content		HISTORY AND DEVELOPMENT OF INVESTMENT LAW		INVESTMENT IN NON-BANKING FINANCIAL INSTITUTIONS (NBFC)		ALTERNATIVE INVESTMENT FUNDS		FOREIGN EXCHANGE CONTROL REGIME IN INDIA AND DISPUTE RESOLUTION		FOREIGN INVESTMENT AND PROTECTION								
Duration (hour)		18		18		18		18		18								
SLO-1		Acquire knowledge of fundamental principles and concepts of investment law, laying the groundwork for a comprehensive study of securities regulations.		Acquire knowledge of the nature of Non-Banking Financial Institutions (NBFI) and their crucial role in the financial sector.		Comprehend Alternative Investment Funds (AIFs), explaining their role in the financial markets and how they differ from traditional investment options.		Examine the intricate aspects of foreign exchange regulation and acquire knowledge of the fundamental differences between FEMA (Foreign Exchange Management Act) and FERA (Foreign Exchange Regulation Act).		Examine the significant role of international economic law in navigating the complex global economic landscape.								
SLO-2		Explore the historical development of securities regulations, tracing the roots from early financial markets to the complex regulatory frameworks of today.		Explore the legal foundations governing NBFI, analyzing key statutes and regulations that shape their operations, ensuring a solid grasp of the regulatory environment.		Examine the regulatory landscape governing AIFs, exploring the legal frameworks and compliance requirements that shape their operation.		Explore the historical context behind the evolution of foreign exchange regulations in India, tracing the transition from FERA to FEMA and the reasons behind this legislative shift.		Identify the essence of International economic law encompasses a wide range of rules and regulations that govern cross-border economic transactions and interactions between states.								
SLO-3		Examine essential legal terms and concepts pertinent to investment and securities, providing a solid foundation for subsequent chapters and practical application.		Examine the intricacies of obtaining licenses and authorizations for NBFI operations, examining the criteria and procedures set forth by relevant regulatory bodies.		Explore the various categories of AIFs, such as hedge funds, private equity funds, and real estate funds, emphasizing the distinct characteristics and investment strategies associated with each.		Deduce the primary objectives of FEMA, which include facilitating external trade and payments, promoting orderly development and maintenance of the foreign exchange market, and fostering a conducive environment for foreign investment.		Examine the historical development of regulatory frameworks provides insights into the changing dynamics of international economic relations.								
SLO-4		Tutorial: Deduce the roles and responsibilities of government agencies in regulating investment and securities markets, including their historical evolution and contemporary functions.		Tutorial: Deduce the principles and practices of corporate governance within NBFI, emphasizing regulatory expectations and the importance of maintaining ethical standards.		Tutorial: Explore the structural components of AIFs, detailing the process of their formation, including legal documentation, fund managers, and investor relations.		Tutorial: Conduct a detailed comparative analysis of FERA and FEMA, highlighting the key differences in their approach, scope, and impact on legal structures that facilitate cross-businesses and individuals involved in foreign transactions.		Tutorial: Comprehend international economic law, exploring its evolution and key principles. will delve into the border economic activities.								
SLO-5		Practice: Delve into various theories and models that underpin investor protection, examining how legal frameworks have evolved to safeguard investor interests.		Practice: Investigate the unique risks associated with NBFI activities, and how regulatory frameworks mandate effective risk management strategies to ensure financial stability.		Practice: Examine the diverse investment strategies employed by AIFs, ranging from traditional asset classes to more complex and niche opportunities.		Practice: Identify the entities designated as 'authorized persons' under FEMA and comprehend their roles in facilitating foreign exchange transactions.		Practice: Gain an understanding of multilateral trade agreements, such as the World Trade Organization (WTO), highlighting their importance in regulating trade relations among nations.								
SLO-6		Practice: Explore international perspectives on securities regulation, emphasizing the interconnected nature of global financial markets.		Practice: Examine the specific capital adequacy requirements imposed on NBFI to safeguard against financial risks.		Practice: Discuss risk mitigation and management strategies within the context of AIFs, considering the unique regulations and restrictions imposed by		Practice: Delve into the realm of capital account transactions, exploring the regulations and restrictions imposed by		Practice: Examine Bilateral Investment Treaties, exploring how these agreements are crafted to protect and

	of global financial markets and the need for harmonized legal frameworks.	instability, exploring methods for compliance.	challenges and uncertainties associated with alternative investments.	FEMA to ensure the stability of the country's economic and financial system.	promote investments between two countries, fostering economic cooperation.
