

Sustainable Travel & Transport

SRM

INSTITUTE OF SCIENCE & TECHNOLOGY
(Deemed to be **University** u/s 3 of UGC Act, 1956)

How do we commute at
SRMIST?

TRAVEL AND TRANSPORT

The university aims to facilitate staff, students and visitors to travel as sustainably as possible to and from campus, to help cut carbon emissions and pollution, and improve health and wellbeing. We particularly encourage to use of active travel such as walking and cycling, as well as public transport, car-sharing, e-vehicles, and avoiding the need to travel by using online meetings or conference calls.

WE AIM TO:

- To provide real and affordable travel choices for staff and students traveling to the university, and between university sites;
- To further reduce the number of cars arriving at the university;
- To manage the demand for car parking within current levels of provision;
- To be a good neighbor to local residents and the wider community.

OUR PERFORMANCE:

- The university improves for sustainable travel options by reducing the own car usage by staffs is 9.9 %, and students are 1.4% in 2017, but the goal is to minimize personal car usage by staff to 5 % and student by 0.5 % before 2022;
- This can be achieved by increasing the utilization of campus connect buses by 30 % by 2022 from 19.81 % in 2016.

HOW WE' RE ACHIEVING SUSTAINABLE TRAVEL

The objective transport strategies seek to reduce the number of car journeys on the network, promote and improve the range and journey experience of sustainable transport, and reduce the university's emissions of carbon and air pollution by vehicles.

SRMIST INITIATIVE FOR SUSTAINABLE TRAVEL

The Environmental sustainability at SRM provides information and services designed to help staff and students make sustainable travel choices on a day-to-day basis and contribute to the reduction of carbon footprint in the university by:

1. SRM Cycles–Pedal
2. Electric Vehicles
3. Shuttle Services
4. Campus Connect Buses
5. Public Transport

The university seeks to understand the requirement of transport for its users, staff and supply chain to prepare targets to reduce the environmental influence of transport related to college activities

SRM CYCLES—PEDAL

“Pedal”, an automated cycle sharing system—In search of an eco-friendly, sharable transport, the team targeted the ecosystem around them, SRM Institute of Science and Technology develops a mode of transportation that help students to move around the campuses conveniently. The pedal is completely automated and can be monitored from an application. Directly approach a hub and swipe your smart card for a cycle to be unlocked. Push the cycle back into a center closest to your destination to complete your ride. Billed by the minute, the system is of minimal costs and fulfills the need for a green and efficient system. To support and encourage cycling the SRM Institute of Science and Technology has installed cycles for students to commute between hostels and university campuses. SRM has initiated a dedicated place for cycle parking across the campus. Regular cycling can improve your health, save money and reduce environmental impact.

Figure 42 : SRM Cycles Pedals at SRMIST

The Staff usage of the cycle is 1.59 %, and Student usage is 1.26 % in 2016, the goal of SRM is to increase the cycle usage to 5 % at the end of 2020

ELECTRIC VEHICLES

Electric cars save many lives from air pollution, but only if they're powered by renewable energy, not energy from coal considering the CO₂ emission SRM has installed the electrically powered vehicles to commute inside the campus.

Figure 43 : Electric Cars utilized in SRM Hospital

SHUTTLE SERVICES

Students, faculties, and staff can ride free shuttles that serve the campus, medical centers, hostels that connect key points in the university. The shuttles operate from Monday to Saturday between morning 07.00 a.m. to 20.00 p.m. with every 20 minutes frequency, and during the weekend the shuttle operates based on the need and the demand.

CAMPUS CONNECT BUSES

The SRM group runs air-conditioned buses for transporting students and faculties to and from almost all parts of the city including smaller vans and several cars.

Figure 46: Air Conditioned Campus Connect buses

The goal of SRM is to increase the utilization of campus connects buses by 30 % by 2020 from 19.81 % in 2016.
