## ABOUT OUR DEPARTMENT

The prime focus of Software Engineering department is enhancing the students to extend and strengthen the ability to develop and sustain the transformative systems of tomorrow. The activities of the department are determined to create Future Leaders and Trend Setters for next generation. Our Department offers a Comprehensive Under Graduate course curriculum that prepares the students to be leaders in Software Engineering. Department of Software Engineering started offering UG courses from 2008 onwards. Well qualified and experienced faculties form the backbone of the department. Resource person from various industries are invited to deliver guest lectures and seminars on related topics in the curricula. The Department of Software Engineering provides R&D facility to both faculties and students in the research domains such as Computer Vision, Software Process & Engineering, Network System & Services and Computing Technologies.

The focus of Software Engineering Process domain is to incept research ideas and develop new methods, techniques, process and tools for development and maintenance of large and complex software systems that can support software development organizations.

Software engineering process group has a strong focus on theory and tools for maintaining the consistency between models and code. This includes all aspects related to the requirement engineering, software process, verification and validation, software management and Empirical software engineering research methods.