SLO-7	Gain insights into the diverse range of financial instruments, from traditional stocks and bonds to modern derivatives, and their significance in contemporary investment landscapes.	Focus on the regulatory measures in place to protect consumers engaging with NBFI, emphasizing transparency, and dispute resolution mechanisms.	Deduce the methodologies used for valuing alternative assets within AIFs, highlighting the importance of accurate valuation in the fund management process.	Examine the concept of current and capital account convertibility.	Explore ISDS mechanism, a vital component of international investment law, to learn about its role in resolving disputes between investors and state
SLO-8	Examine the legal structures governing the different market, such as brokers, investment advisors, and issuers, to comprehend their roles and obligations.	Explore the stringent AML and CTF regulations applicable to NBFI, emphasizing the importance of due diligence and reporting in preventing financial crimes.	Explore the methods AIFs employ to raise capital and maintain positive relationships with investors, emphasizing transparency and communication.	Explore the adjudication process and penalties associated with violations of FEMA provisions, emphasizing the importance of compliance in the international financial landscape.	Acquire an understanding of the interplay between international and national regulatory frameworks is crucial.
SLO-9	Analyze the legal obligations related to risk disclosure, emphasizing the importance of transparent communication between issuers and investors.	Gain insights into the various investment products and services offered by NBFI and additionally acquire knowledge of the regulatory framework that governs their development and distribution.	Examine the legal and compliance aspects of AIFs, including regulatory reporting, disclosure requirements, and adherence to anti-money laundering (AML) laws.	Explore the regulatory framework governing Foreign Direct Investment (FDI) under FEMA, analyzing the policies aimed at attracting and regulating foreign capital inflow.	Examine how international economic and investment laws incorporate sustainable practices.
SLO-10	Tutorial: Investigate historical cases of securities fraud, learning from past instances to appreciate the evolving strategies for detecting and preventing fraudulent activities.	Tutorial: Examine the regulations promoting fair market conduct and ethical practices within the NBFI sector, ensuring a level playing field for all market participants.	Tutorial: Analyze the tax implications associated with AIFs, addressing both fund-level and investor-level considerations to provide a comprehensive understanding of the Acquire knowledge of.	Tutorial: Gain insights into the regulations governing External Commercial Borrowings (ECB) under FEMA, examining the criteria and conditions for availing foreign loans.	Tutorial: Examine the role of global financial institutions in shaping international economic law and investment practices, emphasizing their influence on economic stability.
SLO-11	Practice: Trace the historical development of securities exchanges, from traditional floor-based trading to modern electronic platforms, to explore the regulatory implications of these changes.	Practice: Deduce the supervisory mechanisms in place for NBFI, exploring the powers and responsibilities of regulatory bodies in enforcing compliance and ensuring accountability.	Practice: Explore the metrics and benchmarks used to assess the performance of AIFs, emphasizing the importance of accurate reporting to stakeholders.	Practice: Examine the importance of compliance with FEMA provisions for businesses engaging in international trade, emphasizing the need for a robust framework to navigate foreign exchange transactions.	Practice: Explore the intersection of law, human rights, and corporate responsibility, the session will discuss how regulatory frameworks address ethical considerations in international business.
SLO-12	Practice: Assess the impact of technological advancements on securities markets and the challenges posed by innovations such as high-frequency trading and blockchain technology.	Practice: Analyze the legal considerations and challenges associated with NBFI engaging in cross-border operations, including regulatory harmonization and compliance with international standards.	Practice: Examine the various exit strategies employed by AIFs, including initial public offerings (IPOs), secondary market sales, and other mechanisms for maximizing returns.	Practice: Deduce the pivotal role played by the Reserve Bank of India (RBI) in implementing and enforcing foreign exchange regulations, ensuring stability and transparency in the financial system.	Practice: Engage in discussions pertaining to the concept of global economic governance, examining how various entities collaborate to create a stable and fair international economic environment.
SLO-13	Examine legal provisions designed to protect the rights and interests of minority shareholders, promoting a fair and equitable investment environment.	Explore the legal aspects of technological advancements within NBFI, addressing issues such as digital banking, fintech partnerships, and data protection.	Compare and contrast AIF regulations across different jurisdictions, providing insights into the global landscape of alternative investments.	Explore the anti-money laundering measures incorporated in FEMA to prevent illicit financial activities and maintain the integrity of the foreign exchange market.	Comprehend how nations and entities ensure adherence to international economic and investment laws.
SLO-14	Articulate the primary objectives and scope of the ICSID Convention.	Acquire profound knowledge of the regulatory framework established by the	Discuss the growing importance of ESG factors in AIF investment decisions,	Stay abreast of the latest developments and amendments in FEMA,	Analyse regulatory challenges faced in emerging markets and how international

Title & Content	INTRODUCTION TO COMPETITION LAW	ANTI-COMPETITIVE AGREEMENTS	REGULATION OF ABUSE OF DOMINANT POSITION AND REGULATION OF COMBINATIONS	CORPORATE LAW AND ANTITRUST REGULATIONS: LEGAL DYNAMICS	ENFORCEMENT MECHANISM AND EMERGING TRENDS
Duration (hour)	18	18	18	18	18
SLO-1	Develop a foundational understanding of the historical development and objectives of competition law in key jurisdictions including the USA, UK, Europe, and India..	Attain a comprehensive understanding of the appreciable adverse effect, horizontal and vertical agreements, cartelization, and other key terms in competition law.	Attain a comprehensive understanding of the concept of dominance in the market and its relevance in the context of the Competition Act 2002.	Gain a comprehensive understanding of antitrust regulations and their role in shaping corporate decision-making processes, particularly within the context of board governance.	Grasp the various enforcement mechanisms established by the Competition Act 2002, including the roles of the Competition Commission of India (CCI), Director General of Investigation (DGI), and Competition Appellate Tribunal (CAT).
SLO-2	Analyze the relevant provisions of the Sherman Antitrust Act and its significance in shaping competition law in the United States..	Apply the effects doctrine to analyze the potential anti-competitive effects of a given agreement or behavior.	Demonstrate advanced expertise in dissecting and identifying the criteria used to define relevant markets and analyze their significance in determining market dominance.	Explore the influence of competition law on corporate governance structures and practices, including the duties and responsibilities of board members in ensuring compliance with antitrust regulations.	Analyze the constitution, powers, and functions of the CCI, including its authority to investigate anti-competitive practices, impose penalties, and promote competition advocacy.
SLO-3	Evaluate the evolution of competition law in India, including an overview of the Monopolies and Restrictive Trade Practices (MRTP) Act, 1969.	Analyze the characteristics and implications of concerted practices and parallel behavior in competition law enforcement.	Evaluate various forms of abusive conducts prohibited under the Competition Act 2002, including predatory pricing, exclusive dealing, and refusal to deal.	Review the key antitrust considerations that arise in evaluating corporate transactions such as mergers, acquisitions, and joint ventures, including the criteria used to assess potential anti-competitive effects.	Examine the jurisdiction of the CCI in adjudicating cases related to competition law violations and understand the appellate process for challenging CCI decisions before the Competition Appellate Tribunal (CAT).
SLO-4	Tutorial: Analyze a recent competition law case, discussing regulatory aspects and legal frameworks of competition law.	Tutorial: Analysis of real-world cases involving horizontal agreements among competitors.	Tutorial: Discussion on the concept of dominance in the market and its relevance in competition law, using examples to illustrate how market power can be abused.	Tutorial: Discussion on the duties and responsibilities of board members in overseeing antitrust compliance.	Tutorial: Explore legal frameworks and implications in an advanced tutorial on Competition Law.
SLO-5	Practice: Students conduct an in-depth analysis of key competition law legislations, examining their provisions, amendments, and relevant legal precedents.	Practice: Create hypothetical scenarios illustrating the formation and operation of cartels, and propose strategies for detecting and combating them.	Practice: Organize a symposium for LLM students to present and discuss the relevant markets, abusive conducts, penalties, and prevention measures.	Practice: Conducting a mock board meeting to review antitrust compliance policies and procedures.	Practice: Discussion on the jurisdiction of the CCI in adjudicating competition law cases and handling appeals.

SLO-6	Practice: Participants conduct legal research on the regulatory frameworks and procedures of CCI.	Practice: Assign students to develop a framework for assessing the relevant market and determining market power in a specific industry.	Practice: Discuss strategies and best practices for preventing abuse of dominance in the market, including compliance programs, internal controls, and training initiatives.	Practice: Scenario-based exercises to identify potential antitrust risks in pricing strategies, distribution channels, and contractual agreements.	Practice: Students conduct an in depth analysis of the adjudication process followed by the CAT, including procedural requirements and timelines.
SLO-7	Examine the recommendations and implications of the Raghavan Committee Report on competition policy and law in India.	Examine the elements of predatory behavior and discriminatory practices in the context of abuse of dominant position.	Examine the penalties imposed for engaging in abusive conducts under the Competition Act 2002 and their implications for businesses.	Analyze how competition law influences pricing strategies adopted by companies, including discussions on price-fixing, predatory pricing, and the implications of antitrust regulations on pricing decisions.	Explore the role and responsibilities of the DGI in conducting investigations into alleged violations of competition law, gathering evidence, and assisting the CCI in enforcement actions.
SLO-8	Evaluate the importance of international cooperation in enforcing competition law, including relevant provisions in WTO agreements.	Evaluate the legality and potential anti-competitive effects of a resale price maintenance agreement in a given market context.	Explore strategies and measures for preventing abuse of dominance in the market, including compliance programs and competition advocacy.	Conduct a critical assessment of the UNCITRAL Model Law on Electronic Commerce 1996, exploring its significance and effectiveness in regulating electronic transactions.	Evaluate the concept of competition advocacy and its importance in promoting competition culture and informing policy decisions, both in India and other foreign jurisdictions.
SLO-9	Delve into the establishment, composition, and duties of the Competition Commission of India (CCI) as the primary regulatory authority for competition matters.	Gain insights into the effectiveness of competition law provisions in deterring predatory pricing practices.	Differentiate between merger, acquisition, amalgamation, and takeover as different forms of combinations in the corporate context	Examine the impact of competition law on distribution channels, including vertical agreements, exclusive dealing arrangements, and territorial restrictions, and discuss their compliance with antitrust regulations.	Analyze the relationship between intellectual property rights (IPR) and competition law, examining issues such as anti-competitive behavior related to patent misuse, abuse of dominant position, and technology transfer agreements.
SLO-10	Tutorial: Discussion to understand the importance of international cooperation in enforcing competition law, focusing on relevant provisions in WTO agreements and their impact on domestic competition policies.	Tutorial: Assign scenarios, for Identification of anti-competitive practices and their impact on market competition.	Tutorial: Conduct a tutorial explaining the procedures followed by competition authorities in investigating alleged violations of the Competition Act 2002, imposing penalties, and enforcing compliance with regulatory provisions.	Tutorial – Dive into the ethical considerations and corporate social responsibility in the context of antitrust regulations, examining case studies to understand the ethical implications of antitrust violations and the importance of ethical behavior in promoting fair competition and compliance.	Tutorial – Case studies highlighting successful competition advocacy campaigns and their impact on market competition.

SLO-11	Practice: Simulate a mock inquiry procedure of the Competition Commission of India (CCI), exploring its investigatory powers and decision-making process.	Practice: Simulation of a cartel formation scenario, followed by discussions on detection methods and enforcement strategies.	Practice: Analyze real-world case studies of companies found guilty of abusive conduct under the Competition Act 2002, examining the specific behaviors that led to penalties and the resulting impact on competition and consumers.	Practice: Participants will review antitrust considerations in evaluating corporate transactions, including mergers, acquisitions, and joint ventures, and understand how competition law influences decision-making processes to mitigate potential anti-competitive effects.	Practice: Conducting a simulated investigation into an alleged violation of competition law, with participants taking on roles as investigators, legal advisors, and respondents.
SLO-12	Practice: Design a competition advocacy campaign aimed at raising awareness about the benefits of competition and combating anti-competitive practices.	Practice: Conducting a mock investigation into bid rigging and collusive bidding practices.	Practice: Create a hypothetical merger scenarios involving horizontal, vertical, and conglomerate mergers, considering their potential effects on competition and applying the criteria outlined in the Competition Act 2002.	Practice: Participants will analyze the impact of competition law on corporate governance structures and practices, evaluating the duties and responsibilities of board members in overseeing antitrust compliance and mitigating legal risks.	Practice: Drafting investigation reports and presenting findings to a mock CCI panel for adjudication.
SLO-13	Explore the procedure for inquiry and the powers vested in the CCI for investigating anti-competitive practices and promoting fair competition.	Analyze case studies of bid rigging and collusive bidding, identifying the parties involved, the impact on competition, and potential enforcement actions.	Classify mergers into horizontal, vertical, and conglomerate categories and assess their potential impact on competition.	Explore the intersection of contractual agreements and antitrust regulations, focusing on issues such as restrictive covenants, non-compete clauses, and their implications for competition.	Explore the intersection of international trade law and competition law, focusing on issues such as anti-dumping measures, competition policy in trade agreements, and the role of international organizations in promoting competition.
SLO-14	Analyze the role and function of the Competition Fund in supporting initiatives aimed at promoting competition and consumer welfare.	Examine the factors that influence the determination of relevant markets and assess their significance in competition law analysis.	Analyze the combinations covered under the Competition Act 2002 and the regulatory framework governing such transactions.	Discuss ethical considerations and corporate social responsibility in the context of antitrust regulations, emphasizing the importance of ethical behavior, fair competition, and adherence to legal norms.	Examine the unique challenges posed by digital markets to competition law enforcement, including issues related to platform dominance, data privacy, interoperability, and algorithmic collusion.
SLO-15	Evaluate the overarching principles of competition policy and its role in promoting market efficiency, innovation, and consumer welfare.	Develop a set of guidelines for businesses to ensure compliance with competition law regulations, considering various types of anti-competitive agreements and behaviors.	Understand the penalties for non-compliance with merger regulations under the Competition Act 2002 and the role of competition authorities in enforcement.	Evaluate the role of corporate social responsibility practices in promoting antitrust compliance and fostering a culture of competition advocacy within organizations.	Assess the impact of digitalization on competition law enforcement, including the need for regulatory adaptation, the role of big data analytics, and challenges in detecting and prosecuting anti-competitive behavior in digital markets.

SLO-16	Tutorial: Facilitate a discussion on competition laws across different jurisdictions, highlighting key similarities, differences, and challenges.	Tutorial: Construct a model framework for competition authorities to investigate and prosecute cases of abuse of dominant position effectively.	Tutorial: Analyze selected case studies illustrating instances of abusive conduct or problematic combinations under the Competition Act 2002, discussing the legal arguments, enforcement actions, and outcomes of each case.	Tutorial: Participants will comprehend the role of antitrust regulations in shaping board decision-making processes, particularly in ensuring compliance with competition law and fostering fair competition practices.	Tutorial: Discussion on regulatory approaches and enforcement strategies tailored to address competition concerns in digital markets.
SLO-17	Practice: Engage in a role play exercise simulating the allocation process of the Competition Fund, considering various proposals and their potential impact on competition and consumer welfare.	Practice: Engage in Group exercise to identify examples of exclusive supply agreements in various industries.	Practice: Engage in a role-play activity where participants take on the roles of competition authorities, businesses, and consumer advocates to simulate the process of investigating alleged abusive conducts, imposing penalties, and ensuring compliance with the Competition Act 2002.	Practice: Analyze real-world case studies of companies found guilty of antitrust violations, examining the ethical implications, legal consequences, and lessons learned from each case.	Practice: Designing a competition advocacy campaign aimed at raising awareness about competition law and promoting a culture of fair competition.
SLO-18	Practice: Participants engage in a debate discussing different perspectives on competition policy, considering economic efficiency, consumer welfare, and regulatory challenges.	Practice: Assign students practical workshop on defining relevant markets using market definition tools and methodologies.	Practice: Simulate a regulatory compliance exercise where participants draft compliance policies and procedures aimed at preventing abuse of dominance in the market, considering relevant provisions of the Competition Act 2002.	Practice: Discussion on Identifying best practices and strategies for ensuring compliance with antitrust regulations, including the development of antitrust compliance programs, training initiatives, and internal controls.	Practice: Hands-on workshop on investigation techniques employed by the DGI, including evidence collection, witness interviews, and document analysis.
